Assembly Bill 1600 known as the Mitigation Fee Act, codified in Government Code Section 66000 et seq., requires that a report on the fee be prepared annually and made available to the public within one hundred and eighty (180) days after the last day of the fiscal year. The Board of Supervisors reviews the information made available to the public at the next regularly scheduled public meeting not less than fifteen (15) days after it is made available to the public. Notice of the time and place of the meeting, including the address where this information may be reviewed, has been publicly posted in accordance with the provisions of the Mitigation Fee Act.

The 2015/16 annual report is Exhibit A to Attachment A to this agenda item and includes the following information in accordance with Government Code Section 66006(b):

- A. A brief description of the type of fee in the account or fund.
- B. The amount of the fee.
- C. The beginning and ending balance of the account or fund.
- D. The amount of the fees collected and the interest earned.
- E. An identification of each public improvement on which fees were expended and the amount of the expenditures on each improvement, including the total percentage of the cost of the public improvement that was funded with fees.
- F. An identification of an approximate date by which the construction of the public improvement will commence if the local agency determines that sufficient funds have been collected to complete financing on an incomplete public improvement, as identified in Government Code Section 66001(a)(2), and the public improvement remains incomplete.
- G. A description of each interfund transfer or loan made from the account or fund, including the public improvement on which the transferred or loaned fees will be expended and, in the case of an interfund loan, the date on which the loan will be repaid, and the rate of interest that the account or fund will receive on the loan.
- H. The amount of refunds made pursuant to Government Code Section 66001(e) and any allocations pursuant to Government Code Section 66001(f).

Also, pursuant to Government Code Section 66001(d), every fifth year the local agency shall make all of the following findings with respect to that portion of the account or fund remaining unexpended, whether committed or uncommitted:

- (1) Identify the purpose to which the fee is to be put.
- (2) Demonstrate a reasonable relationship between the fee and the purpose for which it is charged.
- (3) Identify all sources and amounts of funding anticipated to complete financing in incomplete improvements identified in Government Code Section 66001(a)(2).
- (4) Designate the approximate dates on which the funding referred to in (3) above is expected to be deposited into the appropriate account or fund.

The county has complied with the general requirements of the act that fees collected are necessary to fund the cost of improvements which benefit or will benefit subject developments. The funds collected have been segregated from other funds since the outset of collection in compliance with the act. The county does have unexpended funds that are to be used for constructing the remaining projects.

FINANCIAL IMPACT: There is a minimal cost associated with preparing the necessary reporting documents. This will be covered within budget unit 1100166.

This item conforms to the Board of Supervisors' Core Role of providing for and maintaining infrastructure.

OTHER AGENCY INVOLVEMENT: None.

ALTERNATIVES TO STAFF RECOMMENDATIONS: Not adopt the Resolution accepting the Report and not adopt findings related to Drainage Fees in the McKinleyville Drainage Area. This action would not be in compliance with the Mitigation Fee Act.

This Ordinance was codified in County Code Section 328.1-1 et seq. This Ordinance set forth the collection of drainage fees related to development on existing and future parcels within the McKinleyville Drainage Area. The purpose of the fee is to correct deficiencies in the storm water conveyance system in the McKinleyville area.

On 05/23/1989 Ordinance No. 1864 was adopted by the Board of Supervisors that clarified application of the fees.

On 10/10/1995 Ordinance No. 2092 was adopted by the Board of Supervisors that removed North Bank Road drainage area from being subject to the fees since no improvements were proposed in that drainage area.

The Planned Facilities that are identified in the McKinleyville Drainage Plan refer to that certain document, including the plans and maps contained therein, prepared by the firm of Winzler & Kelly, Consulting Engineers, entitled "McKinleyville Drainage Study, Prepared for the County of Humboldt and McKinleyville Community Services District", dated August 1982, copies of which are on file in the Office of the Clerk of the Board of Supervisors.

B. The amount of the fee.

The amount of the fee is codified in County Code Section 328.1-14, which is shown below.

The projects which the fee is to fund are set forth in the report prepared by Winzler & Kelly, titled "McKinleyville Drainage Study, Prepared for the County of Humboldt and McKinleyville Community Services District", dated August 1982.

There are improvements identified in the McKinleyville Drainage Plan that have not been constructed. No improvements are scheduled for construction at this time. The fees collected are necessary in order to fund the construction of the remaining improvements.

G. A description of each interfund transfer or loan made from the account or fund, including the public improvement on which the transferred or loaned fees will be expended, and, in the case of an interfund loan, the date on which the loan will be repaid, and the rate of interest that the account or fund will receive on the loan.

