

Summary of Public Outreach related to Waterless Toilet Systems

April 23, 2019

Throughout the development of the draft WTS ordinance staff has sought to engage the public. Multiple meetings, official announcements, television/radio shows and presentations (see below for outreach events) including an informational presentation to the Board of Supervisors raised the awareness of the public and provided opportunity to comment. Staff has encouraged participation from interested citizens and hosted discussions related to the development of the draft.

| March 25, 2019 | Radio interview with KMUD on draft ordinance |

Comments were received, considered and incorporated into the proposal, when possible. The draft proposed in this agenda item presents the balance of ideas or ideas from the resources suggested by public comment, and necessary Public Health protections proposed by WE-Stand, NSF and those mandated by state and local law. Public input was informative to the development of the revised waterless toilet systems requirements.
