**Subject:** adopta new resolution in regards to offshore drilling

Dear Ryan,

As you request feedback on Mike Wison's proposal, I'd like to express my support in favor of opposing new offshore drilling. I really believe that the risk for terrible damage to the marine environment is too great for us to bet on an energy source that soon will be irrelevant ( I know, it's not for tomorrow, but it is heading this way). This decision will create a legacy for the long-term future and I hope you and the board will decide to leave an already fragile environment as intact as it can be.

Best

Dear Ryan,

I am adamantly opposed to any off-shore oil drilling anywhere in United States' continental waters, but most especially off the coast of California. The attempts by the Executive branch of our government to erase decades of progress in protecting our environment are repulsive, short sighted, and potentially disastrous.

Thank you,

Jane Carlton

**Subject:** Mike Zamboni comments

Oil extraction would be happening far offshore beyond where most would even be aware of its presents. It's beyond the salmon and crab grounds and would take up a relatively small area compared to wind or wave. The technology has advanced to the point where spills are rare at most. In the southern part of the state oil platforms are the destination of much of the sport-fishing industry because they provide fish holding habitat that is otherwise non-existent offshore. If it were up to me to chose between the three I would prefer oil. Thanks Mike Zamboni

I am Howard Welch, 1987 Elmwood Place, McKinleyville, CA (707-840-8898).

After reviewing the resolution opposing any new off shore oil development, I am in concurrence with the statements made in the resolution. What happened in Santa Barbara must not happen again. The risk is just too high especially given that oil is available in much safer ways and consumption is falling due to efficiency and alternative energy sources. You may enter this into the public comment record.

**Subject:** I oppose offshore drilling

Dear Ryan:

Thank you for reading this personal plea to oppose offshore drilling off our coast.

In 1969, I lived in Ventura just south of Santa Barbara. I saw personally the devastating consequences of offshore drilling on the beaches, birds, fish, and ecosystem caused by the ravages of spills from offshore drilling. I would never want that to happen to our pristine ecosystem here in Humboldt County.

I have seen from afar the disasterous consequences to the Louisiana and the Gulf Coast from oil spills. My ancestors on my Mom's side were French and Spanish settlers in New Orleans. I am saddened by the ruination of the Louisiana bayou and Gulf ecosystem caused by the massive oil spills.

Please fight this attempt by the oil companies to greedily take oil and ruin our ecosystem on the North Coast. Once our environment is ruined, there is no permanent repair.

Sincerely,  
Mary C. McCarthy, attorney at law

I live in Fieldbrook, went to HSU, and have worked here in Humboldt County most of my adult life. I love the pristine coastal areas, was married atop Trinidad Head at the big granite cross. Saying that, I was born in Southern California, went to the beach all the time in my childhood, and remember the havoc the broken pipelines caused. I remember my dad packing the car to go to the beach on the weekend, and having to pack turpentine and rags to clean off our feet before heading for home. This is not the Dream we should have for our grandchildren, this is not the Dream for the 7th Generation. Please help keep our northcoast the sanctuary it is.

Ryan,

Opposed to off shore drilling, on shore fracking, nuclear power, and anything else that requires burning stuff, although

I do have a fondness for my wood stove.

My argument against the larger projects is that when things go wrong they go wrong in huge ways that can not be rectified.

When my wood stove burns my house down; it's just my house, not a hundred miles of coast line.

**Subject:** Offshore drilling

As someone intimately involved with our local ocean I am acutely aware of how inappropriate and environmentally dangerous offshore drilling would be. As I am sure you are aware we have offshore winters conditions that are some of the most dangerous and the potential for a catastrophic spill would be very high which in turn would decimate our fishing industry. Please oppose the proposed re-opening of offshore drilling on the northcoast.

Thank you -

**Sent:** Saturday, February 24, 2018 10:23:47 AM  
**Subject:** Please vote to oppose offshore drilling in Humboldt County!

The health of the oceans and their inhabitants is very important to me. Seventy percent of the world's oxygen is produced from algae, sea grasses and other photosynthetic organisms! Everyone needs to breathe and if we destroy the oceans through continued pollution and oil spills, it will have absolutely disastrous effects on marine life and terrestrial life. I used to surf and scuba dive fairly frequently, although spend most of my time working now. The oceans and beaches are a majestic, beautiful place that many people enjoy, including myself. The thought of walking along the beaches, surfing, or diving and dodging quite a bit of crude oil that is present from accidental spills is horrendous. Marine mammals, cetaceans especially have much higher miscarriage rates when there are oil spills. Generally there are 3 spills per day with offshore drilling and from observing the 2010 spill, the deep-water horizon spill and many others, there is quite a lack of an effective environmental clean up plan. Renewable energy production is the way to go for a sustainable future for the planet such as wind and geothermal energy production. In California where I live, 400,000 jobs have direct correlation to the ocean from fisheries to recreation and many others. If the oceans were polluted by a potential spill, it could decimate the economy of California, which is the 8th highest in the world. I love my state and have a small business in Humboldt county and am very concerned with the long term solution for our energy needs, jobs and environmental health.

The oceans are all connected and if drilling happens if we fail to stop it, the entire planetary cycle will be affected. With lack of an effective clean-up plan, I strongly urge you to take action to oppose offshore drilling by passing a county wide resolution to oppose the Trump Administration's decision.

Sincerely,

Connie Lindgren

**Subject:** Off-shore oil opposition

2/27/2018

Dear Supervisors,

I support HC officially opposing oil drilling off our coast for a variety of reasons as follows:

HC citizens have spoken overwhelmingly against drilling in the past, and other mega fossil-fuel projects like LNG  
There are many un-mitigatable hazards associated with off-shore drilling including spills, ocean traffic, air and water pollution, and effects on sea-life  
Drilling rigs are vulnerable to terrorism  
Climate change demands a commitment away from fossil fuels and towards renewables and non-carbon based alternatives  
Off shore drilling could impair efforts for wind and potentially wave generation, both of which should be prioritized for off-shore energy production,  
There is no need for more gas and oil production for our energy requirements  
Drilling off-shore of any coastline cannot be justified

Respectfully,

Ken Miller  
1658 Ocean drive  
McK 95519
