DISCUSSION:

Adverse Childhood Experiences (“ACEs”) are defined as traumatic or stressful events, including, without limitation, abuse, neglect, violence and dissolution of familial stability, experienced by children. These traumatic experiences can affect an individual throughout their life. Such events are strong predictors of long-lasting behavioral health problems that can impact social development, family life, education, occupation productivity and physical health. Prevention, early identification and the development of a support system for children who are subjected to ACEs could have a significant impact on the range of potential health problems experienced thereby.

The Humboldt County Department of Health and Human Services - Behavioral Health (“DHHS - Behavioral Health”) and First 5 Humboldt partnered in 2017 to form the ACEs Collaborative for the purpose of addressing ACEs through the provision of education, mitigation and prevention services. On June 25, 2017, the Board approved General Fund allocations to DHHS - Behavioral Health in the amount of Four Hundred Thousand Dollars (\$400,000.00) annually to support collaboration with local community-based organizations in order to reduce the number of ACEs occurring within Humboldt County.

The attached application package and collaborative partnership agreement templates will enable DHHS - Behavioral Health and First 5 Humboldt to award Two Hundred Thousand Dollars (\$200,000.00) to community-based organizations that are working with pregnant women and children zero (0) to eight (8) years of age, and their families, to address, prevent and mitigate the effects of ACEs within Humboldt County for the period of July 1, 2024 through June 30, 2025. The review and approval process regarding requests for collaborative partnership agreements will be led by DHHS - Behavioral Health and First 5 Humboldt staff who have expertise pertaining to ACEs and are not affiliated with any community-based organizations who have submitted such requests.
