Hello

This email is in regards to the proposed project at the above APN in the Kneeland area of Humboldt County. As a resident of this community for the past 15 years, I feel compelled to submit my rejection of this large operation in an already-parched landscape. Over the years the water available in our spring has steadily diminished; for the first time this year, water had to be purchased due to the spring drying. To drill yet another well in the small valley this parcel resides in, on top of the proposed tank farm for rain catchment must surely affect the minimal aquifer many longtime residents rely on. In addition, this is an aesthetically beautiful area that is already ruined by super aggressive drivers in grow dozers. We were caretakers for an elderly couple who were one of the original landowners that built a home there. By the end of their time on Kneeland we were driving them everywhere due to the danger posed by oversized trucks driven by individuals intent on making the drive as fast as possible. There is enough cannabis being grown on this ridge already, the character of the community already changed for the worse, please reject this project by Steven Luu.

Regards,

Michelle McKenzie
