

HAZARDOUS MATERIALS PLAN

HONEYDEW RANCH, LLC

App # 12256

APN# 107-272-005

Honeydew Ranch, LLC has trained each employee on how to safely use the hazardous materials associated with the cultivation of cannabis. Employees will call 911 if any accident occurs onsite and one employee will meet the emergency services at the corner of Old Hindley Ranch road and Mattole Road. Safety training has been implemented for all employees for emergency purposes such as a spill or contamination of an employee. Material Safety Data Sheets are available on-site for all materials used for Honeydew Ranch and are located inside the Pesticide and Nutrient Storage Area.

The following hazardous materials are used at Honeydew Ranch, LLC

- 1) Gas and oil are stored inside the 8'x20' storage container which have a spill kit, eye wash station, and a fire extinguisher located inside in case of an emergency. Eye protection and gloves are used when handling gas and oil.
- 2) Diesel is stored in a 500-gallon tank with a secondary containment basin located in a secure structure by the AG exempt barn. Employees use eye protection and gloves when using diesel, fire extinguishers, spill kits, and eye wash stations are located inside the structure in case of an emergency.
- 3) Nutrients, Pesticides, and PH up/down are located inside the 600 SF structure identified as the "Nutrient and Pesticide Storage Area" per the state premises diagram. Employees use eye protection and gloves when mixing the nutrients or pesticides to avoid contamination. Fire extinguishers, eye wash stations, and spill kits are located inside the nutrient and pesticide storage area in case of an emergency.
- 4) Propane tanks are onsite used for supplemental heating for the residence only. Permanent tanks are located by greenhouse #1 and small 5-gallon tanks are located inside a secure 8'x20' storage container.
