# Actuarial Review of the Self-Insured Liability Program

Outstanding Liabilities as of June 30, 2019 and June 30, 2020 Forecast for Program Years 2019-20 and 2020-21

Presented to

**Humboldt County** 

October 25, 2019

Friday, October 25, 2019

Ms. Kristin Kovacs Interim Risk Manager County of Humboldt 825 5th Street Eureka, CA 95501

Re: Actuarial Review of the Self-Insured Liability Program

### Dear Ms. Kovacs:

As you requested, we have completed our review of Humboldt County's self-insured liability program. Assuming an SIR of \$100,000 per occurrence, we estimate the ultimate cost of claims and expenses for claims incurred during the 2019-20 and 2020-21 program years to be \$488,000 and \$527,000, respectively. These amounts include allocated loss adjustment expenses (ALAE), unallocated loss adjustment expenses (ULAE), and a discount for anticipated investment income. ALAE is the direct cost associated with the defense of individual claims (e.g. legal fees, investigation fees, court charges). ULAE is the cost to administer all claims to final settlement, which may be years into the future (e.g. claims adjusters' salaries, taxes). The discount for investment income is calculated based on the likely payout pattern of the County's claims, assuming a 2.5% return on investments per year. For budgeting purposes, the expected costs of 2019-20 and 2020-21 claims translate to rates of \$0.35 and \$0.38 per \$100 of payroll, respectively.

In addition, we estimate the program's liability for outstanding claims to be \$1,873,000 and \$1,479,000 as of June 30, 2019 and June 30, 2020, respectively, again including ALAE and ULAE, and discounted for anticipated investment income. Given estimated program assets of \$3,437,000 as of June 30, 2019, the program was funded above the 90% confidence level.

The \$1,873,000 estimate is the minimum liability to be booked by the County at June 30, 2019 for its liability program, in accordance with Governmental Accounting Standards Board (GASB) Statement #10. GASB #10 requires the County to accrue a liability on its financial statements for the ultimate cost of claims and expenses associated with all reported and unreported claims, including ALAE and ULAE. GASB #10 does not prohibit the discounting of losses to recognize investment income.

Our conclusions regarding the County's liability for unpaid loss and loss adjustment expenses (LAE) at June 30, 2019 are summarized in the table below.

### Humboldt County Self-Insured Liability Program Estimated Liability for Unpaid Loss and LAE at June 30, 2019

		Marginally	Reco	Recommended Range		
	Expected	Acceptable 70% CL	Low 75% CL	Target 80% CL	High 85% CL	Conservative 90% CL
Loss and ALAE	\$1,957,000					
ULAE	30,000					
Investment Income Offset	(114,000)				_	
Discounted Loss and LAE	\$1,873,000	\$2,094,000	\$2,190,000	\$2,304,000	\$2,444,000	\$2,630,000
Assets	3,437,000					
Surplus	\$1,564,000	\$1,343,000	\$1,247,000	\$1,133,000	\$993,000	\$807,000

Our conclusions regarding the County's liability for unpaid loss and loss adjustment expenses (LAE) at June 30, 2020 are summarized in the table below.

## Humboldt County Self-Insured Liability Program Estimated Liability for Unpaid Loss and LAE at June 30, 2020

		Marginally	Recommended Range			
	Expected	Acceptable 70% CL	Low 75% CL	Target 80% CL	High 85% CL	Conservative 90% CL
Loss and ALAE	\$1,532,000					
ULAE	31,000					
Investment Income Offset	(84,000)					
Discounted Loss and LAE	\$1,479,000	\$1,654,000	\$1,729,000	\$1,819,000	\$1,930,000	\$2,077,000
Assets	4,776,000					
Surplus	\$3,297,000	\$3,122,000	\$3,047,000	\$2,957,000	\$2,846,000	\$2,699,000

GASB #10 does not address an actual asset requirement for the program, but only speaks to the liability to be recorded on the County's financial statements.

Because actuarial estimates of claims costs are subject to some uncertainty, we recommend that an amount in addition to the discounted expected loss costs be set aside

as a risk margin for contingencies. Generally, the amount should be sufficient to fund assets to the 75% to 85% confidence level for primary programs. We consider funding assets to the 70% confidence level to be marginally acceptable and funding assets to the 90% confidence level to be conservative.

Furthermore, the CSAC Excess Insurance Authority standard states that based upon the actuarial recommendations, the member should maintain assets and make funding contributions equal to or exceeding the present value of expected losses and a reasonable margin for contingencies.

The table below shows our funding recommendations for Humboldt County for the 2019-20 fiscal year.

## Humboldt County Self-Insured Liability Program Funding Guidelines for 2019-20 Self-Insured Retention (SIR) of \$100,000

		Marginally	Reco	Recommended Range		
	Expected	Acceptable 70% CL	Low 75% CL	Target 80% CL	High 85% CL	Conservative 90% CL
Loss and ALAE	\$482,000					
ULAE	30,000					
Investment Income Offset	(24,000)					
Discounted Loss and LAE	\$488,000	\$580,000	\$624,000	\$675,000	\$740,000	\$827,000
Non-Claims Related Expenses	1,845,000	1,845,000	1,845,000	1,845,000	1,845,000	1,845,000
Indicated Funding	\$2,333,000	\$2,425,000	\$2,469,000	\$2,520,000	\$2,585,000	\$2,672,000
Rate per \$100 of 2019-20 Payroll	\$1.68	\$1.75	\$1.78	\$1.82	\$1.87	\$1.93

The funding recommendations shown in the table above do not include any recognition of the existing funding margin (surplus or deficit) at June 30, 2019.

The Non-Claims Related Expenses above include the following expenses:

Excess Insurance: \$1,489,000Other Expenses: \$356,000

The table below shows our funding recommendations for Humboldt County for the 2020-21 fiscal year. Given the program's projected funding surplus as of June 30, 2020, we recommend that the County implement a five-year funding plan to bring program assets back to the desired confidence level by June 30, 2025. Under this plan, the County should fund the full value of each prospective year's claims costs; but in addition, may need to return an amortized portion of the projected surplus as of June 30, 2020. For example, to achieve funding at the 75% confidence level as of June 30, 2025, the County's fiscal year 2020-21 contribution should total \$1,879,000, including \$674,000 for claims and loss adjustment expenses, \$1,845,000 for non-claims related expenses, less \$640,000 from the June 30, 2020 surplus.

# Humboldt County Self-Insured Liability Program Funding Guidelines for 2020-21 Amortized Over Five Years Self-Insured Retention (SIR) of \$100,000

		Marginally	Reco	mmended Ra	nge	
	Expected	Acceptable 70% CL	Low 75% CL	Target 80% CL	High 85% CL	Conservative 90% CL
Loss and ALAE	\$520,000					
ULAE	33,000					
Investment Income Offset	(26,000)					
Discounted Loss and LAE	\$527,000	\$626,000	\$674,000	\$729,000	\$799,000	\$893,000
Non-Claims Related Expenses	1,845,000	1,845,000	1,845,000	1,845,000	1,845,000	1,845,000
(Surplus) at 6/30/20 Amortized Over Five Years	(692,000)	(655,000)	(640,000)	(621,000)	(598,000)	(567,000)
Over rive rears	(092,000)	(033,000)	(040,000)	(021,000)	(390,000)	(307,000)
Indicated Funding	\$1,680,000	\$1,816,000	\$1,879,000	\$1,953,000	\$2,046,000	\$2,171,000
Rate per \$100 of 2020-21 Payroll	\$1.21	\$1.31	\$1.36	\$1.41	\$1.48	\$1.57

The Non-Claims Related Expenses above include the following expenses:

Excess Insurance: \$1,489,000Other Expenses: \$356,000

The report that follows outlines the scope of our study, its background, and our conclusions, recommendations, and assumptions. Judgments regarding the appropriateness of our conclusions and recommendations should be made only after studying the report in its entirety, including the graphs, attachments, exhibits and appendices. Our report has been developed for the County's internal use. It is not intended for general circulation.

