

1-18-22

Hi, I am writing this letter  
on behalf of Dennis Chase, who  
is my neighbor. My name is  
Bill Rector

I am writing this because of  
a response I had to a newspaper  
article about his legal grow, in  
the article was a part about gallons  
of water taken out of the ground for  
Agg use. I strongly oppose such use  
because our ground is a sponge,  
and in the article it said he would  
use two wells on property near a stream  
bed, had more wells, (I call them  
straws) that such act of our sponge  
use springs feed our streams and creeks  
suffer. Sence Humboldt leached, etc  
creek has dried up twice, Spring dead.

So I had opposed said agg. use,  
but sence I have learned that was not  
his intention. Dennis is using rain  
catchment I don't see a problem  
for him to do so. It doesn't take  
long to collect a million gallons  
of water and it doesn't suck out  
of the ground in the summer months  
I hope this letter answers the concerns  
of all involved

Sincerely William Rector
