LAND USE DIVISION INTEROFFICE MEMORANDUM

TO: Rodney Yandell, Planner, Planning & Building Department

FROM: Kenneth Freed, Assistant Engineer 

DATE: 12/13/2023

RE: **GARBERVILLE CSD, APN 032-135-002 ET AL, PLN-2023-18803**

The project is to replace existing failing water tanks and construct new supporting infrastructure (i.e. watermain) in various locations on County maintained and non-County maintained roadways within Garberville.

ROADS: Alderpoint Road (County Road No. F6B165), Arthur Road (#6B161), and Wallan Road (#6B166) are paved County maintained road without pedestrian facilities. Redwood Drive (#C6B105) and Pine Street (#6B132) are developed to urban standards with pedestrian facilities.

SITE PLAN: The Department is using a preliminary construction plan submittal by SHN Engineering titled “Garberville Sanitary District – Robertson/Wallan/Hurlbutt Tanks Replacement Project”, dated September 2023, stamped received by Humboldt County Planning on November 9, 2023. The Department cannot comment on location of staging areas, traffic control requirements, traffic signage until submittal of a traffic control plan.

Our review of this project is limited to what is shown on the submitted plot plan. If other facilities not shown on the plot plan will be constructed, contact this Department immediately for approval **before** construction. This Department has regulations regarding facilities such as retaining walls, fence site visibility, drainage culverts, and parking lanes within the County right of way. This Department has included general statements for facilities that may not be included on the plot plan.

The Departments recommended conditions of approval are as follows:

1. **Encroachment Permit:** Applicant must apply for and obtain an encroachment permit for all work performed within the County road right of way including but not limited to removal and replacement of water mains within the County maintained road right of ways of Alderpoint Road and Redwood Drive. In addition, an encroachment permit is required to provide an ADA compliant urban driveway apron and surfaced driveway to County standards [reference: County Code §411-11 (a)(b)].

2. **Traffic Control Plan:** Permittee shall be responsible for all traffic control and safety at all work locations in a manner satisfactory to the Department of Public Works. Traffic control operations shall conform to **California Manual on Uniform Traffic Control Devices for Streets and Highways** (FHWA's MUTCD 2009 Edition, as amended for use in California), March 30, 2021, or latest edition, and to the satisfaction of the Department of Public Works. Warning and flagging of motorists at work locations shall be conducted **AT ALL TIMES** by properly trained personnel.

Permittee shall use Caltrans 2022 Standard Plan T13 with T9 for a traffic control plan, when applicable, for closing one traffic lane. Permittee shall use CAMUTCD Figure 6H-6, Titled "Shoulder Work with Minor Encroachment (TA-6)", when applicable, for working outside of the travelway and not affecting normal vehicle traffic.

Conditions requiring a traffic control plan other than Caltrans T13 with T9 or Fig 6H-6 will require submittal and Public Works approval of a traffic control plan prepared by a Registered Civil Engineer (or Traffic Engineer). Traffic control shall be conducted in a manner that provides the least inconvenience to motorists as possible. Emergency vehicles shall be allowed to pass through the controlled areas at all times. One travel lane shall be available for through traffic at all times. Permittee shall notify the Department of Public Works 48 hours prior to conducting any traffic control that requires closures of both travel lanes for longer than 5 minutes. Closure of both travel lanes for longer than 5 minutes requires prior written approval by the Director of Public Works. The California Highway Patrol and the Humboldt County Sheriff's Office shall also be notified of any traffic control that requires closure of both travel lanes at least 48 hours in advance.

3. **Storm Water Quality:** Storm Drain inlets tributary to the work area shall be protected from storm water pollution. The discharge of non-storm water (flushing of the new water lines) into the County storm drain system will require approval from the State of California Water Quality Control Board.
4. **Construction plans:** Unless otherwise approved in writing by the Department all watermain and waterlines not in use shall be removed from the public right of way. Construction plans shall state whether the existing water main is to be removed or abandoned in place (if approved by the Department). If the line is to be abandoned in place, the line shall be slurry filled and the construction plans shall clearly show the location of the line.
5. **Access Roads:** Intersections of utility access roads with the County maintained road shall be surfaced to County standards. Intersections of abandoned utility access roads shall be blocked and returned to natural conditions.
6. Site visibility must be maintained at all construction entrances and utility access locations with County maintained roads. [reference: County Code §341-1 et seq.]
7. Applicant shall be responsible to correct any involved drainage problems on the County road as a direct result of the project to the satisfaction of this Department. Applicant shall minimize the transport of sediment to drainage courses during construction. County Inspector shall be notified by applicant for review and approval of installed erosion control measures within County right of way.

8. During construction, roadways shall be periodically cleaned of mud, soil, rock, and debris. California Storm Water Quality Association (CASQA) BMPs shall be used to prevent the tracking of material onto County roads. The following BMPs shall be used at a minimum: stone wash pad; rumble racks; sweeping roads on a daily basis.
9. No construction materials or debris shall be placed within the County road right of way during the project, unless permitted through an encroachment permit. All fueling, equipment maintenance, staging, and construction management shall be located **outside** the County road right of way.
