I'm sure everyone is saying what we all feel but legacy farms are on their last leg, last year, last dime...it's for real now. Please understand and consider what the county and state has done, and please amend.

Thank you,

Taxes are paid by healthy businesses, not struggling businesses that are dying

Hi, my name is Aaron And I am writing this email today opposing measure S in its entirety. In my opinion it has inge-handedly taken down the cannabis industry and Humboldt County. Not to mention local farmers who had to leave the area because they couldn't afford to live here anymore. Top of all that it's against the California and United States Constitution to tax is on our land because we're conducting business on it there's not any other farm Industry that gets taxed on using their land to farm a commodity. I don't know how we're any different

Please vote to keep small cannabis farming in Humboldt, and give it a chance to be ever so slightly competitive state-wide.

BOS,

Thank you for your time and service. Thanks for your consideration of correcting this flawed Measure S tax. I am one of the owners of Source Nursery in Arcata. Cannabis farmers who are required to pay measure S tax are my customers. As I'm sure you know, there aren't a ton of them left compared to when measure S was drafted. Not repealing this tax permanently, will just be another blow to the few customers I have left. The market can't support specialty cannabis only taxes. Please treat (and tax) cannabis the same as all other forms of agriculture in our county.

Dear Board of Supervisors,

We support the immediate **repeal of Measure S by ordinance, Option 1 as outlined in the staff report.** With the crash of the cannabis sector over the past several years and the difficulty with implementation, the impacts of Measure S have proven detrimental to the potential economic growth the cannabis sector was expected to deliver. Repealing Measure S keeps more legal businesses alive—which strengthens the tax base across the board.

Thank you for your consideration.
