

**RESOLUTION OF THE PLANNING COMMISSION  
OF THE COUNTY OF HUMBOLDT**

**Resolution Number 23-061**

**Record Number PLN-10656-CUP**

**Assessor's Parcel Numbers: 208-221-014**

**Resolution by the Planning Commission of the County of Humboldt certifying compliance with the California Environmental Quality Act and conditionally approves CaliDro LLC Conditional Use Permit**

**WHEREAS, CaliDro LLC** provided an application and evidence in support of approving 17,000 square feet of existing mixed light commercial cannabis cultivation supported by a 1,700 square foot ancillary nursery.

**Now, THEREFORE BE IT RESOLVED,** that the Planning Commission makes all the following findings:

- 1. FINDING**                      A Conditional Use Permit for 17,000 square feet of existing mixed-light commercial cannabis cultivation supported by a 1,700 square foot ancillary nursery. Irrigation water is provided by a well located on adjacent parcel 208-221-009. Estimated annual water usage is 185,000 gallons supported by 180,000 gallons of water storage consisting of a 30,000 gallon pond and 150,000 gallons of hard tanks. Onsite processing is proposed and electricity is sourced from two generators. The project includes onsite relocation of cultivation and restoration.

**EVIDENCE**            a) Project File: PLN-10656-CUP

- 2. FINDING**                      **CEQA:** The project complies with the requirements of the California Environmental Quality Act. The Humboldt County Planning Commission has considered the Mitigated Negative Declaration previously adopted for the Commercial Medical Marijuana Land Use Ordinance as well as the Addendum to the Mitigated Negative Declaration that was prepared for the CaliDro LLC project pursuant to Section 15164 of the CEQA guidelines.

- EVIDENCE**            a) Addendum Prepared for the proposed project.
- b) The parcel takes access from a private road which has been evaluated by an engineer which has made recommendations that are incorporated into the project.
- c) A disturbed area stabilization plan has been created for the grading and incorporated into the project.
- d) A well evaluation determined no impact to the Mad River or nearby springs. The well be subject to forbearance.

## **FINDINGS FOR CONDITIONAL USE PERMIT**

- 3. FINDING** The proposed development is in conformance with the County General Plan, Open Space Plan, and the Open Space Action Program.
- EVIDENCE**
- a) The parcel has a designation of Residential Agriculture (RA). The proposed project is covered by the Open Space Action Program because the project site includes streamside management areas. The proposed cannabis cultivation, an agricultural product, is within land planned and zoned for agricultural purposes, consistent with the use of Open Space land for managed production of resources. Therefore, the project is consistent with and complimentary to the Open Space Plan and its Open Space Action Program.
- 4. FINDING** The proposed development is consistent with the purposes of the existing Forestry Recreation (FR) zone in which the site is located.
- EVIDENCE**
- a) General agricultural uses are principally permitted in FR zone.
  - b) The location of all project elements meets the setback requirements for the FR Zone.
- 5. FINDING** The proposed development is consistent with the requirements of the CMMLUO Provisions of the Zoning Ordinance.
- EVIDENCE**
- a) The CMMLUO allows existing cannabis cultivation to be permitted in areas zoned FR (HCC 314-55.4.8.2.2).
  - b) The parcel was created in compliance with all applicable state and local subdivision regulations. The subject parcel has been determined to be one legal parcel (lot 51) as shown on Record of Survey in Book 26 of Surveys page 135.
  - c) The project will obtain water from a groundwater well, an eligible water source.
  - d) The parcel is accessed from a private road that an engineer has certified will function equivalent to category 4 if improvements are made. The engineer's recommendations have been incorporated into the project.
  - e) No new grading is proposed and after the fact grading permits are required for the violations.
  - f) The location of the cultivation complies with the setbacks required in Section 314-55.4.6.4.4.
- 6. FINDING** The commercial cannabis cultivation and the conditions under which it may be operated or maintained will not be detrimental to the public health, safety, or welfare or materially injurious to properties or improvements in the

vicinity.

