

Processing activities must be supported by an approved onsite wastewater treatment system (OWTS). Seasonal/outdoor cultivation sites may be supported by portable toilets. Applicant must obtain a permit for, and install, an approved OWTS to support the processing location and either install approved septic systems or provide portable toilets to cultivation areas.

The Operations Plan describes an unpermitted graywater system accommodating an outdoor sink and shower. Applicant must obtain a graywater system permit, decommission the outdoor sink and shower, or connect the outdoor sink and shower to an approved OWTS.
