**Eleven (11) Inspections**  
**Plan Check**  
**Energy Compliance Review**

**FEE SCHEDULE**  
**Strong-Motion Instrumentation and Seismic Hazard Mapping Fee**

Method 1

The fee amount can be calculated from the permit valuation amount using the formula:  
 (Valuation Amount) X 0.00013 = Fee amount  
 As an example, the fee for a \$128,580 valuation is \$128,580 x 0.00013 or \$16.72

Method 2

As an alternative to Method 1, the fee for a given valuation can be calculated using the following table, as illustrated below:

Valuation	Fee	Valuation	Fee	Valuation	Fee	Valuation	Fee	Valuation	Fee
\$0-100	\$ 0.01	\$ 1,000.00	\$ 0.13	\$ 10,000.00	\$ 1.30	\$ 100,000.00	\$ 13.00	\$ 1,000,000.00	\$ 130.00

The fee amount can be obtained by breaking the evaluation amount into parts and using the entries in this table. An example for a permit valuation of \$128,580 is shown at the right:

\$100,000	\$13.00

\$128,580.00	\$16.72 Fee amount

\*Notes:

- 1) The minimum fee is \$.50, so the fee for any valuation up to \$3,850 is simply \$.50..
- 2) Category 1 construction includes residential buildings one to three stories in height, except hotels and motels. Single family houses, duplexes and quadruplexes are in Category 1. Condominiums and apartment buildings are in Category 1 only if they are three stories or less in height.
- 3) A "building" is defined as a structure built for the support, shelter or enclosure of people, animals or property.
- 4) All fees will be rounded to the nearest whole dollar.

**FEE SCHEDULE**  
**Strong-Motion Instrumentation and Seismic Hazard Mapping Fee**  
**Category 2 Construction\***

Method 1

The fee amount can be calculated from the permit valuation amount using the formula:  
 (Valuation Amount) X 0.00028 = Fee amount  
 As an example, the fee for a \$1,231,890 valuation is \$1,231,890 x 0.00028 or \$344.93

Method 2

As an alternative to Method 1, the fee for a given valuation can be calculated using the following table, as illustrated below:

Valuation	Fee	Valuation	Fee	Valuation	Fee	Valuation	Fee	Valuation	Fee
\$0-100	\$0.03	\$1,000	\$0.28	\$10,000	\$2.80	\$100,000	\$28.00	\$1,000,000	\$280.00

The fee amount can be obtained by breaking the evaluation amount into parts and using the entries in this table. An example for a permit valuation of \$1,231,890 is shown at the right:

\$1,000,000	\$280.00

\*Notes:

- 1) The minimum fee is \$.50, so the fee for any valuation up to \$1,786 is simply \$.50..
- 2) Category 2 construction includes all buildings not in Category 1. For example, Category 2 includes residential buildings over 3 stories, all office buildings, warehouses, factories and other manufacturing or processing facilities, restaurants and other non-residential buildings.

**BUILDING STANDARDS BULLETIN 08-01**

**DATE: OCTOBER 30, 2008**

**TO: CITY, COUNTY, AND CITY AND COUNTY JURISDICTIONS**

**SUBJECT: Chapter 719, Statutes of 2008 (Senate Bill No. 1473, Calderon)**

On September 30<sup>th</sup> of this year Governor Schwarzenegger signed SB 1473 into law. It will take effect on January 1, 2009. Among other things, the bill provides for the creation of the Building Standards Administration Special Revolving Fund, which is established in the State Treasury. Moneys deposited in this fund will come from a surcharge on both residential and non-residential building permits.

The bill requires that each city, county, and city and county collect a fee from an applicant for a building permit, assessed at the rate of four dollars (\$4) per one hundred thousand dollars (\$100,000) in valuation, with appropriate fractions thereof, but not less than one dollar (\$1). "Appropriate fractions thereof" is interpreted to be \$1 per every twenty-five thousand (\$25,000) in valuation per table illustrated below. Fees will be submitted quarterly to the California Building Standards Commission (CBSC), as follows:

Permit Valuation	Fee
\$1 – 25,000	\$1
\$25,001 – 50,000	\$2
\$50,001 – 75,000	\$3
\$75,001 – 100,000	\$4
Every \$25,000 or fraction thereof above \$100,000	Add \$1

In addition, SB 1473 provides that the city, county, or city and county may retain up to ten (10) percent of the fees collected for related administrative costs and for code enforcement education. The bill requires that the local jurisdiction transmit the remainder to CBSC for deposit in the Building Standards Administration Special Revolving Fund.

Once appropriated, moneys deposited in this fund will be available to CBSC, the Department of Housing and Community Development, and the Office of the State Fire Marshal for expenditure in carrying out the provisions of the State Building Standards Law and provisions of State Housing Law that relate to building standards. Emphasis is to be placed on the development, adoption, publication, updating, and educational efforts associated with green building standards.

