The Recipient must continue with the responsibilities under this Agreement during any dispute. In the event of a dispute, the Recipient must file a "Notice of Dispute" with the CDFA Agreement Manager, identified in Exhibit A, or designee within ten (10) calendar days of discovery of the problem. Within ten (10) calendar days of receipt of the Notice of Dispute, the CDFA Agreement Manager or designee must meet with the Recipient for the purpose of resolving the dispute. In the event of a dispute, the language contained within this Agreement prevails.

14. Termination for Convenience

This Agreement may be terminated by either party upon written notice. Notice of termination must be delivered to the other party at least thirty (30) calendar days prior to the intended date of termination. Notice of termination does not nullify obligations already incurred prior to the date of termination. In the event of Termination for Convenience of this Agreement by CDFA, CDFA must pay all responsible costs and non-cancellable obligations incurred by the Recipient as of the date of termination.

15. Termination for Cause

Either party may terminate this Agreement for cause in the event of a material breach of this Agreement, provided that the non-breaching party provides written notice of the material breach and ten (10) calendar days to cure the breach. If the breach is not cured to the satisfaction of the non-breaching party within ten (10) calendar days of receipt of notice, this Agreement shall automatically terminate and the CDFA shall reimburse the Recipient for all documented costs incurred up to the date of the notice of termination, including all non-cancellable obligations.

16. Acceptable Failure to Perform

The Recipient shall not be liable for any failure to perform as required by this Agreement, to the extent such failure to perform is caused by any of the following: labor disturbances or disputes of any kind, accidents, or the inability to obtain any required government approval to proceed, civil disorders, acts of aggression, acts of God, energy or other conservation measures, failure of utilities, mechanical breakdowns, materials shortages, disease, pandemics, or similar occurrences.

The Recipient shall have ten (10) calendar days from receipt of the notice to cure the breach. If the Recipient fails to cure the breach within the time prescribed by this Agreement, CDFA may do any of the following:

- A. Suspend payments;
- B. Demand repayment of all funding;
- C. Terminate the Agreement; or
- D. Take any other action deemed necessary to recover costs.

If CDFA determines that the Recipient is not in material breach but that the Project is not being implemented in accordance with the provisions of this Agreement, or that the Recipient has failed in any other respect to comply with the provisions of this Agreement, and the Recipient has failed to remedy any such failure in a reasonable and timely manner, CDFA may withhold all or any portion of the grant funding and take any other action that CDFA deems necessary to protect its interests.

Where a portion of the grant funding has been disbursed to the Recipient and CDFA notifies the Recipient of its decision not to release funds that have been withheld pursuant to paragraph 17, the portion that has been disbursed shall thereafter be repaid immediately. CDFA may consider the Recipient's refusal to repay the requested disbursed amount a material breach.

If CDFA notifies the Recipient of its decision to withhold the entire funding amount from the Recipient pursuant to this paragraph, this Agreement shall terminate upon receipt of such notice by the Recipient and CDFA shall no longer be required to provide funds under this Agreement and the Agreement shall no longer be binding on either party.

PROJECT APPLICATION

Humboldt County Agricultural Commissioner's Office

I. Project Overview (FAC 7272.5)

Project Goals and Objectives (check all that apply):

- ☒ Increase the profitability and value of crop land and rangeland
- ☒ Decrease the costs of roadside, park, and waterway maintenance
- ☒ Reduce the fire hazard and fire control costs in the state
- ☒ Protect the biodiversity of native ecosystems
- ☒ Maintain the recreational and aesthetic value of open space, recreational, and public areas
- ☐ Increase water supply and flow

Project Activities (check all that apply):

- ☒ Operation of programs by the county agricultural commissioner for control of noxious weeds along county roads and other local government owned property
- ☐ Matching funds for control of noxious weeds on city owned streets, parks, rights-of-way, and other public areas
- ☒ Disseminating biological control agents by the county agricultural commissioner for the long-term control of yellow starthistle or other noxious weeds
- ☒ Abatement of noxious weed infestations on land vital to the success of the program

II. Project Plan

Weed Species to be Controlled: All weeds proposed for control funding under the CDFA 2021 Noxious Weed Grant Program are California Code of Regulations § 4500 listed noxious weed species and/or CDFA "A"-rated pests: **Japanese Knotweed** (*Fallopia japonica*), **Giant Knotweed** (*F. sachalinensis*), **Himalayan Knotweed** (*Periscaria wallichii*), **Shiny Geranium** (*Geranium lucidum*), **Tansy Ragwort** (*Jacobaea vulgaris*), and **Spotted Knapweed** (*Centaurea maculosa*). The weed control efforts proposed here are a continuation of work funded by a 2020 Noxious Weed Grant Program award from CDFA with the addition of Shiny Geranium (*Geranium lucidum*). Other noxious weeds may be added if funding allows.

