Good Day,

I am a 35 year resident of Kneeland living on Barry Rd, directly across the ridge from the proposed cannabis grow of Steven Liu.

I am totally appalled that this grow can be approved. First and foremost, I have seen our drought increase year after year. All our water supplies are shrinking, our fields this time of year are dangerously dry and our forests are parched. The trend that I have seen does not point to a temporary drought. This drought is a new reality. It is extremely short sighted to think that this proposed grow will succeed and will not impact the downstream neighbors' water supply.

Please consider the health of our watershed and all those, human and non-human, that depend on our healthy watershed.

I cannot state strongly enough how opposed I am to this project.

Thank you for your time.

Sincerely,

Margaret Nulsen
