**Re: Appeal of Zoning Administrator Decision for PLN-12861-CUP, for APN. 220-221-023, located on Tree Farm Road, Humboldt County, California.**

Mr. Steve Santos:

Pacific Watershed Associates (PWA) and Abby Road Farming LLC wish to appeal the decision approved by the Zoning Administration for APN 220-221-023, located on Tree Farm Road, Humboldt County, California.

This decision comes as a surprise to the applicant, the owner, and applicant's agents as while the County has records of sending notices to the applicant, neither the applicant, the owner, nor their agents, have any records of said notices being received.

Further, that the letter dated January 26, 2023, stating that the project was headed to the Zoning Administrator on February 16, 2023, was sent solely to the applicant, and not the listed owner or either of the listed agents, makes it difficult for the owner and agents to respond appropriately.

Had PWA received any notification, these issues would have been addressed. Additionally, there was communications with the applicant on July 27, 2022, March 1, 2023, and March 10, 2023, for which the agent was not made aware of until this morning when in the Planning Department asking about this project. Again, making it difficult to respond to communications.

It is PWA's understanding that this decision is based on:

**Finding: CEQA:** The project is statutorily exempt from the California Environmental Quality Act.

**Evidence:**

- a) Section 15270 of the CEQA Guidelines (Projects Which Are Disapproved). **No Response.**

**Finding:** The proposed development is not consistent with the requirements of the CMMLUO Provisions of the Zoning Ordinance.

**Evidence**

- a) No hydrologic study for the groundwater well prevents staff from determining if there is an adequate and eligible water source. **Response:** There is not a well on this property nor is there proposed to be a well.
- b) Lack of a noise management plan for the generator prevents staff from determining if the energy source will comply with applicable standards given the proximity of northern spotted owl. **Response:** The Noise Management Plan is currently in press and can be submitted with additional documentation. Due to the current economy regarding cannabis cultivation, there is no cultivation planned for this season and therefore, no generator in use.
- c) Because the incomplete materials prevented the creation of a complete project description, the project has not been placed in referrals. The lack of agency and tribal consultation prevents staff from proposing appropriate conditions. **Response:** Previous documentation for this project did not include a required archeological or tribal review until final complete submission of all documents. If at this time, the Humboldt County Planning Department is requiring a tribal consultation of this property, that will be submitted. County communications only asks for a replacement of a \$30 check.

**Finding:** There is insufficient evidence to support a finding that the project will not be detrimental to the public health, safety, or welfare or materially injurious to properties or improvements in the vicinity.

- a) The project application does not contain a wetland delineation nor an environmental superiority analysis and restoration plan for onsite relocation. Staff is unable to determine if the project will cause any significant impacts or provide mitigations consistent with the measures in the adopted MND for the CMMLUO. **Response:** there was an Aquatic Resource Delineation prepared by Kyle Wear, Botanical Consultant for this project in February of 2021. The results of this study concluded that what had previously been classified as a possible wetland, is indeed classified as a Class III ephemeral stream which would warrant a 50-foot setback from the edge (See Attached).

**Further Response:** PWA is currently completing the Lake or Streambed Alteration Agreement for this property which will upgrade the access road, improve water transportation via properly sized culverts.

**Additional Response:** As was submitted earlier, the previous cultivation location was a result of "Gorilla Grows within the woods. The current cultivation sites, in PWA's professional opinion are superior as they are closer to the residence, and within

greenhouses as opposed to within the woods where they are more likely to impact wildlife. They are also more compactly located as opposed to being spread out across the hillside. See attached photos of previous cultivation areas. This relocation did take place after January 1, 2016 by a previous owner of the property based on advice they were given early on in the permitting process.

Pacific Watershed Associates hope this information is helpful in the reversal of the Zoning Administrations Decision of this project. PWA is available for any consultation requested. A completed application packet will be assembled as soon as we have a final determination on this project. I can be reached directly either at the office at 707-839-5130 ext. 31, or on my cell phone at 707-498-0801. Please do not hesitate to call. Also, in the future, would you please include PWA on any future correspondence.

Sincerely,

**PACIFIC WATERSHED ASSOCIATES INC.**
