Word Limit: 500	<p>This grant would be used to help secure water storage that is necessary. In the past there wasn't any storage, in the past year I have secured 22,500 gallons in storage and am working on a total of 75,000 gallons in storage. The contour of the property doesn't allow for a pond to be utilized, so the safest and most secure was is through the use of rigid water storage containers. I am a small cultivar, roughly 11,141 square feet and this process of compliance has been incredibly expensive. I feel water storage is one of the most important parts of keeping nature and the ecosystems in balance and not depleting our resources when they are needed the most during a hot dry summer. This has been paid for all by myself and help with water storage would be greatly appreciated.</p>

## Resumen del formulario

Word Limit: 500	The water storage will help keep the nature and ecosystems in balance during the summer periods by not depleting a natural resource during times of need.
Word Limit 500	The project will help protect the environment by allowing the water to flow its natural course during times of summer. The water will be able to be collected and stored during winter time when there is ample amounts of water that can be stored and not have a negative impact on the natural bodies of water around
Word Limit: 500	I have already secured 22,500 gallons out of a goal of 75,000 gallons of storage. My goal is to get the water storage completed as soon as I can in order to increase the sustainability of the cultivation process.
Word Limit 250	This grant would help secure water storage which is very important for the cultivation process and the sustainability of this industry in Humboldt County In order to continue progressing in the sustainable direction this grant would be greatly appreciated and used toward securing water storage, something that is very important for all involved.
