An act to amend and repeal Sections 42281.5, 42282, 42282.1, and 42283.6 of, and to amend, repeal, and add Sections 42280, 42281, 42283, 42283.5, and 42284 of, the Public Resources Code, relating to solid waste.

LEGISLATIVE COUNSEL'S DIGEST

SB 1053, as amended, Blakespear. Solid waste: reusable grocery bags: standards: plastic film prohibition.

Existing law prohibits a store, as defined, from providing a single-use carryout bag, as defined, to a customer, with specified exceptions, including an exemption for bags used to contain unwrapped food. Existing law requires a reusable grocery bag sold by a store to a customer at the point of sale to be made by a certified reusable grocery bag producer and to meet specified requirements with regard to the bag's durability, material, labeling, heavy metal content, and, with regard to reusable grocery bags made from plastic film, recycled material content. Existing law prohibits a producer of reusable grocery bags

made from plastic film from selling or distributing those bags unless the producer is certified by a third-party certification entity, and provides proof of that certification and a certification fee to the department, as specified. Existing law also prohibits a store from selling or distributing a recycled paper bag at the point of sale unless the store makes that bag available for purchase for not less than \$0.10. Existing law defines “recycled paper bag,” in part, as a paper carryout bag that contains a minimum of 40% postconsumer recycled materials, except as provided, and meets other requirements. Existing law allows a retail establishment to voluntarily comply with these requirements, if the retail establishment provides the department with irrevocable notice.

This bill would, commencing January 1, 2026, revise and recast those provisions to, among other things, revise the single-use carryout bag exception to include a bag provided to a customer before the customer reaches the point of sale, that is designed to protect a purchased item from damaging or contaminating other purchased items in a checkout bag, or to contain an unwrapped food item, as specified. The bill would revise the definition of “recycled paper bag” to require it be made from a minimum of 50% postconsumer recycled materials on and after January 1, 2028, without exception. The bill would also *prohibit a store from providing a reusable grocery bag to a customer at the point of sale and would require a reusable grocery bag sold by a store to a customer at stocked or displayed for sale or distribution at a location other than the point of sale to meet different requirements, including that it not be made from plastic film material.* The bill would also repeal the provisions relating to certification of reusable grocery bags, and would repeal a provision relating to certain obsolete at-store recycling program requirements. The bill would make related conforming changes.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.
