Re: AP # 016-172-013; Humboldt County

This exemption proposes to convert a portion of improved rural residential timberland into a non-timbered area to obtain open space and sunlight. Humboldt County officials have reviewed the exemption application and approved the proposed action from their jurisdiction per their signature on the attached harvest exemption form. The project area totals less than 3 acres. Zoning is RA5-20.

Pursuant to 14CCR 1104.1(a)(6)(A)&(B):

The extent of the vegetation removal and site preparation required for the conversion;

The conversion area consists of the 2.8 acre lot with structures and a graveled access driveway. Timber consists of second growth redwood and incidental douglas-fir and spruce trees of merchantable size and the associated understory shade tolerant brush, forbs and grasses. Following timber harvesting, treatment of logging slash and woody debris created from operations will occur pursuant to 14CCR 1104.1(a)(2)(D), a copy of which is included in the plan as an attachment, along with the removal of some stumps around the structures. Beyond that activity, no other excavation is required.

The suitability of soils, slope, aspect, and microclimate for the stated non-timber use;

The topography consists of flat ground varying from 0% to 5% grade. There is one creek on the property. The soils, slope, aspect and microclimate are all suitable for the stated use.

Pursuant to 14CCR 1104.1(a)(2)(E)1,2,3:

(E) Timber Operations may be conducted during the Winter Period. Tractor Operations in the winter period are allowed under any of the following conditions:

- 1. During dry, rainless periods but shall not be conducted on saturated soil conditions that may produce significant sediment discharge. Erosion control structures shall be installed on all Tractor Roads, Roads, Layouts, and Landings which do not have adequate natural drainage, drainage structures, or Surface Cover or Woody Debris to dissipate water flow and trap sediment to prevent soil loss prior to sunset if the National Weather Service forecast is a "chance" (30% or more) of rain within the next 24 hours, and prior to weekend or other shutdown periods.**
- 2. When ground conditions in the conversion exemption area and appurtenant roads satisfy the "hard frozen" definition in 14 CCR 895.1.**
- 3. Over-snow operations where no soil disturbance occurs.**

Main access roads to this project area are paved and graveled. Ground based shovel yarders and end loaders are anticipated to be used for logging.

Pursuant to 14CCR 1104.1(a)(5)(D) – Treatment of Logging Slash and Woody Debris

(D) This subsection refers to Slash and woody debris resulting from Timber Operations associated with conversion exemptions. The LTO shall be the responsible party for the treatment of logging Slash and woody debris. Slash greater than one inch in diameter and greater than two feet long, and Woody Debris, shall be chipped, piled and burned, buried, or removed from the site within forty-five (45) days from the start of Timber Operations except for the burning of piles, which shall be accomplished not later than April 1 of the year following their creation, or for piles created on or after September 1, not later than April 1 of the second year following creation.

NOTE:

The RPF has defined the approximate plan area and/or property boundaries based on county plat maps, available survey information, landowners' knowledge and any field evidence (lines and corners). The RPF is not a licensed surveyor and as such the establishment of true property line locations as necessary will be the responsibility of the landowner.
