LAND USE DIVISION INTEROFFICE MEMORANDUM

TO: Steven Santos, Senior Planner, Planning & Building Department

FROM: Kenneth M. Freed, Assistant Engineer 

DATE: 06/02/2022

RE:

Applicant Name	MARK FINLEY
APN	218-051-008
APPS#	PLN-13374

The Department has reviewed the above project and has the following comments:

- The Department's recommended conditions of approval are attached as **Exhibit "A"**.
- Additional information identified on **Exhibit "B"** is required before the Department can review the project. **Please re-refer the project to the Department when all of the requested information has been provided.**
- Additional review is required by Planning & Building staff for the items on **Exhibit "C"**. **No re-refer is required.**
- Road Evaluation Reports(s)* are required; See **Exhibit "D"**

Note: Prior to requesting an applicant to submit a road evaluation report, verify if the project is exempt from meeting road system performance standards under CCLUO v2.0 sections 313-55.4.6.5.1 and 314-55.4.6.5.1, even if this box is checked.

No re-refer is required.

*Note: Exhibits are attached as necessary.

Additional comments/notes:

// END //

Public Works Recommended Conditions of Approval

(All checked boxes apply)

APPS #13374

COUNTY ROADS- PROXIMITY OF FARMS:

Applicant is advised that County maintained roads may generate dust and other impacts to farm(s). Applicant shall locate their farm(s) in areas not subject to these impacts. Applicant shall be responsible for protecting their farm(s) against these impacts. Applicant shall hold the County harmless from these impacts. Applicant is advised that a paved road may not always remain paved and Applicant shall locate their farms appropriately. Applicant is advised that the amount of traffic on a road will vary over time which may increase or decrease the impacts.

COUNTY ROADS- FENCES & ENCROACHMENTS:

All fences and gates shall be relocated out of the County right of way. All gates shall be setback sufficiently from the County road so that vehicles will not block traffic when staging to open/close the gate. In addition, no materials shall be stored or placed in the County right of way.

This condition shall be completed to the satisfaction of the Department of Public Works prior to commencing operations, final sign-off for a building permit, or Public Works approval for a business license.

COUNTY ROADS- DRIVEWAY (PART 1):

The submitted site plan is unclear and/or shows improvements that are inconsistent with County Code and/or Department of Public Works policies. The applicant is advised that these discrepancies will be addressed at the time that the applicant applies to the Department of Public Works for an Encroachment Permit. If the applicant wishes to resolve these issues prior to approval of the Planning & Building permit for this project, the applicant should contact the Department to discuss how to modify the site plan for conformance with County Code and/or Department of Public Works policies. Notes:

COUNTY ROADS- DRIVEWAY (PART 2):

Any existing or proposed driveways that will serve as access for the proposed project that connect to a county maintained road shall be improved to current standards for a commercial driveway. Applicant must apply for and obtain an encroachment permit from the Department of Public Works prior to commencement of any work in the County maintained right of way. This also includes installing or replacing driveway culverts; minimum size is typically 18 inches.

- If the County road has a paved surface at the location of the driveway, the driveway apron shall be paved for a minimum width of 18 feet and a length of 50 feet (or to break in slope) where it intersects the County road.
- If the County road has a gravel surface at the location of the driveway, the driveway apron shall be rocked for a minimum width of 18 feet and a length of 50 feet where it intersects the County road.
- If the County road is an urban road, frontage improvements (curb, gutter, and sidewalk) shall also be constructed to the satisfaction of the Department. Any existing curb, gutter or sidewalk that is damaged shall be replaced.

The exact location and quantity of driveways shall be approved by the Department at the time the applicant applies to the Department of Public Works for an Encroachment Permit.

This condition shall be completed to the satisfaction of the Department of Public Works prior to commencing operations, final sign-off for a building permit, or Public Works approval for a business license.

COUNTY ROADS- DRIVEWAY (PART 3):

The existing driveway will require substantial modification in order to comply with County Code. The applicant may wish to consider relocating the driveway apron if a more suitable location is available.

COUNTY ROADS-PARKING LOT- STORM WATER RUNOFF:

Surfaced parking lots shall have an oil-water filtration system prior to discharge into any County maintained facility.

This condition shall be completed to the satisfaction of the Department of Public Works prior to commencing operations, final sign-off for a building permit, or Public Works approval for a business license.

COUNTY ROADS- DRIVEWAY & PRIVATE ROAD INTERSECTION VISIBILITY:

All driveways and private road intersections onto the County Road shall be maintained in accordance with County Code Section 341-1 (Sight Visibility Ordinance).

This condition shall be completed to the satisfaction of the Department of Public Works prior to commencing operations, final sign-off for a building permit, or Public Works approval for a business license.

COUNTY ROADS- PRIVATE ROAD INTERSECTION: (AT COUNTY MAINTAINED RD)

Any existing or proposed non-county maintained access roads that will serve as access for the proposed project that connect to a county maintained road shall be improved to current standards for a commercial driveway. Applicant must apply for and obtain an encroachment permit from the Department of Public Works prior to commencement of any work in the County maintained right of way. This also includes installing or replacing intersection culverts; minimum size is typically 18 inches.

- If the County road has a paved surface at the location of the access road, the access road shall be paved for a minimum width of 20 feet and a length of 50 feet (or break in slope) where it intersects the County road.
- If the County road has a gravel surface at the location of the access road, the access road shall be rocked for a minimum width of 20 feet and a length of 50 feet where it intersects the County road.