- EVIDENCE**
- a) The project is conditioned to make road improvements recommended by an engineer so the road functions equivalent to a category 4.
  - b) The proposed project will not be in a location where there is an established neighborhood or other sensitive receptor such as a school, church, park, or other use which may be sensitive to cannabis cultivation. Continuing cultivation on this site will not change the character of the area due to the historic and current uses in the area.
  - c) The location of the proposed cannabis cultivation is more than 300 feet from the nearest off-site residence.
  - d) Irrigation water is sourced from a well that has been evaluated by a hydrologist which concluded there will be no impact to the Mad River or nearby springs.
  - e) Provisions have been made in the applicant's proposal to protect water quality and thus runoff to adjacent property and infiltration of water to groundwater resources will not be affected.

- 7. FINDING**
- The proposed development does not reduce the residential density for any parcel below that utilized by the Department of Housing and Community Development in determining compliance with housing element law.

- EVIDENCE**
- a) The parcel was not included in the housing inventory of Humboldt County's 2019 Housing Element but does have the potential to support one housing unit. The approval of cannabis cultivation on this parcel will not conflict with the ability for a residence to be constructed on this parcel.

- 8. FINDING**
- Approval of this project is consistent with Humboldt County Board of Supervisors Resolution No. 18-43 which established a limit on the number of permits and acres which may be approved in each of the County's Planning Watersheds.

- EVIDENCE**
- a) The project site is in the Mad River Watershed, which under Resolution 18-43 is limited to 334 permits and 115 acres of cultivation. With the approval of this project the total approved permits for cultivation in this Planning Watershed would be 74 permits and the total approved acres would be 27.48 acres of cultivation.

## DECISION

**NOW, THEREFORE**, based on the above findings and evidence, the Humboldt County Planning Commission does hereby:

- Adopt the findings set forth in this resolution; and
- Conditionally approves the Conditional Use Permit for **CaliDro LLC** subject to the conditions of approval attached hereto as Attachment 1A and the Cultivation Operations Plan attached hereto as Attachment 1B and Site Plan attached hereto as Attachment 1C.

Adopted after review and consideration of all the evidence on **July 6, 2023**.

The motion was made by COMMISSIONER Lonyx Landry and second by COMMISSIONER Brian Mitchell and the following ROLL CALL vote:

AYES: COMMISSIONERS: Iver Skavdal, Noah Levy, Lonyx Landry, Peggy O'Neill,  
Brian Mitchell, Sarah West

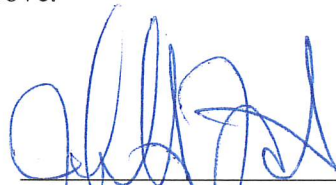

NOES: COMMISSIONERS:

ABSENT: COMMISSIONERS: Thomas Mulder

ABSTAIN: COMMISSIONERS:

DECISION: Motion Carries 6/0/1

I, John H. Ford, Secretary to the Planning Commission of the County of Humboldt, do hereby certify the foregoing to be a true and correct record of the action taken on the above-entitled matter by said Commission at a meeting held on the date noted above.

John H. Ford, Director  
Planning and Building Department

## Conditions of Approval

### APPROVAL OF THE CONDITIONAL USE PERMIT IS CONDITIONED ON THE FOLLOWING TERMS AND REQUIREMENTS.

**A. Conditions subject to the compliance agreement must be satisfied before the provisional cannabis cultivation permit is no longer considered provisional. This section also includes conditions that must be completed within specified time frames or completed prior to commencing cultivation.**