Methodology:

Early Detection/Survey: Historic data on known noxious weed sites will be used to prioritize intensive visual surveys around these locations on county-controlled or other public lands for the presence and management of the species identified for control.

Mapping: All locations of identified noxious weed species will be GPS mapped creating point data as well as population polygons. Photos and additional descriptive site characteristics will be recorded for each site including: population distribution, and severity of infestation. Data will be uploaded to CalFlora and maintained in the department's permanent noxious weed database.

CEQA Compliance: CEQA compliance for the Redwood Community Action Agency Knotweed and Shiny Geranium (RCAA) Project has already been obtained through a Notice of Exemption (NOE) filed by the Wildlife Conservation Board (WCB). CEQA compliance for other weed management work covered by this grant will be provided before implementation of work.

Treatments: Treatments will be conducted by Agricultural Commissioner's Office staff. To increase efficiency, coordination with WMA partners or a contractor may be used. Species specific treatments are described in the project descriptions below. All sites treated under the grant will be revisited to document and evaluate control effectiveness. All planned control techniques are consistent with those recommended by the University of California Cooperative Extension.

Treatment events will be photo documented before and after when possible.

Location(s): Humboldt County

Weed Removal/Control Techniques(s): Control techniques will be dependent on species identified as described below:

Knotweeds and Shiny Geranium: The Commissioner's Office is working cooperatively with Humboldt Weed Management Group Member RCAA to treat populations of Shiny Geranium and three species of knotweed that occur in Humboldt County (Japanese Knotweed [*Fallopia japonica*], Giant Knotweed [*F. sachalinensis*], Himalayan Knotweed [*Periscaria wallichii*]). The Commissioner's Office is responsible for treating geranium and knotweed populations that occur on County property. This includes 2 known sites of Shiny Geranium and 17 knotweed sites. Sites will be treated by foliar applications of imazapyr using backpack sprayers. The Commissioner's Office will also conduct outreach with the intent of securing permission to treat knotweed infestations that occur on 17 additional sites owned by public entities and private individuals. The Wildlife Conservation Board (WCB) which funds RCAA's Knotweed and Geranium Project filed a Notice of Exemption for the Project in 2015. Humboldt's County Counsel has determined that cooperative activities performed by the Commissioner's Office under the project are covered by the WCB NOE. Humboldt County's efforts treating knotweed and geranium infestations on County property are offered as a cost share to RCAA under the WCB Knotweed and Geranium Project Grant. **Humboldt County receives no funding from the RCAA/WCB Knotweed and Geranium Project Grant.**

Tansy Ragwort: Significant areas of Humboldt County are infested with Tansy Ragwort including rangeland in the Bear River Valley. These areas are important to the livestock industry. Another impacted area is the wildlife sanctuary on Woodley Island in Humboldt Bay. Untreated, Tansy Ragwort threatens to displace native plants on the island and serve as a source population for seed dispersal around the Humboldt Bay region. Humboldt County staff will travel to Del Norte County to collect Tansy Flea beetle (*Longitarsus jacobaeae*) and Cinnabar moth (*Tyria jacobaeae*), depending on availability. Both are established biocontrol agents that have been used in the western US for decades to control Tansy Ragwort and are already present in the region in isolated populations. Rangeland infestations are treated with bio-control releases of Tansy Flea Beetles and Cinnabar Moths. Sensitive wildlife areas on Woodley Island will be treated by manual removal and distribution of bio-control organisms. For sites where manual removal is prescribed, plants will be bagged and heat treated after removal. If available in high enough numbers, biocontrol agents will be distributed to ranchers with known infestations on their property to directly aid these ranchers and to assist in establishing new populations of the biocontrol species.

Spotted Knapweed: Spotted knapweed occurs in widely spaced populations in gravel bars along the Mad River in Humboldt County. The infestations occur beginning approximately 3 miles upstream from the Mad River Fish Hatchery and continue downstream in locations favorable to Knapweed establishment. Agricultural Commissioner staff will survey the Mad River in the vicinity of known sites of infestation and remove Knapweed and other noxious weed species. Manually removed weeds will be bagged and heat treated to destroy any propagative plant parts.
