Mr. Cody Roggatz, Manager
Humboldt County Airports Department
California Redwood Coast - Humboldt County Airport
3561 Boeing Avenue
McKinleyville, CA 95519

Subject: Final Invoice for Humboldt County Project No. 381142, Mead & Hunt Job No. R0822900-18452.01, Redwood Coast – Humboldt County Airport (ACV) Microgrid Project

Dear Mr. Roggatz:

During the period from October 15, 2018, through June 30, 2021, Mead & Hunt, Inc. (Mead & Hunt) worked closely with Humboldt County (County) staff at the Redwood Coast – Humboldt County Airport (ACV) to secure various approvals from the Federal Aviation Administration (FAA) and other agencies, such as the Redwood Coast Energy Authority (RCEA), the Schatz Energy Center at Humboldt State University, and a land release from the U.S. Department of Defense, in support of a new microgrid system at ACV. The microgrid system will provide a clean source of resilient power to support ongoing airport and tenant operations during planned or unplanned power interruptions. As stated by the Redwood Coast Airport Microgrid's (RCAM) community partners during the project's groundbreaking on July 7, 2021, "the Airport's microgrid system will be the first 100% renewable, multi-customer microgrid in California."

Mead & Hunt engaged in a contract with the County in October 2018 to prepare an environmental assessment (EA) to comply with the National Environmental Policy Act of 1969 (NEPA), support the inclusion of the microgrid system on the County's Airport Layout Plan (ALP), and support the FAA's unconditional approval for the construction of the microgrid system at ACV. While the level of effort required to support NEPA compliance well exceeded the original scope and budget established for the project, Mead & Hunt understood the importance of the project and continued work without interruption. County staff were alerted to the situation, that additional efforts were not included in our original contract, and that Mead & Hunt was proceeding in good faith efforts with the understanding that an amendment would be issued for the additional efforts.

A previous amendment to the contract (Amendment No.1) allowed the timeframe of the original contract to be extended from December 31, 2019, to December 31, 2020, but it did not address the additional tasks and associated costs. Amendment No.2 presents an additional amendment to extend the contract through June 30, 2021, and identifies the costs associated with the additional tasks described in the amendment.

The following documents are attached.

- **Attachment A: Scope of Services, ACV Microgrid Environmental Assessment (EA) Amendment, June 30, 2021.** Mead & Hunt prepared and submitted a draft amendment to our professional services agreement to County staff on March 30, 2021.

The draft Amendment described the additional work performed by Mead and Hunt from 2019 through 2021, and the requested amount in this Amendment No. 2 is within the amount identified conveyed to County staff in the draft amendment but reduces the amount slightly to \$157,554.95 to reflect the actual amount expended.

- **Attachment B: Mead & Hunt Invoice No. 381142 (Final Invoice).** Mead & Hunt prepared a final invoice to reflect all additional, out-of-scope work performed in support of the proposed microgrid system from 2019 through June 30, 2021, in the amount of \$157,554.95.
- **Attachment C: Mead & Hunt Invoice No. 311667.** Mead & Hunt Invoice No. 301677 in the amount of \$7,385.13 was provided to the County in April 2020. This outstanding invoice is associated with our original contract (County Project 381142), which has a total contract amount of \$44,844.00. This invoice does not represent an amended contract amount; it is an outstanding amount associated with the original contract. The activities identified in this invoice are not duplicated in our final invoice.

Mead & Hunt was pleased to support the County in the development of its innovative microgrid system, and we enjoyed working with County staff and representatives from the County's public/private partners at Humboldt State University and the Redwood Coast Energy Authority. We appreciate the opportunity to be involved in and support such an important project.

Please don't hesitate to contact me by phone (916.993.4650) or email (lisa.harmon@meadhunt.com) if you have questions about the attached amendment and invoices. We appreciate the County's efforts to execute the contract amendment so the final invoice can be processed.

Sincerely,

MEAD & HUNT, INC.

Lisa Harmon
Senior Aviation Planner.

Exhibit "A"
Scope of Services
ACV Microgrid Environmental Assessment (EA)
Amendment to Professional Services Agreement – Project No. 381142
June 30, 2021

PROJECT BACKGROUND

On October 15, 2018, Mead & Hunt, Inc. (Consultant) entered into an agreement with Humboldt County (County) to prepare an Environmental Assessment (EA) to support a proposed Microgrid Project at the California Redwood Coast – Humboldt County Airport (ACV or Airport). The EA was necessary to support compliance with the National Environmental Policy Act (NEPA) and the Federal Aviation Administration (FAA) implementing regulations pursuant to NEPA. Based on various project-related changes and extended FAA review durations, the project was amended to extend the timeframe through December 31, 2020 (Amendment No. 1). The amendment did not include a modification to the project budget.

The Consultant worked closely with County staff throughout 2020 to further the proposed microgrid project and address additional/unanticipated project tasks and documentation requirements as they arose. For example, the FAA revised its regulations and documentation requirements for proposed projects involving the release of land from aeronautical to non-aeronautical use. As part of these revisions, additional documentation was required to obtain the property release and leasehold approvals.