1. Within 60 days of the effective date of permit approval, the permittee shall execute a Compliance Agreement with the Humboldt County Planning and Building Department described under Conditions of Approval A13 through A16. All activities described in the agreement must be completed to the satisfaction of the Planning and Building Department before the permit may be finalized and no longer considered provisional.
2. Within 60 days of the effective date of permit approval, the permittee shall provide an updated site plan that is complete and accurate. The updated site plan shall include all constructed and natural features. For example, the site plan must show the location of the 30,000-gallon pond and parking spaces, including an ADA space for the processing building.
3. Within 60 days of the effective date of project approval, the permittee shall execute and file with the Planning Division the statement titled, "Notice and Acknowledgment regarding Agricultural Activities in Humboldt County," ("Right to Farm" ordinance) as required by the HCC and available at the Planning and Building Department.
4. Within 60 days of the effective date of project approval, the permittee shall obtain a will serve letter from the Fire Protection District OR cause to be recorded an "ACKNOWLEDGMENT OF NO AVAILABLE EMERGENCY RESPONSE AND FIRE SUPPRESSION SERVICES" for the parcel(s) on a form provided by the Humboldt County Planning Division. Document review fees as set forth in the schedule of fees and charges as adopted by ordinance of the Humboldt County Board of Supervisors will be required.
5. Within six months of the effective date project approval, permittee shall demonstrate enrollment in the current State Water Board Order and provide a copy of the Notice of Applicability and a Site Management Plan.
6. No later than January 1, 2026, the permittee will develop and fully implement an alternative renewable energy (i.e., solar, wind, micro-hydro) plan for electricity serving the cannabis operation such that generator use may be reserved for emergency use only.
7. Prior to commencing cultivation, the permittee shall provide documentation demonstrating that adequate water has been stored to serve the water needs during the forbearance period (See also Condition B1).
8. Prior to installing the water lines to the well and the proposed water storage tanks, the permittee shall provide a biological assessment conducted by a qualified professional to determine if any sensitive or ranked species such as but not limited to Bolander's catchfly (*Silene bolanderi*) or natural communities will be impacted. If any species are found, the assessment shall provide

recommendations for mitigations such as, but not limited to, buffer zones. The assessment must be reviewed and authorized by the Planning and Building Department before construction and installation may occur.

9. Prior to cultivating in greenhouses one through three, the grading in the riparian buffer must be remedied and a stormwater plan provided that directs surface flow away from the channel. The stormwater plan and grading remediation must be reviewed and approved by the county prior to cultivating in this area.
10. Prior to utilizing the well for irrigation water, the permittee must provide documentation from CDFW demonstrating that use, access, and maintenance of the well on parcel 208-221-009 is consistent with the issued LSAA for that property.
11. Prior to cultivation resuming, the permittee must schedule and receive a post approval inspection to verify that no trash or non-native soils or perlite are migrating toward the Mad River and have been removed to the extent practicable. The inspection must evaluate all historic, expansion, as well as current cultivation areas. In addition to the annual inspection a second random inspection shall occur yearly for a minimum of three years. This inspection shall include coordination with CDFW and shall occur at the permittee's expense. The second annual inspection shall occur each year until three years have passed with no noted corrective actions.
12. The historic, decommissioned cultivation area shall be restored. In addition to the removal of all non-native soils and cannabis infrastructure as described in the operations plan, the permittee shall follow the planting protocols described in the February 2023 restoration plan. Additionally, the restoration shall also include a native grass seed mix for erosion control as well as a three-year monitoring period once the restoration is implemented. The plantings must meet an 85% survival rate at the end of the three-year monitoring period. If the survival rate criteria are not met, additional plantings must occur and an additional three-year monitoring period will be required.
13. The permittee shall obtain grading permits for all existing, unpermitted grading associated with the cannabis operation. This includes is not limited to grading for cultivation areas, roads, and the pond. No new grading is authorized.
14. The permittee shall obtain permits or exemptions for all structures associated with the cannabis operation.
15. The permittee shall implement all the recommendations and scope of work described in the October 2021 Disturbed Ara Stabilization Plan conducted by Pacific Watershed and Associates.
16. The permittee shall take action to form or join a Road Maintenance Association (RMA) for the maintenance of the roads. In the event the applicant is unable to coordinate formation or join an RMA, the permittee shall pay fair-share cost for maintenance of the road to any road user engaged in maintaining the roads. The permittee shall take action to implement the recommendations in the road evaluation. The specific work includes but is not limited to:
  - a. Construct three (3) turnouts.
  - b. Repair several road sections that have been impacted by slides.
  - c. Clear and maintain nearly all culverts.
  - d. Construction of six (6) additional roadside ditches to channel water flow.

