---

This is a letter protesting the grow at 1011 Tim Mullen Rd., this is in an area of residential homes, An the water supply in this area should be used for residential use only... we are in a drought situation. Also what do these grows do for the community? They are a blight on the land, they do nothing to support the community. Leaving a blight on the land an god awful messes. These grows bring in a criminal element to our neighborhoods, An is within mile of our grammar school. No more grows on Kneeland!
