All of these applications have been in process for an extended period of time, well over 4 years in every case, and have received correspondence from the Planning and Building Department identifying application deficiencies which prevent the Department from completing a review for consistency with the General Plan and County Code. On November 18, 2025, a final letter was sent to all of these applicants which provided two options, to submit a withdrawal request in writing, or provide the items requested by the County in previous communications. The letter further stated that a response was required within 30 days, and if a response was not received, the Planning Department would schedule the application for hearing with a recommendation of denial. To date, a request for withdrawal and/or none of the requested materials have been received by any of these applications.

The project history and project files associated with these permit applications demonstrate a lack of information required to determine consistency with the CMMLUO and a lack of responsiveness from the applicant.

OTHER AGENCY INVOLVEMENT:

Any referrals that may be associated with one or more of these projects are irrelevant, due to the recommendation of denial for lack of information and/or responsiveness.

ALTERNATIVES TO STAFF RECOMMENDATIONS:

1. The Zoning Administrator could elect to direct staff to continue to work with the applicants to resolve the outstanding issues and continue processing the applications in accordance with HCC Section 312-4.1 et seq. However, due to the extended amount of time that deficiencies have remained unresolved and the lack of responsiveness from the applicant, staff does not recommend this alternative.
