**CEQA ADDENDUM TO THE  
FINAL ENVIRONMENTAL IMPACT REPORT FOR THE COMMERCIAL CANNABIS  
LAND USE ORDINANCE**

**Commercial Cannabis Land Use Ordinance Final Environmental Impact Report**

**(State Clearinghouse # 2017042022), January 2018**

**APNs 201-322-006; Fortuna area, County of Humboldt**

**Prepared By  
Humboldt County Planning and Building Department  
3015 H Street, Eureka, CA 95501**

**November 2022**

## **Background**

**Modified Project Description and Project History** – The Commercial Cannabis Land Use Ordinance (CCLUO) updated the County’s existing Commercial Medical Marijuana Land Use Ordinance (Section 313-55.4 and 314-55.4 of Chapter 3 of Division 1 of Title III of the County Code) as well as repeal of the Medical Cannabis Testing and Research Laboratories provisions and on-site consumption prohibition found in Sections 313-55.3.15, 314-55.3.15, 313-55.3.11.7, and 314-55.3.11.7 of Division 1 of Title III of the County Code, respectively. These regulations establish land use regulations for the commercial cultivation, processing, manufacturing, distribution, testing, and sale of cannabis within Humboldt County. These regulations were developed in concert with the Final Environmental Impact Report (EIR) that was adopted for the ordinance in order to implement the mitigation measures of the EIR. The EIR addressed the broad environmental impacts that could be expected to occur from the adoption and implementation of the ordinance. The EIR specified that the regulations established in the CCLUO would mitigate the impacts of existing and new cannabis operations by establishing regulations for an unregulated land use to help prevent and reduce environmental impacts that are known to result from cultivation operations. The EIR prepared for the CCLUO also established local land use regulations to allow for commercial cannabis operations in the unincorporated area of the County that ensure the health and safety of residents, employees, County visitors, neighboring property owners and end users of cannabis. The proposed project is consistent with all regulations within the CCLUO and all mitigation measures of the EIR. The current project was contemplated by the EIR and compliance with the provisions of the CCLUO will fully mitigate all environmental impacts of the project to a less than significant level.

The modified project description includes a Conditional Use Permit located in the Fortuna Community Planning Area for one acre of new mixed-light commercial cannabis cultivation supported by a 4,360 square foot ancillary nursery. Also proposed is a 2,400 square foot support facility for both offsite processing and distribution. The estimated 535,000 gallons annual irrigation water budget is sourced from rainwater catchment and is supported by 500,000 gallons of water storage tanks. Power is provided by PGE. The Conditional Use Permits include allowing the proposed uses in the Qualified (Q) zone.

The applicant provided due diligence investigations of soil and groundwater dated November 19, 2020 and June 10, 2022. Staff review of the investigations concluded that low risk is presented by conducting the proposed project. The applicant also provided a December 2021 Cultural Resources Investigation Report. The Cultural Resources Investigation Report was reviewed by the Bear River Tribal Historic Preservation Officer who recommended an inadvertent discovery protocol.

The modified project will comply with provision of the CCLUO intended to eliminate impacts to sensitive species from noise and from light. Compliance with these and other measures of the CCLUO ensure consistency with the EIR.

**Purpose** - Section 15164 of the California Environmental Quality Act (CEQA) provides that the lead agency shall prepare an addendum to a previously certified Final Environmental Impact Report (EIR) if some changes or additions are necessary but none of the conditions described in Section 15162 calling for a subsequent EIR or Negative Declaration have occurred. Section 15162

states that when an EIR has been certified for a project, no subsequent EIR shall be prepared for that project unless the lead agency determines, on the basis of substantial evidence in the light of the whole record, one or more of the following:

1. Substantial changes are proposed in the project which require major revisions of the previous EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
2. Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or
3. New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the Final EIR was certified as complete, shows any of the following: A) the project will have one or more significant effects not discussed in the previous Final EIR; B) significant effects previously examined will be substantially more severe than shown in the Final EIR; C) mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or D) mitigation measures or alternatives which are considerably different from those analyzed in the Final EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

### **Summary of Significant Project Effects and Mitigation Recommended**

No changes are proposed for the Final EIR recommended mitigations. The proposal to authorize the proposed project is fully consistent with the impacts identified and adequately mitigated in the Final EIR. The project as conditioned to implement responsible agency recommendations, results in no significantly adverse environmental effects beyond those identified in the Final EIR.

In reviewing the application for consistency with the adopted EIR the County considered the following information and studies, among other documents:

- Operations Plan and Site Plan for Jess Bareilles
- County GIS
- Due diligence investigations of soil and groundwater contamination dated November 19, 2020, and June 10, 2022.
- A December 2021 Cultural Resources Investigation Report
- A Noise Assessment and Mitigation Plan dated March 2021
- A Prime Soils Study dated May 25, 2021

### **Other CEQA Considerations**

Staff suggests no changes for the revised project.

## **EXPLANATION OF DECISION NOT TO PREPARE A SUPPLEMENTAL MITIGATED NEGATIVE DECLARATION OR ENVIRONMENTAL IMPACT REPORT**

See **Purpose** statement above.

In every impact category analyzed in this review, the projected consequences of the current project proposal are either the same or less than significantly increased than the initial project for which the EIR was adopted. Based upon this review, the following findings are supported:

### **FINDINGS**

1. The proposed project will permit a new cannabis operation and bring the operation into compliance with county and state requirements intended to adequately mitigate environmental impacts.
2. The circumstances under which the project was approved have not changed substantially. There are no new significant environmental effects and no substantial increases in the severity of previously identified effects.
3. For the current proposed project, there has been no new information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was adopted as complete.

### **CONCLUSION**

Based on these findings it is concluded that an Addendum to the previous Final EIR is appropriate to address the requirements under CEQA for the current project proposal. All of the findings, mitigation requirements, and mitigation and monitoring program of the EIR, remain in full force and effect on the original project.

There are no new significant environmental effects and no substantial increases in the severity of previously identified effects. For the current proposed project, there has been no new information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was adopted as complete.