We appreciate the opportunity to be of service to Humboldt County in preparing this report. Please feel free to call Mike Harrington at (916) 244-1162, Becky Richard at (916) 244-1183 or York Lee at (916) 244-1159 with any questions you may have concerning this report.

Sincerely,

Bickmore Actuarial

### I. BACKGROUND

Humboldt County began its self-insured liability program on July 1, 1978. Its self-insured retention for 2010-11 and prior was \$150,000. From July 1, 2011 to June 30, 2014, the SIR was increased to \$500,000. As of July 1, 2014, the SIR was decreased to \$100,000. Excess coverage is provided by the CSAC Excess Insurance Authority. Claims administration services are provided by the County. Additional background on the program is given in Appendix K.

As of June 30, 2019, the County had assets of \$3,437,000 for the program. As of June 30, 2020, the County is expected to have assets of \$4,776,000 for the program. Additional background on program funding is given in Appendix L.

The purpose of this review is to provide a guide to the County to determine reasonable funding levels for its self-insurance program according to the funding policy the County has adopted and to comply with Governmental Accounting Standards Board Statements #10 and #30. The specific objectives of the study are to estimate the County's liability for outstanding claims as of June 30, 2019 and June 30, 2020, project ultimate loss costs for 2019-20 and 2020-21, and provide funding guidelines to meet these liabilities and future costs.

### **II. CONCLUSIONS AND RECOMMENDATIONS**

### A. LIABILITY FOR OUTSTANDING CLAIMS

Graphs 1a and 1b on the following pages summarize our assessment of the County's funding position as of June 30, 2019 and June 30, 2020. The dark-colored bars indicate our estimates of the program's liability for outstanding claims before recognition of the investment income that can be earned on the assets held before the claim payments come due. The horizontal line across each graph indicates the County's available assets at June 30<sup>th</sup> of each year.

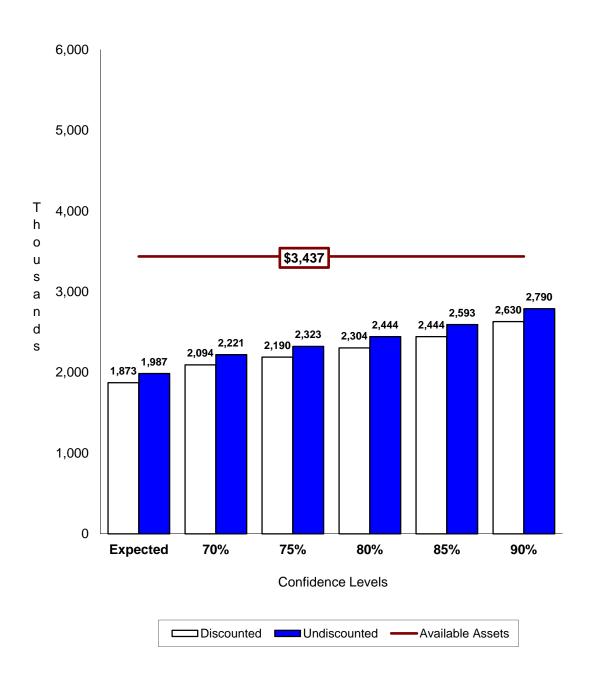

Our best estimate of the full value of the County's liability for outstanding claims within its self-insured retention (SIR) is \$1,987,000 as of June 30, 2019, and \$1,563,000 as of June 30, 2020. These amounts include losses, allocated loss adjustment expenses (ALAE), and unallocated loss adjustment expenses (ULAE). ALAE is the direct cost associated with the defense of individual claims (e.g. legal fees, investigation fees, court charges). ULAE is the cost to administer claims to final settlement, which may be years in the future (e.g. claims adjusters' salaries, taxes).

There is some measure of uncertainty associated with our best estimate because of the random nature of much of the process that determines ultimate claims costs. For this reason, we generally recommend that a program such as this include some funding margin for the possibility that actual loss costs will be greater than the best estimate. We generally measure the amount of this margin by thinking in terms of the probability distribution of actual possible results around our best estimate. As the margin grows, the probability that the corresponding funding amount will be sufficient to meet actual claim liabilities increases. We typically refer to this probability as the "confidence level" of funding. Graphs 1a and 1b show the liabilities for outstanding claims at several confidence levels that are typically of interest to risk managers in formulating funding policies for self-insurance programs.

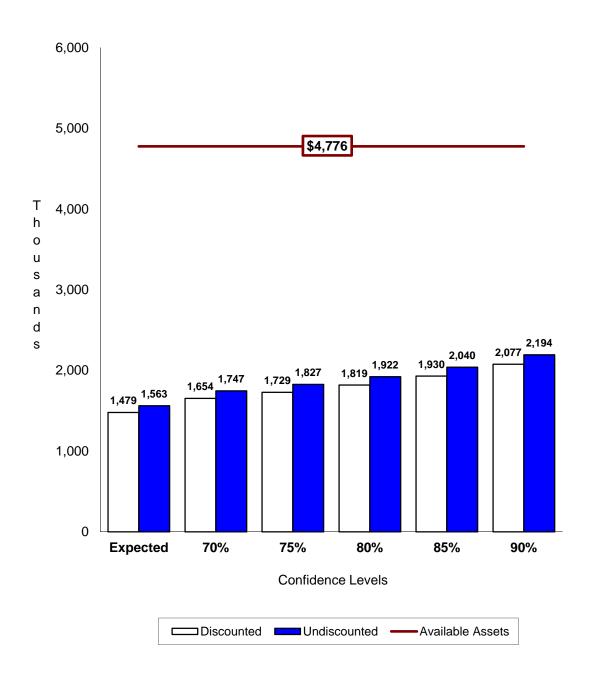

The County can earn investment income on the assets it holds until claims payments come due. Assuming a long-term average annual return on investments of 2.5%, we estimate the impact of investment income earnings to be about 5.7% if the program is funded within the range indicated in the graphs, resulting in a discounted liability for outstanding claims of \$1,873,000 as of June 30, 2019, and \$1,479,000 as of June 30, 2020.

Investment income earnings will be less than this when the program does not maintain sufficient funding, and more when there is excess funding. Thus, thinking in terms of liabilities discounted for investment income can actually mask funding deficiencies and redundancies that might otherwise be obvious. However, the discounted liabilities do represent legitimate funding targets. The light-colored bars on Graphs 1a and 1b show our estimates of the County's discounted liability for outstanding claims.

Humboldt County Liability Available Assets vs Outstanding Liability (\$000's) at June 30, 2019

Humboldt County Liability Available Assets vs Outstanding Liability (\$000's) at June 30, 2020

The table below displays a breakdown of the program's outstanding loss and LAE liabilities into case reserves and incurred but not reported (IBNR) reserves at June 30, 2019, before recognition of investment income.