- e. General maintenance including mowing vegetation along the roadside and clearing roadside ditches.
- 17. Project approval is for two generators located in the cultivation areas as depicted on the site plan. The barn is associated with the cannabis project and may not receive power from a third generator and is too far to connect safely to authorized generators.
- 18. As noted on the site plan, the cabin is for domestic use only and is not associated with the cannabis operation in any way. Utilizing the cabin for the cannabis operation will require a permit modification.
- 19. The permittee shall not deviate from the activities and uses described in the approved operations plan and site plan without prior approval from the Planning and Building Department.

## **B. General Conditions**

- 1. The irrigation well is subject to forbearance and cannot be used between May 15 and October 15 for cannabis irrigation.
- 2. There shall be no interconnectivity between cannabis irrigation water infrastructure (e.g., water lines, tanks, etc.) and any other water source.
- 3. Cultivation activities will be supported by portable toilets. The permittee may install a permitted septic system in association with a permitted structure (e.g. processing building) to provide wastewater services to cultivation employees.
- 4. Processing in the form of trimming and/or packaging will occur offsite at a licensed facility until a building is permitted allowing F-1 commercial occupancy and has a permitted septic system.
- 5. Any water lines crossing stream channels must stay out of stream channels and be elevated when crossing and cross at a perpendicular angle.
- 6. A Notice of Determination (NOD) will be prepared and filed with the County Clerk for this project in accordance with the State CEQA Guidelines. The Department will file the NOD and the applicant is responsible for this cost to the project.
- 7. The applicant is responsible for obtaining all necessary County and State permits and licenses, and for meeting all requirements set forth by other regulatory agencies.
- 8. The applicant shall be compliant with the County of Humboldt's Certified Unified Program Agency (CUPA) requirements regarding hazardous materials. A written verification of compliance shall be required before any provisional permits may be finalized. Ongoing proof of compliance with this condition shall be required at each annual inspection to keep the permit valid.
- 9. The applicant is required to pay for permit processing on a time and material basis as set forth in the schedule of fees and charges as adopted by ordinance of the Humboldt County Board of Supervisors. The Planning and Building Department will provide a bill to the applicant after the decision. All outstanding planning fees to cover the processing of the application to decision by the Hearing Officer shall be paid to the Humboldt County Planning Division, 3015 "H" Street, Eureka.

10. The applicant is responsible for costs for post-approval review for determining project conformance with conditions. A deposit is collected to cover this staff review. Permit conformance with conditions must be demonstrated prior to release of building permit or initiation of use and at time of annual inspection. A conformance review deposit as set forth in the schedule of fees and charges as adopted by ordinance of the Humboldt County Board of Supervisors (currently \$750) shall be paid within sixty (60) days of the effective date of the permit or upon filing of the Compliance Agreement (where applicable), whichever occurs first. Payment shall be made to the Humboldt County Planning Division, 3015 "H" Street, Eureka.
11. The applicant shall install and utilize a water meter on all irrigation sources to demonstrate that there is sufficient water supply to meet the demands of the project. The water use for cultivation is limited to the use of the irrigation infrastructure described in the Operations Plan. The applicant will maintain logs of water usage and make the logs available upon request.

