To whom it may concern:

My name is Hayley and I am pleading that we DO NOT put this 5G wire in Humboldt or Del Norte counties. Tourism is significant economy in this area and one that is growing and allows us to generate revenue. We have so many people traveling here from all over the World to witness our counties beauty. I strongly believe that 5G will divert tourism and adversely impact our striving economy.

This is the place in the world that has the MOST redwoods anywhere. Why would we want to jeopardize this? I hear that cutting is being done in Rockefeller Forest, home to one of the tallest trees in the world..Paradox. Paradox tree is going to surpass Hyperion (currently the tallest tree in the World) in just a few years, thus making it the tallest tree in the World when that happens. I really hope this tree stays safe. These trees are very much valuable and part of the reason we have so many tourists. These trees help our environment significantly. I fear that putting 5G in will imply that Humboldt doesn't care about the environment.

EMF radiation generates heat and dehydrates the environment raising the risk of fire. We are in a drought and we need to do everything we can to prevent fires from destroying our forests and towns!! I am from Paradise and we need to keep Humboldt green at all costs! It literally makes no sense to be adding a widespread fire hazard to our ecosystem.

On top of everything else, the setup of 5G is an eye sore! We have spent so much money restoring our downtown, I feel putting this 5G in will only cause us to back track. I am worried that putting 5G in will send a message that we are willing to bargain our aesthetics in the name of corporations. Aesthetics are important and other communities have successfully restricted 5G access based on this.

5G also affects Bird Migratory Patterns! Many tourists come here for the birds. The Marsh in Arcata is a bird sanctuary and attracts birders from all around the World! Our Great Blue Heron's are magnificent. If we are plastered with 5G and have no birds there will be no birding tourists. What is the economic impact of that?

Also 5G causes CANCER!!!! How is this even being considered?? 5G is a small wave that is VERY similar to our bodies electricity systems and this is the problem and why over 2,000 studies since the 1970's PROVE that it is mortally harmful to humans, animals, insects, and

plants. What would happen if we killed all the bees?!?!

I ask that 5G be postponed during these times of dangerous drought and I call for an Environmental Impact Assessment for the risk of fires. We should do an economic assessment of redwoods and tourism.

I ask that an Economic Impact Assessment be done for the effects on tourism and for an Environmental Impact Assessment be done for our natural treasures, the Redwoods and Birds.

Thank you for your time and energy,

Hayley Montgomery
