Clerk
Board of Supervisors

Dear Members of the Board of Supervisors,

Regarding your letter of November 25th 2020 concerning Bear Butte Farms LLC and the upcoming permit revocation hearing on December 15th 2020 :

We are taking this opportunity to present a noise complaint with respect to the cultivation activities on APN: 221-230-003 (Bear Butte Farms LLC).

On June 17th 2020, the operators of the farm were informed that the sound levels created by their high velocity greenhouse fans, and diesel generator were extremely loud across our shared property lines directly to the North.

Despite our respectful complaint, we were ignored and suffered loud continuous noise daily for rest of the Summer.

Noise was noted to be still very loud at our garage, which is almost 700 feet from our shared property line and to further put this in perspective, the noise could still be clearly heard over a quarter mile away, at our other 40-acre parcel, North of the aforementioned bordering parcel.

This continuous industrial noise has rendered our property, which our family has owned for about 20 years, unpleasant to inhabit. Due to the lack of response by the farm operators in question, we felt we had no choice but to submit this formal complaint.