**C. Ongoing Requirements/Development Restrictions Which Must be Satisfied for the Life of the Project**

1. If cultural resources are encountered during construction activities, the contractor on site shall cease all work in the immediate area and within a 50-foot buffer of the discovery location. A qualified archaeologist and the appropriate Tribal Historic Preservation Officer(s) are to be contacted to evaluate the discovery and, in consultation with the applicant and the lead agency, develop a treatment plan in any instance where significant impacts cannot be avoided. Prehistoric materials may include obsidian or chert flakes, tools, locally darkened midden soils, ground-stone artifacts, shellfish or faunal remains, and human burials. If human remains are found, California Health and Safety Code 7050.5 requires that the County Coroner be contacted immediately at 707-445-7242. If the Coroner determines the remains to be Native American, the Native American Heritage Commission will then be contacted by the Coroner to determine appropriate treatment of the remains pursuant to Public Resources Code (PRC) Section 5097.98. Violators shall be prosecuted in accordance with PRC Section 5097.99.
2. The combination of background, generator and greenhouse fan or other operational equipment created noise must not result in the harassment of Northern Spotted Owl species as required to meet the performance standards for noise set by Department Policy Statement No. 16-005. The combined noise levels measured at 100 feet or the edge of habitat, whichever is closer, shall be at or below 50 decibels. Conformance will be evaluated using current auditory disturbance guidance prepared by the United State Fish and Wildlife Service, and further consultation where necessary. A building permit shall be obtained should any structures be necessary for noise attenuation.
3. All artificial lighting shall be fully contained within structures such that no light escapes (e.g., through blackout curtains). Structures shall be shielded between 30 minutes prior to sunset and 30 minutes after sunrise to prevent disruption to crepuscular wildlife. Security lighting shall be motion activated and comply with the International Dark-Sky Association standards and Fixture Seal of Approval Program. Standards include but are not limited to the following, 1) light shall be shielded and downward facing, 2) shall consist of low-pressure sodium (LPS) light or low spectrum light emitting diodes with a color temperature of 3000 kelvins or less and 3) only placed where needed.
4. Should the Humboldt County Planning Division receive complaints that lighting or noise is not complying with the standards listed above in this permit, within ten (10) working days of receiving

written notification that a complaint has been filed, the applicant shall submit written verification that the light shielding and alignment, and noise levels have been repaired, inspected, and corrected as necessary.

5. The use of monofilament netting for all uses, including but not limited for erosion control, shall be prohibited. Geotextiles, fiber rolls, and other erosion control measure materials shall be made of loose-weave mesh, such as jute, hemp, coconut (coir) fiber, or other products without welded weaves to minimize the risk of ensnaring and strangling wildlife.
6. All refuse shall be contained in wildlife proof containers, always, and relocated to an authorized waste management facility, in compliance with State and local laws, on a regular and on-going basis.
7. Should any wildlife be encountered during work activities, the wildlife shall not be disturbed and be allowed to leave the work site unharmed.
8. The use of anticoagulant rodenticide is prohibited.
9. The operator shall provide information to all employees about the potential health impacts of cannabis use on children. Information shall be provided by posting the brochures from the Department of Health and Human Services titled "Cannabis Palm Card" and "Cannabis Rack Card." This information shall also be provided to all employees as part of the employee orientation.
10. All components of the project shall be developed, operated, and maintained in conformance with the Project Description, the approved Site Plan, the Plan of Operations, the CMMLUO, and these conditions of approval.
11. If operating pursuant to a written approved compliance agreement, permittee shall abate or cure violations at the earliest feasible date, but in no event no more than two (2) years from the date of issuance of a provisional clearance or permit. Permittee shall provide plans for curing such violations to the Planning and Building Department within one (1) year of issuance of the provisional clearance or permit. If good faith effort toward compliance can be shown within the two years following the issuance of the provisional clearance or permit, the Department may, at the discretion of the Director, provide for extensions of the provisional permit to allow additional time to meet the outstanding requirements.
12. Compliance with all statutes, regulations, and requirements of the California State Water Resources Control Board and the Division of Water Rights, at a minimum to include a statement of diversion of surface water from a stream, river, underground stream, or other watercourse required by Water Code Section 5101, or other applicable permit, license, or registration, as applicable.
13. Confinement of the area of cannabis cultivation, processing, manufacture, or distribution to the locations depicted on the approved site plan. The commercial cannabis activity shall be set back at least 30 feet from any property line, and 600 feet from any school, school bus stop, church or other place of religious worship, or tribal cultural resources, except where a reduction to this setback has been approved pursuant to Section 55.4.11(d).
14. Applicant must adhere to and implement the Site Management Plan. A copy of the reporting form portion of the Mitigation and Reporting Program (MRP) shall be submitted to the Planning and Building Department upon request.