This condition shall be completed to the satisfaction of the Department of Public Works prior to commencing operations, final sign-off for a building permit, or Public Works approval for a business license.

COUNTY ROADS- ROAD EVALUATION REPORT(S):

All recommendations in the Road Evaluation Report(s) for County maintained road(s) shall be constructed/implemented to the satisfaction of the Public Works Department prior to commencing operations, final sign-off for a building permit, or approval for a business license. An encroachment permit shall be issued by the Department of Public Works prior to commencement of any work in the County maintained right of way.

Good Afternoon,

Please see the comments below regarding the above-referenced project.

Project Number: PLN-13374-CUP
Project Name: Finmark Farms LLC
APN(s): 218-051-008
CEQA No: CEQA-2022-0209-0000-R1

Project Description:

Finmark Farms LLC - CUP 30,000 Ex OD

A Conditional Use Permit for 30,000 square feet of existing outdoor commercial cannabis cultivation with supported by a 3,000 square foot ancillary nursery. Estimated annual water usage is 276,840 gallons sourced from two rainwater catchment ponds. One pond is located onsite and the other is located on APN 218-081-003. Total water storage consists of the onsite 350,000-gallon pond and the 2,000,000-gallon pond on APN 218-081-003 as well as 40,500 gallons of onsite tanks. Onsite processing in the form of drying is proposed with all other processing to proposed to occur offsite. Power is provided by PGE and no generator use is proposed.

CDFW COMMENTS:

Thank you for referring this application to the California Department of Fish and Wildlife (CDFW) for review and comment.

On August 14, 2024, and on March 19, 2025, CDFW staff conducted a site inspection at the subject property on Assessor' Parcel Number (APN) 218-051-008. During the site visit, staff walked the property to observe current and historic cultivation activities. The following comments are intended to assist the Lead Agency in making informed decisions in the planning process. The following comments shall supersede prior comments submitted by CDFW regarding PLN-13374-CUP. CDFW requests that all comments are incorporated in the final Humboldt County Staff Report.

1. On April 20, 2022, a final Lake and Streambed Alteration Agreement (LSAA, 1600-2019-0851-R1; see attached) was issued to the applicant for six points of water diversion (Point of Diversion: POD) from unnamed tributaries and springs to Chamise Creek, stream restoration, modifying or decommissioning of four ponds, and to upgrade, maintain or decommission 16 stream crossings. The LSAA 1600-2019-0851-R1 permits projects on APNs: 218-081-001, 218-081-002, 218-081-006, 218-091-005 (now 218-190-001) and 218-051-008. During staff site visits on August 14, 2024, and on March 19, 2025, CDFW identified several instances of non-compliance with the LSAA, including failure to submit required reporting, and the installation of water meters on the PODs. Additionally, the LSAA includes 26 projects, including an

extensive stream restoration and pond decommissioning project. None of the projects have been initiated and the LSAA conditions the projects for completion prior to the LSAA expiration date of April 20, 2027. CDFW requests, as a condition of approval, that the applicant/permittee completes the following items listed below by the specified dates or within two weeks of project approval, and achieves and maintains compliance with the LSAA.

- a. Install water meters for the PODs by May 15, 2025, and prior to diverting water.
 - b. Provide updated water monitoring reports for the 2024 water diversion season by May 15, 2025.
 - c. Submit an amendment to the LSAA to include the Point of Water Diversion (Point of Diversion: POD) that is not currently listed as a project on the LSAA (Located at 40.0356, -123.5976 on APN: 218-081-006).
 - d. Submit a Pond Decommission/Stream Restoration Plan within 90 days of project approval and implement the plan before the end of the final work period (October 31, 2026), ensuring that all work is completed prior to the LSAA expiration date of April 20, 2027.
 - e. Submit a Revegetation Plan within 90 days of project approval and implement the plan before the end of the final work period (October 31, 2026), ensuring that all work is completed prior to the LSAA expiration date of April 20, 2027.
 - f. Submit an implementation timeline by May 15, 2025, outlining when the Permittee/Applicant plans to complete all projects listed in the LSAA before the end of the final work period (October 31, 2026), ensuring that all work is completed prior to the LSAA expiration date of April 20, 2027.
 - g. Submit a map showing all PODs on the parcels, including the POD outflow locations. While the Permittee is not currently diverting water from the PODs for use, the PODs are discharging concentrated water flow into stream channels or diverting water from the stream channel onto nearby hillslopes, causing instability and erosion. Remove all infrastructure that is diverting and discharging water flow from the PODs by October 15, 2025.
2. While onsite, CDFW observed waterline and debris related to cannabis cultivation located in a stream channel (at coordinates 40.0369, -123.5980) which is a violation of Fish and Game Code (FGC) 5652. CDFW requests, as a condition of approval, that the applicant remove all debris from the stream channel and cures all violations on site prior to cultivating cannabis in the 2025 season.
 3. To minimize the risk of wildlife entrapment, CDFW requests, as a condition of approval, either the prohibition of synthetic netting (e.g., plastic or nylon), including photo or biodegradable plastic netting, for use in cultivation operations and/or erosion control, or, if the applicant uses synthetic netting, that the applicant is required to follow Best Management Practices (BMPs) that provides requirements on responsible storage, disposal, and use.

Thank you for the opportunity to comment on this project.