Humboldt County
Self-Insured Liability Program
Estimated Liability for Unpaid Loss and LAE at June 30, 2019

Year	Case Reserves	IBNR Reserves	Total Outstanding

Total	\$1,132,908	\$429,492	\$1,562,400

### **B. PROGRAM FUNDING: GOALS AND OBJECTIVES**

As self-insurance programs have proliferated among public entities, it has become apparent that there is a large measure of inconsistency in the way in which these programs recognize and account for their claims costs. This is the result of the fact that there have been several different sources of guidance available, none of which has been completely relevant to public entity self-insurance programs.

According to the Governmental Accounting Standards Board (GASB), the most relevant source of guidance on the subject is Financial Accounting Standards Board Statement #60. A liability for unpaid claim costs, including all loss adjustment expenses, should be accrued at the time the self-insured events occur. This liability should include an allowance for incurred but not reported claims. It may be discounted for investment income at an appropriate rate of return, provided the discounting is disclosed. The regulations detailing the way in which this must be done are outlined in GASB's statements #10 and #30. These regulations are required to be applied by the County.

GASB #10 and #30 do not address asset requirements. They do, however, allow a range of amounts to be recognized for accounting purposes; specifically, GASB #10 and #30 allow recognition of a risk margin for unexpectedly adverse loss experience. Thus, for accounting purposes, it is possible to formulate a funding policy from a range of alternatives. The uncertainty in any estimate of the program's liability for outstanding claims should be taken into consideration in determining funding policy, but it may be offset by recognizing anticipated investment income earnings. This usually means developing a funding program based on discounted claims costs with some risk margin for unexpected adverse loss experience.

The amount of the risk margin should be a question of long-term funding policy. We recommend that the risk margin be determined by thinking in terms of the probability that a given level of assets will prove to be adequate. For example, a reasonable goal might be to maintain assets at the 85% confidence level.

A key factor to consider in determining funding policy is the degree to which stability is required in the level of contributions to the program from year to year. If you elect to maintain assets at a low confidence level, the chances are much greater that future events will prove that additional contributions should have been made for old claims. The additional contributions for old claims may be required at the same time that costs are increasing dramatically on new claims. The burden of funding for increases on past years as well as on current years, may well be prohibitive.

We generally recommend maintaining program assets at the 80% confidence level, after recognition of investment income, with a recommended range of the 75% to 85% confidence levels. We tend to think of the 70% confidence level as marginally acceptable and of the 90% confidence level as conservative. We recommend the 75% to 85% confidence level range because the probabilities are reasonably high that resulting assets will be sufficient to meet claim liabilities, yet the required risk margins are not so large that they will cause most self-insured entities to experience undue financial hardship. In addition, within this range, anticipated investment income generally offsets the required risk margin for the most part, which means that assets are likely sufficient on an undiscounted basis.

We also strongly believe, however, that the confidence level to which any future year is funded should be evaluated in light of the relative certainty of the assumptions underlying the actuarial analysis, the County's other budgetary constraints, and the relative level of risk it is believed appropriate to assume. This means formulating both short and long-term funding goals, which may be the same in some years, but different in others.

In general, we recommend funding each year's claims costs in that year. When surpluses or deficits have developed on outstanding liabilities and funding adjustments are necessary, they should be clearly identified as such so that the habit of funding each year's claims costs that year is maintained. We also recommend that you reduce a surplus more slowly than you would accumulate funding to reduce a deficit.

It is estimated that program assets were \$3,437,000 as of June 30, 2019, resulting in the program being funded above the 90% confidence level. Given estimated assets of \$4,776,000 as of June 30, 2020, the program is expected to be funded above the 90% confidence level.

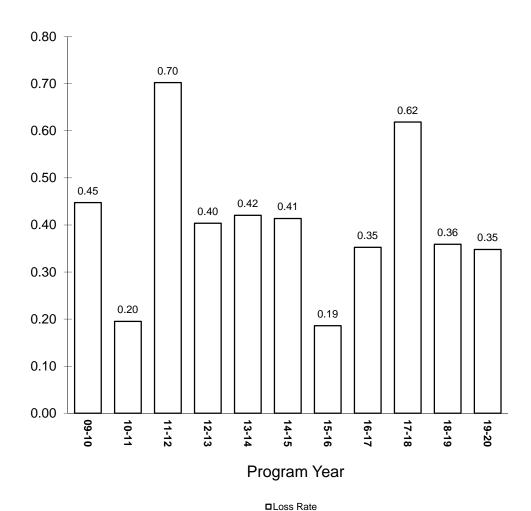

### C. HISTORICAL TRENDS IN THE SELF-INSURANCE PROGRAM

### Loss Rate

The program's dollars of loss per \$100 of payroll (based on losses limited to \$100,000 per occurrence), or loss rate, has fluctuated over the most recent ten years. The projected 2019-20 loss rate of \$0.35 is based on an average of the most recent five years. See Graph 2 below.

Graph 2

Humboldt County Liability Dollars of Loss per \$100 of Payroll

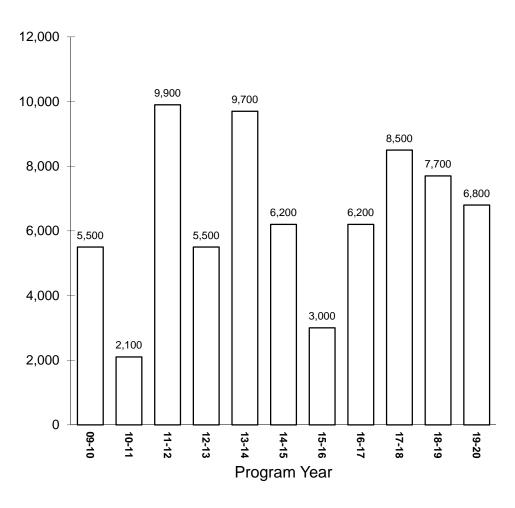

### Severity

The program's average dollars of loss per claim (based on losses limited to \$100,000 per occurrence), or severity, has also fluctuated over the most recent ten years. The projected 2019-20 severity of \$6,800 is based on a long term average. See Graph 3 below.

Graph 3

Humboldt County Liability Dollars of Loss per Claim

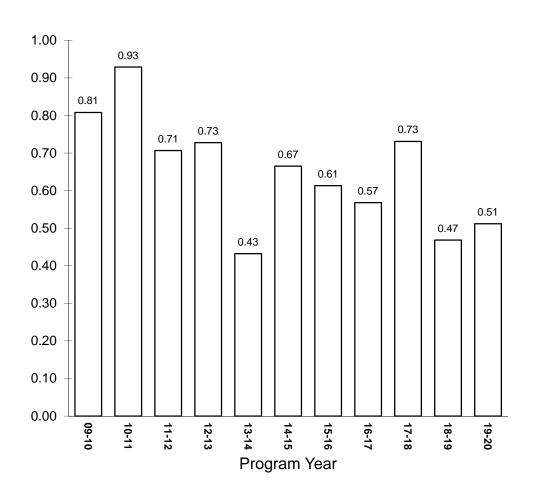

□Claim Severity

### **Frequency**

The program's number of claims per \$1 million of payroll, or frequency, has been generally decreasing over the most recent ten years. The projected 2019-20 frequency of 0.51 is based on an average of the most recent five years. See Graph 4 below.

