Attn: Ron Halverson
Human Resources Assistant Director

Dear Ron Halverson:

Thank you for considering CivicHR as a partner for Humboldt County's resource system needs. I am excited to present a solution to help maintain and track employment candidate information with limited work and time commitment from your staff.

We are confident that the CivicHR | Applicant Tracking system is the most user-friendly solution available. Hidalgo County, TX recently selected to transition to the CivicHR | Applicant Tracking system. Hidalgo County had their former applicant tracking software for two years, but they were never able to fully utilize it because the software was too difficult to operate and the level of support provided to not meet their needs. We pride ourselves on the support we provide and our system's ease of use, which guarantees our solution is fully adopted by your county and its hiring teams.

Of the proposals you review, all should offer an intuitive way to quickly and efficiently populate information; however, the best solution should also include the latest innovations in government functionality that top candidates will seek to use when applying for your career opportunities.

You are likely aware, CivicPlus is the unique provider of the award winning Government Content Management System (GCMS®) – and is one of the most innovative, knowledgeable sources for engaging eGovernment solutions provided exclusively to over 1,600 public sector clients. CivicPlus' expertise lies in our ability to deliver a comprehensive solution that considers administrative ease and collaboration as well as end-user empowerment. Our human resources solutions can seamlessly integrate with your website to offer simplicity for your team, and keep your website the funnel of all information to your citizens.

The following proposal details how the CivicHR solutions will reduce your staff's workload, respect budget constraints and, most importantly, provide your community with a powerful online resource that promotes open and transparent access to your municipality's career opportunities.

I sincerely welcome the opportunity to elaborate further on our proposal and answer additional questions you may have about partnering with CivicHR.

Respectfully,

A handwritten signature in blue ink that reads 'Tiffany Ledbetter'.

E. Technical Capabilities

The CivicHR solutions are web-based Software as a Service (SaaS) applications. Access to the products can be obtained from all web-enabled devices. The application and all data are stored on cloud-based servers to provide scalability for small to very large organizations. Currently, only approved and qualified senior engineers are allowed to securely access the remote hosting environment. All data is transferred over secure FTP and is destroyed when data utilization is complete. All employees associated with CivicHR undergo criminal background checks and are held to the highest standards of personal data security and data protection. To what extent that information may be considered in making hiring decisions depends on Kansas Statutory law and industry standards.

CivicHR is backed by a partnership with GoGrid, a leading cloud-based hosting provider located in San Francisco, CA. In March of 2012, GoGrid successfully completed the SOC1 (SSAE16) Type II Audit. SSAE 16 is the new auditing standard developed in 2011 by the American Institute of Certified Public Accountants (AICPA) to replace SAS 70. SSAE 16 defines all the requirements applicable to data centers and other hosting providers. GoGrid has received SAS 70 Type II audits every year since 2006 and was one of the first cloud services providers to pass that audit.

All CivicHR product solutions are compatible with all browsers, meaning that you can use your preferred browser to access and work within any area of our products. Our products are all written on top of the Microsoft .NET 4.0 platform using a combination of C# and LINQ. AJAX and JQuery are utilized throughout the system to allow for a more responsive user interface. All production data is encrypted and stored in SQL Server 2008. All connections to our products made by client or mobile connections are SSL encrypted to 128-bit. The connection uses TLS 1.0 and is encrypted using AES_128_CBC, with SHA1 for message authentication and RSA as the key exchange mechanism.

Data backups are performed nightly and saved off site to Amazon cloud services data system where they are stored in their fire/flood/earthquake proof data centers. All encrypted documents are also sent to an Amazon controlled cloud server for disaster preparedness and system recovery. Any documents that are uploaded into the system by candidates or admins are programmatically converted to PDF documents and are also encrypted and password protected to provide the highest level of security while at rest.

F. Disaster Recovery Plan

G. Implementation Timeline

- + The timeline for implementation can be based solely on your needs and timeframe for implementation
- + The job application can be customized to your needs
- + The applicant tracking system can be integrated with your website as an employment opportunity listing and/or a link to a hosted Career Portal
- + Custom workflows can be configured specific for managing your hiring process
- + All system administrators, HR users and hiring managers can be setup with custom preferences

H. Training Plan

CivicHR | Onsite Training is provided at a very cost effective all inclusive level and is also highly recommended though not required.

During implementation we will schedule with you administrator and user training sessions. We will support you every step of the way and whenever questions arise. You will receive as much web-based training as you require for both administrators and users. Training can be direct or train-the-trainer, but CivicHR recommends training as a top priority in order to ensure optimal user adoption of the system and agency's hiring policies. Each subsequent year, you will receive up to eight (8) hours of individual web based training. There is no limit to the number of individuals that can attend training.

19. ASSIGNMENT:

CONSULTANT shall not delegate its duties or assign its rights hereunder, either in whole or in part, without COUNTY's prior written consent. Nor shall such payment impair or prejudice any remedy available to COUNTY with respect to any breach or default.
