---

Dear Board of Supervisors,

In my earlier email I was trying to inform you of the inaccurate information you were given while you were discussing the matter while I was listening. I think this needs to be reassessed with the correct information! Amy's numbers are not accurate at all, I'm one of the "1000" reporting to work and my department and many others are NOT getting any additional pay. The only people getting the additional pay at this time is the EOC and JIC. I work for Facilities and we are not even covered yet custodial is. We meet with Vendors and keep the buildings up and running for the staff/public. Not sure how we don't qualify but the custodians do. This concerns me greatly that my coworkers and I go in/out to the public and were not 100 % covered like everyone else. We might not be emergency but we're essential enough to keep those that are at work, up and running with their clogged toilets, faucet won't work, doors that are sticking, mouse droppings, keeping Public Health Lab up and running, SV up and running and many other programs that depend on us. If Facilities isn't there is EOC going to take care of it?

Sincerely,

Angela DeMatos

**Subject:** 5%

I'm one of the "1000" working and I'm NOT getting the additional 5%. There are 15 -20 people in my office that are not getting it.