Graph 4

Humboldt County
Liability
Number of Claims per
\$1 Million of Payroll

□Claim Frequency

### D. COMPARISON WITH PREVIOUS RESULTS

The prior report for Humboldt County was dated October 30, 2018. In the table below we display actual versus expected development of incurred losses and ALAE by accident year between the June 30, 2018 evaluation date of the prior report and the June 30, 2019 evaluation date of the current report.

### **Actual Versus Expected Incurred Loss and ALAE Development**

Accident Year	Expected Incurred Development	Actual Incurred Development	Actual Minus Expected
Prior	\$0	(\$60,000)	(\$60,000)
1999-00	0	0	0
2000-01	0	0	0
2001-02	0	0	0
2002-03	0	0	0
2003-04	0	0	0
2004-05	0	0	0
2005-06	0	(14,000)	(14,000)
2006-07	0	0	0
2007-08	0	0	0
2008-09	0	0	0
2009-10	0	(275,000)	(275,000)
2010-11	0	0	0
2011-12	4,000	(259,000)	(263,000)
2012-13	7,000	(23,000)	(30,000)
2013-14	20,000	0	(20,000)
2014-15	3,000	(74,000)	(77,000)
2015-16	14,000	(151,000)	(165,000)
2016-17	43,000	5,000	(38,000)
2017-18	187,000	96,000	(91,000)
2018-19	230,000	158,000	(72,000)
Total	\$508,000	(\$597,000)	(\$1,105,000)

As shown, actual incurred development was less than anticipated since the prior report. This is mainly due to favorable development in most accident years.

Based on the assumptions from the prior report, it was expected that incurred losses through accident year 2018-19 would increase by \$508,000 between the two evaluation dates. However, actual development decreased by approximately \$597,000; or about \$1,105,000 less than expected.

In the table below we display actual versus expected development of paid losses and ALAE by accident year between the June 30, 2018 evaluation date of the prior report and the June 30, 2019 evaluation date of the current report.

### **Actual Versus Expected Paid Loss and ALAE Development**

Accident Year	Expected Paid Development	Actual Paid Development	Actual Minus Expected
Prior	\$60,000	\$0	(\$60,000)

2012-13	12,000	0	(12,000)
2013-14	85,000	0	(85,000)
2014-15	152,000	6,000	(146,000)
2015-16	121,000	15,000	(106,000)
2016-17	148,000	30,000	(118,000)
2017-18	241,000	25,000	(216,000)
2018-19	65,000	14,000	(51,000)
Total	\$991,000	(\$355,000)	(\$1,346,000)

As shown, actual paid development was less than anticipated since the prior report. This is mainly due to favorable development in most accident years.

Based on the assumptions from the prior report, it was expected that paid losses through accident year 2018-19 would increase by \$991,000 between the two evaluation dates. However, actual development decreased by approximately \$355,000; or about \$1,346,000 less than expected. The negative paid development is due to six claims being coded as "not covered" or "deleted" in the loss run.

In the table below we display the change in our estimates of the program's ultimate losses and ALAE by accident year since our prior report.

### **Change in Ultimate Loss and ALAE**

Accident Year	Prior Report	Current Report	Change In Ultimate
Prior	\$7,063,000	\$7,003,000	(\$60,000)
1999-00	173,000	173,000	Ó
2000-01	360,000	360,000	0
2001-02	265,000	265,000	0
2002-03	538,000	538,000	0
2003-04	270,000	270,000	0
2004-05	181,000	181,000	0
2005-06	846,000	831,000	(15,000)
2006-07	509,000	509,000	0
2007-08	262,000	262,000	0
2008-09	465,000	465,000	0
2009-10	687,000	413,000	(274,000)
2010-11	170,000	170,000	0
2011-12	1,139,000	877,000	(262,000)
2012-13	837,000	803,000	(34,000)
2013-14	1,150,000	1,130,000	(20,000)
2014-15	514,000	423,000	(91,000)
2015-16	365,000	194,000	(171,000)
2016-17	425,000	391,000	(34,000)
2017-18	782,000	711,000	(71,000)
2018-19	559,000	437,000	(122,000)
Total	\$17,560,000	\$16,406,000	(\$1,154,000)

As shown, overall we have decreased our estimated ultimate losses by \$1,154,000 since our prior report. The changes in our estimates of ultimate losses take into account both the incurred and paid development listed on the previous two pages.

At the time of the prior report, we estimated the liability for outstanding claims as of June 30, 2018 to be \$2,149,000 at the discounted, expected level. Our current estimate as of June 30, 2019 is \$1,873,000, a decrease in our assessment of the County's outstanding liabilities, as shown below:

### **Outstanding Claim Liabilities for Loss and LAE**

	Prior Report at June 30, 2018	Current Report at June 30, 2019	Change
(A) Case Reserves:	\$1,767,000	\$1,525,000	(\$242,000)
(B) IBNR Reserves:	429,000	432,000	3,000
(C) Claims Administration Reserves:	39,000	30,000	(9,000)
(D) Total Reserves:	\$2,235,000	\$1,987,000	(\$248,000)
(E) Offset for Investment Income:	(86,000)	(114,000)	(28,000)
(F) Total Outstanding Claim Liabilities:	\$2,149,000	\$1,873,000	(\$276,000)

As shown, our estimate of outstanding claims liabilities at the discounted, expected level has decreased between June 30, 2018 and June 30, 2019, as reflected in our prior and current reports, respectively.

Case reserves have decreased, while our estimate of IBNR reserves increased slightly. Reserves for future claims administration expenses have decreased, resulting in a \$248,000 decrease in total claim reserves. The offset for investment income is expected to be higher. The net change due to the above factors is an overall decrease of \$276,000 in our estimate of outstanding claim liabilities for loss and LAE.

At the time of the prior report, available assets were estimated to be \$2,690,000 as of June 30, 2018, which corresponded to the then-estimated discounted liability for outstanding claims between the 80% and 85% confidence levels. Available assets are currently estimated to be \$3,437,000 as of June 30, 2019, which corresponds to the currently estimated liability for outstanding claims above the 90% confidence level. It can be summarized as follows:

### **Funding Margin**

	•		
	Prior Report at June 30, 2018	Current Report at June 30, 2019	Change
(A) Outstanding Liability at the Discounted Expected Level:	\$2,149,000	\$1,873,000	(\$276,000)
(B) Estimated Assets At June 30:	2,690,000	3,437,000	747,000
(C) Surplus:	\$541,000	\$1,564,000	\$1,023,000

As you can see, our estimate of the program's funding margin at the discounted, expected level has increased by \$1,023,000 between June 30, 2018 (as previously estimated) and June 30, 2019 (as currently estimated). This is driven by an increase in the estimated fund assets between the two points, coupled with a decrease in the estimated outstanding liability.