- (a) Subdivision and development of the property within the McKinleyville Drainage Area will require construction of the Planned Facilities;
- (b) The estimated costs of constructing the Planned Facilities are based on the findings set forth in subsections (a) and (c) of Section 328.1-3;
- (c) The fees established by this chapter are fairly apportioned within the McKinleyville Drainage Area on the basis of benefits conferred on property proposed for subdivision and development of other property within the McKinleyville Drainage Area.
- (d) The fee established by this chapter as to any property proposed for subdivision within the McKinleyville Drainage Area does not exceed the pro rata share of the amount of the total, actual, or estimated cost of all the Planned Facilities within the McKinleyville Drainage Area which would be assessable on such property if such costs were apportioned uniformly on a per acre basis;
- (e) The Planned Facilities are in addition to existing facilities serving the area at the time of adoption of the McKinleyville Drainage Plan.

ARTICLE 2 - MINIMUM REQUIREMENTS

328.1-5. RUNOFF DESIGN.

Storm water runoff from a subdivision shall be collected and conveyed by a drainage system approved by the Director of Public Works. Maximum runoff shall be computed using the Rational Method. The Rainfall Intensity - Duration Curve, for Eureka, and "C" values approved by the Director of Public Works shall be used in computation. Runoff design shall accommodate the full and anticipated future development within the drainage area. In cases where the drainage areas are undeveloped, fully improved conditions shall be determined by the designation of the area on the General plan or the zoning classification of the area. The drainage system shall provide for the protection of the abutting properties that would be adversely affected by any increase in runoff attributed to the development, for which off-site storm drain improvements may be required. (Ord. 1758, § 1, 11/12/86)

328.1-6. PROTECTION FROM SURFACE WATERS.

All portions of building sites shall be protected from flood hazard, inundation, sheet flow and ponding of storm waters, springs and all other surface waters. All finished floors shall be a minimum of one foot above the water surface of a 100-year frequency storm runoff. (Ord. 1758, § 1, 11/12/86)

328.1-7. ADEQUATE STORM DRAINAGE FACILITIES.

(a) The design of all improvements on any parcel within the McKinleyville Drainage Area shall be such that all surface waters occurring within the parcels, as well as all surface waters flowing onto and/or through the parcel shall be conveyed through the parcel without damage to any improvement, building site, or dwelling which may be constructed on the parcel or on any other parcels in the vicinity. Drainage facilities for any improvement shall be designed to adequately convey the storm water runoff from the ultimate development of the drainage basin or watershed. (Ord. 1758, § 1, 11/12/86)

(b) Site development shall be accomplished wherever possible in a manner that will maximize percolation and infiltration of precipitation into the ground and will minimize direct surface runoff into adjoining streets, water courses, or properties. (Ord. 1758, § 1, 11/12/86)

(c) Site development shall be accomplished wherever possible in a manner to maximize use of natural drainage features. (Ord. 1758, § 1, 11/12/86)

328.1-8. SURFACE WATER FLOWING FROM A SUBDIVISION.

Surface water flowing from a parcel or subdivision in any form or manner shall be conveyed without damage to any improvement, building, or dwelling both within and downstream of the subdivision to a natural watercourse having a definable bed and banks, or to an existing adequate storm drainage facility. Storm drainage facilities to be constructed outside of the parcel or subdivision shall be designed to adequately convey the storm water runoff from the ultimate development of the drainage basin or watershed lying within and above the subdivision. Any surface waters detained or ponded on adjacent property(s) as the result of improvements constructed by the developer or subdivider, shall not cause any damage to said property. (Ord. 1758, § 1, 11/12/86)

§ 328.1-9

328.1-9. STORM WATER DISPOSAL RESTRICTION.

Storm water flowing from a parcel or subdivision in any form or manner shall not be permitted to flow into any sanitary sewer or any other facility not specifically intended for storm water runoff. (Ord. 1758, § 1, 11/12/86)

(2) Secondary drainage channels. Secondary drainage channels and conduits shall have sufficient capacity to contain a ten-year frequency or occurrence runoff, as well as sufficient additional capacity so that floodwaters escaping therefrom shall not reach an elevation within one foot of any dwelling or commercial structure. (Ord. 1758, § 1, 11/12/86)

(3) Minor drainage channels. Minor drainage channels, conduits, and appurtenant facilities shall have sufficient capacity to contain a ten-year frequency of occurrence runoff, as well as sufficient additional capacity so that floodwaters escaping therefrom shall not reach an elevation within one foot of any dwelling or commercial structure.