In addition to the additional regulatory process, the Schatz Energy Research Center (SERC) (hereafter "Project Proponent") was faced with strict construction deadlines and a potential loss of grant funds in the absence of necessary approvals. To preserve project funding, the County's Airport Manager and the Consultant jointly decided to continue to respond to the additional project demands and prepare a single project amendment following the receipt of FAA approvals. This amendment addresses the additional work required to obtain approval of the Final EA and the issuance of a Finding of No Significant Impacts (FONSI). The Final EA and FONSI were published on February 21, 2021.

ADDITIONAL SERVICES

A contract to prepare an Environmental Assessment was executed in late 2018. The preliminary draft EA was submitted to the County for review on January 15, 2019. Following County comments, this document was revised and submitted to the FAA in February 2019. Since that time, the FAA and the County identified several additional tasks necessary to achieve compliance with NEPA and the FAA's implementing regulations. Some tasks were associated regulatory changes that had been implemented since project initiation, and others were associated with project-specific requirements. To keep the project advancing, the Consultant has provided ongoing support to the County to fulfill these out-of-scope requirements, which are described as tasks 10 through 15 on subsequent pages, and notified the County of these activities as they progressed.

Task 10: Airport Layout Plan Analysis, Coordination, and Graphic Support

The Consultant prepared revisions to the County’s Airport Layout Plan to support the proposed project as described in the Draft EA. Several iterations were required to:

- Identify the location of proposed project on the Airport and its relation to aeronautical surfaces. This exercise was repeated following changes/modifications to the project design.
- Guide the Project proponent during the siting of individual components so that they could remain outside of aeronautical setbacks; and
- Support analyses to identify discrepancies between various acreage calculations identified in parcel maps, ALP property maps, and acreages identified in property surveys conducted in support of the proposed project.

In addition to general questions associated with airport property boundaries, the Consultant worked with the Project Proponent and their surveyor to:

- Resolve errors/subsequent changes in the original project maps provided by the Project Proponent,
- Clarify the project location relative to the Building Restriction Line and Runway Protection Zone, and
- Identify space for the incorporation of an internal service road within project boundaries.

The resolution of ALP and property map issues became critical during the summer of 2020 when the FAA requested that the County provide a Part 163 analysis of the proposed project (see Task 11).

Task 11: FAA Part 163 Land Release Application and Coordination

On October 27, 2020, the FAA released guidance in response to Section 163 of the FAA Reauthorization Act of 2018, which revised the requirements pertaining to NEPA documentation associated with private development projects on excess airport property and the release of property for non-aeronautical use. The FAA requested that the County provide specific information to support an analysis and determination pursuant to Section 163 of the FAA Reauthorization Act of 2018. The new process included the preparation and submission of detailed documentation, including detailed property maps and supporting conveyance documentation (e.g., deeds), data regarding the funding sources for the proposed project and facilities previously funded or impacted by the proposed project, confirmation of property ownership records and details related to the proposed non-aeronautical use, and various illustrations. To support the County, the consultant:

- Facilitated coordination among the County, the FAA, and the Project Proponent to address the FAA’s information needs. The consultant prepared a data collection matrix and participated in several virtual meetings with the FAA, the County, and the Project Proponent to review materials prior to submission and address FAA questions.
- Prepared, at the request of the County, the necessary justification, analysis, and graphics/illustrations for submission to the FAA; and
- Assisted the County, following FAA submission, in responding to further inquiries from the FAA regarding property acquisition history and additional mapping requests.

Task 12: Obstruction Evaluation / Airport Airspace Analysis (OE/AAA) and FAA Coordination for Glare Analysis.

As a result of changes in the location of proposed project components, a second OE/AAA analysis was required to determine the potential for airspace conflicts. In July 2020, the Consultant prepared and submitted a second complete project submittal to address changes made to the location of specific project components required for microgrid construction, including the placement of proposed solar panels and other objects. Additional OE/AAA submittals were prepared in response to specific elements that were added or modified to the project description, such as the realignment/replacement of power cables to the Airport’s approach lighting system equipment building, the location of the proposed fence, etc. More than 100 specific points were submitted for analysis.

A solar glare analysis was required to determine whether the proposed project had the potential to produce glare or other visual effects that could affect pilots using ACV. The EA could not move forward through the FAA review process until it was completed and any questions resolved. Although the solar glare analysis was provided by the Project Proponent, the County requested help to track its process through the FAA system and facilitate its review.

Task 13: Coordination Among the FAA, Project Sponsor, and Proponent

Throughout 2020, the Consultant worked to align project goals with federal aviation regulations and policies and facilitate FAA processes to achieve compliance within necessary timeframes and construction schedules. The Consultant participated in more than 120 additional teleconferences with the County, FAA, and Project Proponent throughout 2020 and early 2021 to facilitate project coordination, document development, and changes/clarification in the project definition as they arose and to communicate those changes to the FAA. To support the County, the Consultant provided continuing support to the Airport staff throughout the additional 15 months associated with the extended project duration. During the last three months prior to FONSI receipt, Consultant staff members held informal teleconferences with the County and members of the project team almost daily and with FAA staff at least weekly. Such discussions included the development of various maps, exhibits, and documents to facilitate project-related discussions.