At the time of the prior report, our funding estimate for the 2019-20 year was \$580,000 at the discounted, expected level. That amount included allocated loss adjustment expenses (ALAE), unallocated loss adjustment expenses (ULAE), and a discount for anticipated investment income. Our current estimate for the 2020-21 year is \$527,000 at the discounted, expected level, a decrease in the program's expected loss costs, as shown in the table below:

### **Comparison of Funding for Loss and LAE**

	Prior Report 2019-20 SIR = \$100,000	Current Report 2020-21 SIR = \$100,000	Change
(A) Ultimate Loss and ALAE:	\$576,000	\$520,000	(\$56,000)
(B) Ultimate Claims Administration (ULAE):	35,000	33,000	(2,000)
(C) Total Claim Costs:	\$611,000	\$553,000	(\$58,000)
(D) Offset for Investment Income:	(31,000)	(26,000)	5,000
(E) Total Recommended Funding:	\$580,000	\$527,000	(\$53,000)
(F) Funding per \$100 of Payroll:	\$0.45	\$0.38	(\$0.07)

As you can see, our funding recommendations at the discounted, expected level have decreased between 2019-20 and 2020-21, as shown in our prior and current reports, respectively.

Our estimates of ultimate loss and ALAE have decreased by \$56,000. In addition, claims administration costs are expected to be lower, resulting in an overall decrease in total claim costs of \$58,000. Investment income is expected to be lower. The net change due to the above factors is an overall decrease of \$53,000 in our annual funding estimate for loss and LAE.

### E. DATA PROVIDED FOR THE ANALYSIS

Overall, the data utilized in preparing this report appears to be accurate.

Comments and issues regarding the data are as follows:

- We have assumed that the program's self-insured retention will remain at \$100,000 per occurrence for 2019-20 and 2020-21 (See Appendix K).
- We estimated the June 30, 2020 asset balance by beginning with the June 30, 2019 asset balance, and adjusting for anticipated revenue and expense for 2019-20 (See Appendix L).
- We received loss data evaluated as of June 30, 2019 (See Appendix M). We also utilized the data from the County's most recent actuarial study for our assessment of loss development.
- Per discussions with the County and CSAC, we have zeroed out the case reserves on claims that have been coded as "closed".
- We also received updated exposure information through 2020-21, including population, revenue, total payroll, sheriff payroll, police vehicles and FTE (See Appendix N).

The data provided for the analysis appears to be reasonable for use in this actuarial valuation of liabilities and projection of loss costs.

### F. COUNTY BENCHMARKING

The County's loss experience can be put into perspective by comparing it with the loss experience of other counties participating in the CSAC-EIA liability program. The following table shows a comparison of average loss rate (loss per \$100 of payroll), claim severity (loss per claim), and claim frequency (claims per \$1 million of payroll).

Humboldt County in Comparison with Other EIA Members

	_	Other CSAC-EIA Members				
AI	Humboldt					
At the 2017-18 Level	County	Range		Average		
Loss Rate						
(Dollars of Loss per \$100 of						
Payroll)	\$0.680	\$0.166	\$1.047	\$0.501		
Claim Severity						
(Dollars of Loss per Claim)	\$9,300	\$2,220	\$36,110	\$10,867		
Claim Frequency						
(Number of Claims per \$1						
Million of Payroll)	0.731	0.144	1.604	0.614		

The County's loss rate is higher than average. This reflects a lower than average cost per claim, with a higher than average number of claims per \$1 million of payroll.

The loss rates and severities in the table are limited to \$100,000 per occurrence and reflect anticipated reform savings. It should be noted that the statistics shown are projections for fiscal year 2017-18 based upon the results of all County actuarial reports completed last year, generally using loss data valued as of June 30, 2018. As such, they do not reflect the more recent loss data utilized in developing the estimates shown elsewhere in this report, and thus their use should be limited to benchmarking relative to other member counties.

Note also that the County's statistics in the above table are based on payroll rates to facilitate comparisons to the statistics for other CSAC-EIA members. The exhibits supporting our conclusions in this report are based on composite exposure, which is a weighted average of the County's population, budget, payroll, sheriff's payroll, number of patrol cars and FTE.

### III. ASSUMPTIONS AND LIMITATIONS

Any quantitative analysis is developed within a very specific framework of assumptions about conditions in the outside world, and actuarial analysis is no exception. We believe that it is important to review the assumptions we have made in developing the estimates presented in this report. By doing so, we hope you will gain additional perspective on the nature of the uncertainties involved in maintaining a self-insurance program. Our assumptions, and some observations about them, are as follows:

- Our analysis is based on loss experience, exposure data, and other general and specific information provided to us by the County. While we have not independently audited or verified this information, we have reviewed it for reasonableness and internal consistency.
- We have also made use of loss statistics that have been developed from the information gathered and compiled from other California counties participating in the CSAC Excess Insurance Authority's liability program.
- We have assumed that the future development of incurred and paid losses can be reasonably predicted on the basis of development of such losses in the recent past. We have also assumed that the historical development patterns for the participants of the CSAC Excess Insurance Authority's liability program in the aggregate form a reasonable basis of comparison to the patterns from Humboldt County's data.
- We have made use of cost relationships for claims of various sizes derived from the most recent actuarial review of the CSAC Excess Insurance Authority's liability program.
- We have assumed that there is a continuing relationship between past and future loss costs.
- It is not possible to predict future claim costs precisely. Most of the costs of liability claims arise from a small number of incidents involving serious injury. A relatively small number of such claims could generate enough loss dollars to significantly reduce, or even deplete, the self-insurance fund.
- We cannot predict and have not attempted to predict the impact of future law changes and court rulings on claims costs. This is one major reason why we believe our funding recommendations are reasonable now, but should not be extrapolated into the future.
- We have assumed that the loss rate trend associated with claim costs increases at 2.5% per year. We have assumed that claim severity increases at 2.5% per year, and that claim frequency remains unchanged from year to year.

- We have assumed that payroll and other inflation-sensitive exposure measures increase 2.5% annually due to inflation.
- We have assumed that assets held for investment will generate an average annual return of 2.5% over the duration of payment of the loss liabilities. It should be noted that actual future investment returns may vary significantly from this assumption, depending upon the prevailing investment market conditions.
- The claims costs we have estimated include indemnity and medical payments, and all loss adjustment expenses. We have included estimates for excess insurance contributions to the CSAC-EIA and other expenses associated with the program based upon information provided by the County.
- Our funding recommendations do not include provisions for catastrophic events not in the County's history, such as earthquakes, flooding, mass civil disorder, or mass occupational disease.
- Our estimates assume that all excess insurance is valid and collectible. Further, our funding recommendations do not include a provision for losses greater than the County's excess coverage.
- The County's assets available for the program are estimated to be \$3,437,000 as of June 30, 2019, and \$4,776,000 as of June 30, 2020 for use in this report. This is shown in further detail in Appendix L.

### **IV. GLOSSARY OF ACTUARIAL TERMS**

**Accident Year** - Year during which the accidents that generate a group of claims occurs, regardless of when the claims are reported, payments are made, or reserves are established.

Allocated Loss Adjustment Expenses (ALAE) - Expense incurred in settling claims that can be directly attributed to specific individual claims (e.g., legal fees, investigative fees, court charges, etc.)

**Case Reserve** - The amount left to be paid on a claim, as estimated by the claims administrator.

**Claim Count Development Factor** - A factor that is applied to the number of claims reported in a particular accident period in order to estimate the number of claims that will ultimately be reported.

Claim Frequency - Number of claims per \$1 million of payroll.

**Confidence Level** - An estimated probability that a given level of funding will be adequate to pay actual claims costs. For example, the 85% confidence level refers to an estimate for which there is an 85% chance that the amount will be sufficient to pay loss costs.