15. Applicant must demonstrate and maintain enrollment in Tier 1 or 2 in accordance with State Water Resources Control Board Order No. WQ 2019-0001-DWQ, or any substantially equivalent rule that may be subsequently adopted by the County of Humboldt or other responsible agency.
16. Comply with the terms of any applicable Lake and Stream Alteration (1600 or 1602) Permit obtained from the California Department of Fish and Wildlife (CDFW).
17. Comply with the terms of a less-than-3-acre conversion exemption or timberland conversion permit, approved by the California Department of Forestry and Fire Protection (Cal Fire), if applicable.
18. Consent to an annual on-site compliance inspection, with at least 24 hours prior notice, to be conducted by appropriate County officials during regular business hours (Monday through Friday, 9:00 a.m. to 5:00 p.m., excluding holidays).
19. Refrain from the improper storage or use of any fuels, fertilizer, pesticide, fungicide, rodenticide, or herbicide.
20. Pay all applicable application, review for conformance with conditions and annual inspection fees.
21. Fuel shall be stored and handled in compliance with applicable state and local laws and regulations, including the County of Humboldt's Certified Unified Program Agency (CUPA) program, and in such a way that no spillage occurs.
22. The master log books maintained by the applicant to track production and sales shall be maintained for inspection by the County.
23. Pay all applicable taxes as required by the Humboldt County Commercial Marijuana Cultivation Tax Ordinance (Humboldt County Code Section 719-1 et seq.).

Performance Standards for Cultivation and Processing Operations

24. Pursuant to Business and Professions Code section 26051.5(a)(8), an applicant seeking a cultivation license shall "provide a statement declaring the applicant is an 'agricultural employer,' as defined in the Alatorre-Zenovich-Dunlap-Berman Agricultural Labor Relations Act of 1975 (Part 3.5 commencing with Section 1140) of Division 2 of the Labor Code), to the extent not prohibited by law."
25. Cultivators shall comply with all applicable federal, state, and local laws and regulations governing California Agricultural Employers, which may include federal and state wage and hour laws, Cal/OSHA, OSHA, the California Agricultural Labor Relations Act, and the Humboldt County Code (including the Building Code).
26. Cultivators engaged in processing shall comply with the following Processing Practices:
  - a. Processing operations must be maintained in a clean and sanitary condition including all work surfaces and equipment.
  - b. Processing operations must implement protocols which prevent processing contamination and mold and mildew growth on cannabis.

- c. Employees handling cannabis in processing operations must have access to facemasks and gloves in good operable condition as applicable to their job function.
- d. Employees must wash hands sufficiently when handling cannabis or use gloves.

