I strongly object to the proposed special permit from the property owners at 1575 Sprowel Creek Road. These are the same people who were observed two years ago by myself and others and videotaped by California Department of Fish and Game pumping water out of the river that separates their property from ours. Somehow they managed to avoid any punishment for that offense and they have proven to be scofflaws who feel entitled to do anything they can to make money. They have continuously created noise pollution, including playing loud music over loudspeakers at all hours of the day and night, much to the annoyance of neighbors. I fear retaliation if they discover that I have complained but I need to complain anyway. At a time of very serious drought conditions, the idea of using the amount of water necessary for this project, no matter how it is obtained, is obscene and a real slap in the face to all residents in the area. There has been a notable decline in wildlife activity in this area ever since they obtained this property and it will only get worse if this horrendous project is permitted. Thank you.