**Discount Factor** - A factor to adjust estimated loss costs to reflect anticipated investment income from assets held prior to actual claim payout.

**Expected Losses** - The best estimate of the full, ultimate value of loss costs.

**Incurred but not Reported (IBNR) Losses** - Losses for which the accident has occurred but the claim has not yet been reported. This is the ultimate value of losses, less any amount that has been set up as reported losses by the claims adjuster. It includes both amounts for claims incurred but not yet received by the administrator and loss development on already reported claims.

**Loss Development Factor** - A factor applied to losses for a particular accident period to reflect the fact that reported and paid losses do not reflect final values until all claims are settled (see Section IV).

**Loss Rate** - Ultimate losses per \$100 of payroll.

**Non-Claims Related Expenses** – Program expenses not directly associated with claims settlement and administration, such as excess insurance, safety program expenses, and general overhead. These exclude expenses associated with loss settlements (Indemnity/Medical, BI/PD), legal expenses associated with individual claims (ALAE), and claims administration (ULAE).

**Outstanding Losses** - Losses that have been incurred but not paid. This is the ultimate value of losses less any amount that has been paid.

Paid Losses - Losses actually paid on all reported claims.

**Program Losses** - Losses, including ALAE, limited to the SIR for each occurrence.

**Reported Losses** - The total expected value of losses as estimated by the claims administrator. This is the sum of paid losses and case reserves.

**Self-Insured Retention (SIR)** - The level at which an excess insurance policy is triggered to begin payments on a claim. Financially, this is similar to an insurance deductible.

**Severity** - Average claim cost.

**Ultimate Losses** - The value of claim costs at the time when all claims have been settled. This amount must be estimated until all claims are actually settled.

**Unallocated Loss Adjustment Expenses (ULAE)** – Claim settlement expenses that cannot be directly attributed to individual claims (e.g., claims adjusters' salaries, taxes, etc.)

### Funding Guidelines for Outstanding Liabilities at June 30, 2019

(A)	Estimated Ultimate Losses Incurred through 6/30/19: (From Appendix G)			\$16,407,000		
(B)	Estimated Paid Losses through 6/30/19: (From Appendix G)			14,450,000		
(C)	Estimated Liability for Claims Outstanding at 6/30/19: (From Appendix G)			\$1,957,000		
(D)	Estimated Liability for Outstanding Claims Administration Fees at 6/30/19: (From Appendix F)			30,000		
(E)	Total Outstanding Liability for Claims at 6/30/19: ((C) + (D))			\$1,987,000		
(F)	Reserve Discount Factor (Based on a Discount R (Appendix I, Page 1, (G))	ate of 2.5%.):		0.943		
(G)	Discounted Outstanding Liability for Claims at 6/30/19: ((E) x (F))		,	\$1,873,000		
		Marginally Acceptable		Recommended		Conservative
	Confidence Level of Adequacy:	70%	75%	80%	85%	90%

(J)	Total Required Assets at 6/30/20: ((G) + (I))	\$1,654,000	\$1,729,000	\$1,819,000	\$1,930,000	\$2,077,000
(K)	Estimated Total Assets at 6/30/20: (From Appendix L, Page 1)	4,776,000	4,776,000	4,776,000	4,776,000	4,776,000
(L)	Indicated Funding Redundancy/ (Deficiency): ((K) - (J))	\$3,122,000	\$3,047,000	\$2,957,000	\$2,846,000	\$2,699,000

### Funding Options for Program Year 2019-2020 (SIR = \$100,000)

				Dollar Amount	Payroll Rate	
(A)	Estimated Ultimate Losses Incurred in Accident Year 2019-2020: (From Appendix G)			\$482,000	\$0.348	
(B)	Estimated Claims Administration Fees Incurred in Accident Year 2019-2020: (From Exhibit 5, Page 1, (L))			30,000	0.022	
(C)	Total Claims Costs Incurred in Accident Year 2019-2020: ((A) + (B))			\$512,000	\$0.370	
(D)	Loss Discount Factor (Based on a Discount Rate of 2 (Appendix I, Page 2, (G))	.5%.):		0.953		
(E)	Discounted Total Claims Costs Incurred in Accident Year 2019-2020: ((C) x (D))			\$488,000	\$0.352	
		Marginally Acceptable		Recommended		Conservative
<b>(</b> E)	Confidence Level Forton	70%	75%	80%	85%	90%
(F)	Confidence Level Factor: (From Appendix J)	1.188	1.278	1.384	1.517	1.694
(G)	Margin for Adverse Experience: ((E) x [(F) - 1])	92,000	136,000	187,000	252,000	339,000
(H)	Recommended Funding in 2019-2020 for Claims Costs and Other Expenses: ((E) + (G))	\$580,000	\$624,000	\$675,000	\$740,000	\$827,000
(I)	Budgeted Non Claims Related Expenses: (Provided by the County)	1,845,000	1,845,000	1,845,000	1,845,000	1,845,000
(J)	Recommended Funding in 2019-2020 for Claims Costs, Other Expenses, and Non Claims Related Expenses: ((H) + (I))	\$2,425,000	\$2,469,000	\$2,520,000	\$2,585,000	\$2,672,000
(K)	Rate per \$100 of Payroll: ((J) / \$1,385,628)	\$1.750	\$1.782	\$1.819	\$1.866	\$1.928

Payroll rates are per hundred dollars of 2019-2020 payroll of \$138,562,800.

### Funding Options for Program Year 2020-2021 (SIR = \$100,000) Five-Year Funding Plan

				Dollar Amount	Payroll Rate	
(A)	Estimated Ultimate Losses Incurred in Accident Year 2020-2021: (From Appendix G)			\$520,000	\$0.375	
(B)	Estimated Claims Administration Fees Incurred in Accident Year 2020-2021: (From Exhibit 5, Page 1, (L))			33,000	0.024	
(C)	Total Claims Costs Incurred in Accident Year 2020-2021: ((A) + (B))			\$553,000	\$0.399	
(D)	Loss Discount Factor (Based on a Discount Rate of 2 (Appendix I, Page 2, (G))	2.5%.):		0.953		
(E)	Discounted Total Claims Costs Incurred in Accident Year 2020-2021: ((C) x (D))			\$527,000	\$0.380	
		Marginally Acceptable		Recommended		Conservative
<b>(-</b> )	0.51	70%	75%	80%	85%	90%
(F)	Confidence Level Factor: (From Appendix J)	1.188	1.278	1.384	1.517	1.694
(G)	Margin for Adverse Experience: ((E) x [(F) - 1])	99,000	147,000	202,000	272,000	366,000
(H)	Recommended Funding in 2020-2021					
()	for Claims Costs and Other Expenses: ((E) + (G))	\$626,000	\$674,000	\$729,000	\$799,000	\$893,000
(I)	Budgeted Non Claims Related Expenses: (Provided by the County)	1,845,000	1,845,000	1,845,000	1,845,000	1,845,000
(J)	Annual Funding for the June 30, 2020 Redundancy/(Deficiency): (Exhibit 1, Page 2, (L) / 4.763)	655,000	640,000	621,000	598,000	567,000
(K)	Recommended Funding Including Recognition of the June 30, 2020 Redundancy/(Deficiency):	\$1,816,000	\$1,879,000	\$1,953,000	\$2,046,000	\$2,171,000
	((H) + (I) - (J))	φ1,010,000	φ1,073,000	φ1,900,000	φ2,040,000	φ2,171,000
(L)	Rate per \$100 of Payroll: ((K) / \$1,385,628)	\$1.311	\$1.356	\$1.409	\$1.477	\$1.567

Payroll rates are per hundred dollars of 2020-2021 payroll of \$138,562,800.