Task 14: Prepare and Revise Environmental Assessment

The original scope of services specified that the proposed EA would be developed using data identified in a 2018 Initial Study prepared in accordance with the California Environmental Compliance Act (CEQA).

The project was scoped to include:

- A preliminary-draft document for County and FAA review,
- A revised preliminary draft to address FAA comments and ready the document for public review,
- Production and circulation of a Public Review Draft EA,
- Preparation of a Draft-final EA for County and FAA review, and
- Production and Circulation of Final EA and FONSI.

Several unanticipated events occurred that required ongoing revision of the revised document prior to public circulation as described below.

- **Insufficient Level of Data.** Some of the data developed for the purpose of CEQA compliance proved insufficient to provide the level of detail required to achieve NEPA compliance. Additional studies and data, specifically additional biological data, were requested that led to the development of an additional iteration of the draft EA.
- **Project Modifications.** Following submission of a revised preliminary-draft document that included the additional data requested, the project description required modification to reflect ongoing project changes. FAA reviewers noted differences between the project description provided in the EA and the descriptions included in other documents received directly from the Project Proponent, such as the Solar Glare analysis and initial OE/AAA submission. As cited previously, the Consultant prepared and submitted a second OE/AAA analysis to address the subsequent project modifications. An additional version of the Draft EA was developed to address these project modifications and revise the analyses presented in the EA.
- **FAA Part 163 Policy Effects.** During 2020, the FAA determined that the proposed project would be subject to review in accordance with the FAA’s Part 163 process (see Task 11). The EA was subsequently revised to address the outcome of the Part 163 process, which led to additional changes to the project description, purpose, and need. An additional iteration of the EA was developed and submitted to the FAA to address these issues. The Consultant submitted additional draft documents to the FAA to reflect the Part 163 process that was underway, to revise the project description, and to reflect additional data received by the Project Proponent.
- **Federal Guidance on NEPA Documentation.** Federal guidance on the development of NEPA documents was implemented in 2020, which addressed the length and processing time associated with environmental documents. In mid-2020, FAA managers determined that the EA would be subject to new requirements associated with the document length and presentation. The Consultant substantially reorganized and revised the draft EA to comply with the new page-limit requirements and other structural changes. Portions of the document were placed in appendices and summarized in the document text, and the alternatives analysis was revised to include a process diagram and revised discussion.

The Draft EA was published mid-October 2020 and circulated for a 30-day period. No comments were received from the public. The FAA finished the preparation of a FONSI to approve the EA on February 18, 2021, and the EA document was completed with the circulation of the Final EA and FONSI during the week of February 22, 2021, which aligned with the revised schedule prepared on behalf of the project proponent mid-2020.

Task 15: Project Administration and Management

The Final EA was completed in February 2021, approximately 14 months beyond the anticipated schedule in the EA, and coordination to support the Federal Property Release is ongoing. During this time, the Consultant has incurred additional project management and administration costs.

Task 16: Ongoing Coordination to Support Federal Property Release

A portion of the property proposed for microgrid construction was conveyed to the County by the U.S. Military following World War II, and the U.S. Department of Defense (DOD) must authorize the release of a portion of the 11-acre project site for non-aeronautical use. The continued to support this negotiation following completion of the Final EA. While the DOD has not yet provided the County with a signed release, Mead & Hunt does not envision additional work to support the Federal property release.

COMPENSATION

From October 15, 2018, through June 30, 2021, the Consultant incurred a total cost of \$202,398.95 in labor to support the County’s microgrid project, which includes the originally scoped cost of \$44,844.00 for the development of EA using existing data. The Consultant requests an amendment of **one hundred fifty-seven thousand five hundred fifty-four dollars and ninety-five cents (\$157,554.95)** as compensation for the additional tasks described in this amendment and performed at the request of County staff during the 18-month period from January 1, 2020, through June 30, 2021.

Expenses are summarized in the table below:

Task	Description	Amount
10	Airport Layout Plan Analysis, Revision, and Graphic Support	\$21,765.00
11	Part 163 Land Release Application and Coordination	\$12,010.50
12	OE/AAA Analysis and Glare Study Coordination	\$11,476.50
13	Coordination Among FAA, Project Sponsor, and Project Proponent	\$24,872.00
14	Prepare and Revise Environmental Assessment	\$74,834.95
15	Administration and Project Management	\$9,577.50
16	Ongoing Support for DOD Release	\$3,018.50
Total Amendment Request		\$157,554.95

SCHEDULE

Tasks 10 through 15 of this amended Scope of Services were completed in February 2021 with the circulation of the Final EA and FONSI documents. The Consultant continued to support the County to obtain the release of former DOD property from federal obligation through June 30, 2021.

PROGRESS REPORT

From late December 2019 through March 2020, Mead & Hunt incorporated comments received from the FAA on the revised preliminary-draft Environmental Assessment (EA). A Draft EA was sent to the FAA during the March 2020 reporting period.

Mead & Hunt anticipates comments on the Draft EA during the April 2020 reporting period. No further work can be performed until comments are received from FAA.
