4. PROPOSED COMMUNICATIONS FACILITIES ORDINANCE

Record Number PLN-2021-17452.

The proposed ordinance affects all unincorporated areas of Humboldt County. The purpose and intent of this Telecommunications Ordinance is to provide a uniform and comprehensive set of standards for the development, siting and installation of wireless telecommunications facilities. These standards do all the following: protect and promote the public health, safety and welfare of the residents of the unincorporated areas of Humboldt County; protect aesthetic values in accordance with the guidelines and intent of the Telecommunications Act of 1996; encourage siting in preferred locations to help preserve the County's rural character, including the protection of scenic, natural and cultural resources; and minimize the intrusion of these uses into residential areas. The proposed ordinance uses a tiered approach to permitting communication facilities: the lowest tier ("Tier 1") applies a streamlined permit process to easily allow telecommunication facilities least likely to have any impacts. Conversely, the highest tier ("Tier 3") requires a public review process through conditional use permits for projects most likely to have impacts. Since this is a public workshop, no action will be taken by the Planning Commission. Instead, the Planning Commission will be asked to take public comment and provide informal feedback that will be used to develop a public hearing draft for review by the Planning Commission at a later date.

Recommendation: Staff recommends the Planning Commission not hold a workshop on the Telecommunications Ordinance and instead hold a public hearing on February 3, 2022 when staff will present the ordinance and the Planning Commission will have an opportunity to make a recommendation to the Board of Supervisors. A separate notice will be published for the February 3 public hearing item.