### IBNR as of 6/30/20 at Expected Claims Level

			Estimated		
			Percent of		
			IBNR		
		Estimated	Reported		Estimated
		IBNR	Between	Estimated	IBNR

### Notes:

- (A) From Exhibit 4, Page 1.
- (B) Provided by the County. These losses exclude amounts incurred above the County's SIR for each year.
- (C) (A) (B).
- (D) Percentage of incurred but not reported (IBNR) expected to be reported between 7/1/19 and 6/30/20. The percentage is based on the development pattern selected in Appendix A.
- (E) ((A) (B)) x (D).
- (F) (A) (B) (E).

This exhibit shows the calculation of the amount of incurred but not reported losses we expect as of 6/30/20. This amount is dependent on both the strength of the case reserves and the average frequency and severity of the losses incurred.

This exhibit summarizes the results of the actuarial methods we have applied to estimate ultimate losses for each year. It is important to apply a number of estimation methods because each one relies on specific assumptions about the claims process that tend to hold generally true, but that may be violated in specific situations. Thus, the more estimation methods that can be applied, the better.

County of Humboldt - Liability

## Selection of Projected Limited Loss Rate and Projection of Program Losses and ULAE

#### Notes:

- (A) From Exhibit 4, Page 2, Column (F). For purposes of projecting future losses, losses are capped at \$100,000 per occurrence.
- (B) From Appendix E, Page 1, Column (B).
- (C) (A) x (B).
- (D) From Appendix N, Page 2, Column (G).
- (E) (C)/(D).
- (F) Selected based on (E).
- (G) Based on a Burr distribution, a mathematical model of claim sizes.
- (H) From Appendix E.
- (I) (F) x (G) x (H).
- (J) From Appendix N, Page 2, Column (G).
- (K) (I) x (J).
- (L) Based on an estimated claim closing pattern and the County's historical claims administration expenses.
- (M) (K) + (L).

This exhibit shows the calculation of future loss costs based on the past loss rates. The projections will be accurate only to the extent that what has happened in the past is representative of what will happen in the future.

#### Notes:

- (A) Years are 7/1 to 6/30.
- (B) Provided by the County. These losses exclude amounts over \$100,000 per occurrence.
- (C) From Appendix A, Page 2.
- (D) (B) x (C). These estimated losses exclude amounts over \$100,000 per occurrence.
- (E) Losses capped at the County's SIR. Amounts are provided by the County.
- (F) Derived from factors on Appendix A, Page 4.
- (G) (E) x (F).

This method tends to understate ultimate losses for the most recent several years because the large losses for those years generally have not yet emerged at the time of our review.

This exhibit shows the calculation of estimated ultimate losses for each year based on paid losses and case reserves as reported by the claims administrator. These losses tend to "develop" or change from period to period as more information becomes available about the cases. This development tends to follow quantifiable patterns over time.

#### Notes:

- (A) Years are 7/1 to 6/30.
- (B) Provided by the County. These losses exclude amounts over \$100,000 per occurrence.
- (C) From Appendix B, Page 2.
- (D) (B) x (C). These estimated losses exclude amounts over \$100,000 per occurrence.
- (E) Losses capped at the County's SIR. Amounts are provided by the County.
- (F) Derived from factors on Appendix B, Page 4.
- (G) (E) x (F).

This method tends to understate ultimate losses for the most recent several years because the large losses for those years generally have not yet emerged at the time of our review.

This exhibit shows the calculation of estimated ultimate losses for each year based on paid losses as reported by the claims administrator. These losses tend to "develop" or change from period to period as more information becomes available about the cases. This development tends to follow quantifiable patterns over time.

#### Notes:

- (A) From Appendix N, Page 2, Column (G).
- (B) Provided by the County. These losses exclude amounts incurred above the County's SIR for each year.
- (C) From Appendix A, Page 1, Column (F).
- (D) 1 1 / (C).
- (E) From Appendix C, Page 3, Column (H).
- (F) (A) x (D) x (E).
- (G) (B) + (F).

This exhibit shows the calculation of ultimate losses based on the assumption that there is an underlying relationship between losses and exposure that changes in regular ways over time. The method relies on the premise that the losses that are currently unreported will cost what this relationship would suggest.

#### Exposure and Development Method Based on Paid Losses

				Percentage			
		Paid	Loss	of Losses		Incurred	Ultimate

#### Notes:

- (A) From Appendix N, Page 2, Column (G).
- (B) Provided by the County. These losses exclude amounts paid above the County's SIR for each year.
- (C) From Appendix B, Page 1, Column (F).
- (D) 1 1 / (C).
- (E) From Appendix C, Page 3, Column (H).
- (F) (A) x (D) x (E).
- (G) (B) + (F).

This exhibit shows the calculation of ultimate losses based on the assumption that there is an underlying relationship between losses and exposure that changes in regular ways over time. The method relies on the premise that the losses that are currently unpaid will cost what this relationship would suggest.

#### Exposure and Development Method

Accident Year	Composite Exposures (A)	Ultimate Limited Losses (B)	Trend Factor (C)	Trended Limited Losses (D)	Trended Limited Loss Rate (E)	Limited Loss Rate (F)	Factor to SIR (G)	Program Loss Rate (H)

Average 13/14-17/18 Limited Severity: 7,337
Average 14/15-18/19 Limited Severity: 6,631

Selected Limited Severity: \$8,000

Prior: \$8,000

#### Notes:

- (A) Selected average of results from Appendices A, B, and C.
- (B) Appendix D, Page 3, Column (C).
- (C) (A)/(B).
- (D) From Appendix E, Page 1, Column (J).
- (E) (C) x (D).
- (F) Selected Limited Severity / (D).
- (G) Based on a Burr distribution, a mathematical model of claim sizes.
- (H) (F) x (G).

This exhibit shows the calculation of the historical average cost per claim, or severity. The observed average severity is used in the method shown on page 1 of this Appendix.

## Frequency and Severity Method Projection of Ultimate Claims

2005-2006	97	1.000	97	0.973
2006-2007	88	1.000	88	0.800
2007-2008	77	1.000	77	0.692
2008-2009	61	1.000	61	0.560
2009-2010	65	1.000	65	0.596
2010-2011	81	1.000	81	0.726
2011-2012	70	1.000	70	0.616
2012-2013	72	1.000	72	0.670
2013-2014	44	1.000	44	0.405
2014-2015	68	1.001	68	0.630
2015-2016	64	1.002	64	0.599
2016-2017	63	1.007	63	0.583
2017-2018	82	1.027	84	0.743
2018-2019	41	1.386	57	0.499
Total	3,246		3,264	0.717

#### Notes:

- (A) Provided by the County.
- (B) From Appendix D, Page 6.
- (C) (A) x (B).
- (D) (C) / [Appendix D, Page 3, (D)] x [Appendix D, Page 3, (F)].

This exhibit shows the calculation of estimated ultimate claims for each year based on reported claims as provided by the County. These numbers of claims tend to "develop" or change from period to period as more claims are filed. This development tends to follow quantifiable patterns over time.