27. All persons hiring employees to engage in commercial cannabis cultivation and processing shall comply with the following Employee Safety Practices:

- a. Cultivation operations and processing operations must implement safety protocols and provide all employees with adequate safety training relevant to their specific job functions, which may include:
  - (1) Emergency action response planning as necessary;
  - (2) Employee accident reporting and investigation policies;
  - (3) Fire prevention;
  - (4) Hazard communication policies, including maintenance of material safety data sheets (MSDS);
  - (5) Materials handling policies;
  - (6) Job hazard analyses; and
  - (7) Personal protective equipment policies, including respiratory protection.
- b. Cultivation operations and processing operations must visibly post and maintain an emergency contact list which includes at a minimum:
  - (1) Operation manager contacts;
  - (2) Emergency responder contacts; and
  - (3) Poison control contacts.
- c. At all times, employees shall have access to safe drinking water and toilets and handwashing facilities that comply with applicable federal, state, and local laws and regulations. Plumbing facilities and water source must be capable of handling increased usage without adverse consequences to neighboring properties or the environment.
- d. On site-housing provided to employees shall comply with all applicable federal, state, and local laws and regulations.

28. All cultivators shall comply with the approved processing plan as to the following:

- a. Processing practices
- b. Location where processing will occur
- c. Number of employees, if any
- d. Employee Safety Practices
- e. Toilet and handwashing facilities
- f. Plumbing and/or septic system and whether or not the system is capable of handling increased usage
- g. Drinking water for employees
- h. Plan to minimize impact from increased road use resulting from processing
- i. On-site housing, if any

29. Term of Commercial Cannabis Activity Permit. Any Commercial Cannabis Cultivation permit issued pursuant to the CMMLUO or CCLUO shall expire one (1) year after date of issuance, and on the anniversary date of such issuance each year thereafter, unless an annual compliance inspection has been conducted and the permittees and the permitted site have been found to comply with all conditions of approval.

30. Inspections. If the inspector or other County official determines that the permittees or site do not comply with the conditions of approval, the inspector shall serve the permit holder with a written statement identifying the items not in compliance, and the action that the permit holder may take to cure the noncompliance or file an appeal within ten (10) days of the date that the written statement is delivered to the permit holder. Personal delivery or mailing the written statement to the mailing address listed on the application by regular mail, plus three (3) days after date of mailing, shall constitute delivery. The permit holder may request a reinspection to determine whether or not the permit holder has cured all issues of noncompliance. Failure to request reinspection or to cure any items of noncompliance shall terminate the Permit, immediately upon the expiration of any appeal period, or final determination of the appeal if an appeal has been timely filed.

The permit holder and subject property owner are to allow the County or representative(s) or designee(s) to make inspections at any reasonable time deemed necessary to assure that the activities being performed under the authority of this permit are in accordance with the terms and conditions prescribed herein.

31. Permit Renewals to Comply with Updated Laws and Regulations. Permit renewal is subject to the laws and regulations effective at the time of renewal, which may be substantially different than the regulations currently in place and may require the submittal of additional information to ensure that new standards are met.
32. Acknowledgements to Remain in Full Force and Effect. Permittee acknowledges that the County reserves the right to reduce the size of the area allowed for cultivation under any clearance or permit issued in accordance with this section in the event that environmental conditions, such as a sustained drought or low flows in the watershed in which the cultivation area is located, will not support diversions for irrigation.
33. Transfers. Transfer of any leases or permits approved by this project is subject to the review and approval of the Planning Director for conformance with CMMLUO eligibility requirements and agreement to permit terms and acknowledgments. The fee for required permit transfer review shall accompany the request. The request shall include the following information:
- Identifying information for the new owner(s) and management as required in an initial permit application;
  - A written acknowledgment by the new owner in accordance as required for the initial permit application;
  - The specific date on which the transfer is to occur;
  - Acknowledgement of full responsibility for complying with the existing permit; and
  - Execution of an Affidavit of Non-diversion of Medical Cannabis.

#### **Informational Notes:**

- Per Section 1273.03 of State Fire Safe Regulations: (a) At no point shall the grade for all roads and driveways exceed 16 percent; (b) The grade may exceed 16%, not to exceed 20%, with approval from the County of Humboldt Planning & Building Department with mitigations, such as paving, to provide for the same practical effect.
