

Cultivation Plan Addendum for Parcel #210-072-009 / APP# 12468

[The following sections are modifications to the cultivation plan previously submitted for this application.]

Section 3.1 Water Management:

Water for cannabis cultivation is sourced from the existing 345,000 gallon rain catchment pond. The well is used for domestic purposes only. Existing water storage onsite includes the pond and 40,500 in water tanks bringing the total storage to 385,500 gallons. The applicant is proposing a new 70,000 gallon pond but so far has not needed the extra water.

Annual Water Use:

Jan	Feb	Mar	Apr	May	June
0	0	10,000	15,000	25,000	37,500
July	Aug	Sept	Oct	Nov	Dec
37,500	37,500	27,500	10,000	0	0

Total Water Use = 200,000 gallons