Notification that the first quarter's fees will be due on April 15, 2009, and a reporting form for the first quarter beginning January 1, 2009, and ending March 31, 2009, will be distributed to each city, county, and city and county, and placed on CBSC's website at [www.bsc.ca.gov](http://www.bsc.ca.gov) in the first part of 2009. If you have any questions concerning this bulletin, please contact Jane Taylor, Senior Architect, by telephone at (916) 263-0807, or via email at [Jane.Taylor@dgs.ca.gov](mailto:Jane.Taylor@dgs.ca.gov).

## Building Valuation Data – FEBRUARY 2019

The International Code Council is pleased to provide the following Building Valuation Data (BVD) for its members. The BVD will be updated at six-month intervals, with the next update in August 2019. ICC strongly recommends that all jurisdictions and other interested parties actively evaluate and assess the impact of this BVD table before utilizing it in their current code enforcement related activities.

The BVD table provides the “average” construction costs per square foot, which can be used in determining permit fees for a jurisdiction. Permit fee schedules are addressed in Section 109.2 of the 2018 *International Building Code* (IBC) whereas Section 109.3 addresses building permit valuations. The permit fees can be established by using the BVD table and a Permit Fee Multiplier, which is based on the total construction value within the jurisdiction for the past year. The Square Foot Construction Cost table presents factors that reflect relative value of one construction classification/occupancy group to another so that more expensive construction is assessed greater permit fees than less expensive construction.

ICC has developed this data to aid jurisdictions in determining permit fees. It is important to note that while this BVD table does determine an estimated value of a building (i.e., Gross Area x Square Foot Construction Cost), this data is only intended to assist jurisdictions in determining their permit fees. This data table is not intended to be used as an estimating guide because the data only reflects average costs and is not representative of specific construction.

This degree of precision is sufficient for the intended purpose, which is to help establish permit fees so as to fund code compliance activities. This BVD table provides jurisdictions with a simplified way to determine the estimated value of a building that does not rely on the permit applicant to determine the cost of construction. Therefore, the bidding process for a particular job and other associated factors do not affect the value of a building for determining the permit fee. Whether a specific project is bid at a cost above or below the computed value of construction does not affect the permit fee because the cost of related code enforcement activities is not directly affected by the bid process and results.

### Building Valuation

The following building valuation data represents average valuations for most buildings. In conjunction with IBC Section 109.3, this data is offered as an aid for the building official to determine if the permit valuation is underestimated. Again it should be noted that, when using this data, these are “average” costs based on typical construction methods for each occupancy group and type of construction. The average costs include foundation work, structural and nonstructural

building components, electrical, plumbing, mechanical and interior finish material. The data is a national average and does not take into account any regional cost differences. As such, the use of Regional Cost Modifiers is subject to the authority having jurisdiction.

### Permit Fee Multiplier

Determine the Permit Fee Multiplier:

1. Based on historical records, determine the total annual construction value which has occurred within the jurisdiction for the past year.
2. Determine the percentage (%) of the building department budget expected to be provided by building permit revenue.
- 3.

$$\text{Permit Fee Multiplier} = \frac{\text{Bldg. Dept. Budget} \times (\%)}{\text{Total Annual Construction Value}}$$

### Example

The building department operates on a \$300,000 budget, and it expects to cover 75 percent of that from building permit fees. The total annual construction value which occurred within the jurisdiction in the previous year is \$30,000,000.

$$\text{Permit Fee Multiplier} = \frac{\$300,000 \times 75\%}{\$30,000,000} = 0.0075$$

### Permit Fee

The permit fee is determined using the building gross area, the Square Foot Construction Cost and the Permit Fee Multiplier.

$$\text{Permit Fee} = \text{Gross Area} \times \text{Square Foot Construction Cost} \times \text{Permit Fee Multiplier}$$

### Example

Type of Construction: IIB

Area: 1st story = 8,000 sq. ft.  
2nd story = 8,000 sq. ft.

Height: 2 stories

Permit Fee Multiplier = 0.0075

Use Group: B

1. Gross area:  
Business = 2 stories x 8,000 sq. ft. = 16,000 sq. ft.
2. Square Foot Construction Cost:  
B/IIB = \$175.70/sq. ft.
3. Permit Fee:  
Business = 16,000 sq. ft. x \$175.70/sq. ft x 0.0075  
= \$21,084

## Important Points

- The BVD is not intended to apply to alterations or repairs to existing buildings. Because the scope of alterations or repairs to an existing building varies so greatly, the Square Foot Construction Costs table does not reflect accurate values for that purpose. However, the Square Foot Construction Costs table can be used to determine the cost of an addition that is basically a stand-alone building which happens to be attached to an existing building. In the case of such additions, the only alterations to the existing building would involve the attachment of the addition to the existing building and the openings between the addition and the existing building.
- For purposes of establishing the Permit Fee Multiplier, the estimated total annual construction value for a given time period (1 year) is the sum of each building's value (Gross Area x Square Foot Construction Cost) for that time period (e.g., 1 year).
- The Square Foot Construction Cost does not include the price of the land on which the building is built. The Square Foot Construction Cost takes into account everything from foundation work to the roof structure and coverings but does not include the price of the land. The cost of the land does not affect the cost of related code enforcement activities and is not included in the Square Foot Construction Cost.
