I have more information regarding this project and would like to retract my concerns. I am familiar with the project and the property and the water source. I know how this creek works, and the impacts are no longer a concern. I also think the landowner is doing a good job being responsible. I thought this project was the Koen property. The only concerns left are the increased use on the road and ask it be limited to the max for safety and standard of life. We do no invite standard of industry.

I want an explanation of noticing.