#### Frequency and Severity Method Closed Claim Count Development

Accident Year	Claims Closed as of 6/30/2019 (A)	Closed Claim Development Factor (B)	Ultimate Claims (C)	Trended Claim Frequency (D)

#### Notes:

- (A) Provided by the County.
- (B) From Appendix D, Page 7.
- (C) (A) x (B).
- (D) (C) / [Appendix D, Page 3, (D)] x [Appendix D, Page 3, (F)].

This exhibit shows the calculation of estimated ultimate claims for each year based on closed claims as provided by the County. These numbers of closed claims tend to "develop" or change from period to period as more claims are closed. This development tends to follow quantifiable patterns over time.

#### Notes:

(A) No benefit level adjustment applied.

(B) - (E) (A) adjusted for a 2.5% annual loss rate trend.

(F) - (I) (A) adjusted for a 0.0% annual frequency trend.

(J) (A) adjusted for a 2.5% annual severity trend.

This exhibit shows the calculation of the ways in which we expect claims costs to have changed over the past twenty years due to changes in inflation.

(G) Total ULAE Outstanding as of 6/30/19:

\$30,366

#### Notes:

- (A) We assume fiscal years will be 7/1 to 6/30.
- (B) Based on an estimated claim closing pattern.
- (C) Based on claims administration payment information provided by the County.
- (D) We assume ULAE costs will increase at 5.0% per year.
- (E) (C) x (D).
- (F) (B) x (E).
- (G) Total of Column (F).

This exhibit shows the calculation of the outstanding ULAE based on the expected pattern of claims closings and assumptions about future claims administration costs per open claim.

Notes appear on the next page.

#### Payment and Reserve Forecast

#### Notes to previous page:

- Accident Year is associated with date of loss. Calendar Period is associated with date of transaction. For example, for the losses which occurred during 2017-2018, \$277,196 is expected to be paid between 7/1/19 and 6/30/20, \$356,771 will have been paid by 6/30/20, and the reserve for remaining payments on these claims should be \$354,229.
- Ultimate Losses for each accident year are from Exhibit 4, Page 1.
- Paid in Calendar Period is a proportion of the Outstanding Liability from the previous calendar period. These proportions are derived from the paid loss development pattern selected in Appendix B. For example, \$166,133 = \$354,229 x 46.9%.
- Paid to Date is Paid in Calendar Period plus Paid to Date from previous calendar period. For example, \$522,904 = \$166,133 + \$356,771.
- Outstanding Liability is Ultimate Loss minus Paid to Date. For example, \$354,229 = \$711,000 - \$356,771.

This exhibit shows the calculation of the liability for outstanding claims as of the date of evaluation, the end of the current fiscal year, and the end of the coming fiscal year. It also shows the expected claims payout during the remainder of the current fiscal year and the coming fiscal year. Refer to the Totals at the end of the exhibit for the balance sheet information. The top parts of the exhibit show information for each program year.

Note: Current (short term) liabilities are the portion of the total estimated liability shown on Appendix G that is expected to be paid out within the coming year. Totals may vary from Exhibit 1, due to rounding.

#### Discount Factors to be Applied to Overall Reserves

Accident Year	Full Value of Reserve at 6/30/19 (A)	Discount Factor (B)	Discounted Reserve at 6/30/19 (C)	Full Value of Reserve at 6/30/20 (D)	Discount Factor (E)	Discounted Reserve at 6/30/20 (F)
Prior	\$0	1.000	\$0	\$0	1.000	\$0

Totals	\$1,956,683		\$1,844,893	\$1,531,587		\$1,448,924

(G) Discount Factor at 6/30/19 for Overall Reserve:

0.943

(H) Discount Factor at 6/30/20 for Overall Reserve:

0.946

## Notes:

- (A) From Appendix G, Outstanding Liability at 6/30/19.
- (B) Based on Appendix I, Page 2, Column (E).
- (C) (A) x (B).
- (D) From Appendix G, Outstanding Liability at 6/30/20.
- (E) Based on Appendix I, Page 2, Column (E).
- (F) (D) x (E).
- (G) Total of (C) / Total of (A).
- (H) Total of (F) / Total of (D).

This exhibit shows the expected impact of anticipated investment income on the liability for outstanding claims at the date of evaluation and the end of the current fiscal year. For example, if the discount factor in item (G) is 0.943, the discounted liability for outstanding claims is 94.3% of the full value.

#### Calculation of Discount Factors

Payment Year	Payment Pattern	Return on Investment	Discounted Reserves	Undiscounted Reserves	Discount Factor
(A)	(B)	(C)	(D)	(E)	(F)
22	0.0%	2.5%	0.000	0.000	1.000
21	0.0%	2.5%	0.000	0.000	1.000
20	0.0%	2.5%	0.000	0.000	1.000
19	0.0%	2.5%	0.000	0.000	1.000
18	0.0%	2.5%	0.000	0.000	1.000
17	0.0%	2.5%	0.000	0.000	1.000
16	0.0%	2.5%	0.000	0.000	1.000
15	0.0%	2.5%	0.000	0.000	1.000
14	0.0%	2.5%	0.000	0.000	1.000
13	0.0%	2.5%	0.000	0.000	1.000
12	0.1%	2.5%	0.001	0.001	0.988
11	0.2%	2.5%	0.003	0.003	0.980
10	0.3%	2.5%	0.006	0.006	0.972
9	0.5%	2.5%	0.011	0.011	0.966
8	0.8%	2.5%	0.018	0.019	0.961
7	1.9%	2.5%	0.036	0.038	0.963
6	4.6%	2.5%	0.081	0.083	0.966
5	7.6%	2.5%	0.153	0.159	0.964
4	14.0%	2.5%	0.288	0.299	0.963
3	23.4%	2.5%	0.512	0.533	0.960
2	28.0%	2.5%	0.776	0.813	0.954
1	18.7%	2.5%	0.942	1.000	0.942
		(G) Discount Factor	for Future Funding	2019-2020	0.953
		(2) 2.5554111 40101	.s a.a.s i dilanig.	2020-2021	0.953

#### Notes:

- (A) This is the year of payment relative to the accident year. For example, year 7 refers to payments made in the seventh year after the inception of the accident year. We assume that payments are made at midyear.
- (B) Percent of ultimate loss paid this year. This payment pattern is based on the paid loss development pattern selected in Appendix B, Page 2.
- (C) Assumed Investment Income Rates.
- (D) Discounted Reserves at the beginning of this year is next year's Discounted Reserves discounted one year plus this year's payments discounted six months. For example, in year 2, 77.6% = [51.2% / 1.025] + [28.0% / (1.012)].
- (E) Summation of future (B) values. This is the percent of ultimate loss unpaid at the beginning of the year.
- (F) (D) / (E).
- (G) (F) at year 1, with interest accumulated for six months. We assume that the required funding is deposited at the middle of the first year.

This exhibit shows the calculation of the effect of anticipated investment income on future claims costs. Thus, if the discount factor in item (F) is 0.95, on a discounted basis, \$0.95 must be budgeted for every \$1 that will actually be paid on claims that will be incurred in the next fiscal year.

#### Confidence Level Table

Probability	Projected Losses	Outstanding Losses
95%	1.990	1.569
90%	1.694	1.404
85%	1.517	1.305
80%	1.384	1.230
75%	1.278	1.169
70%	1.188	1.118
65%	1.109	1.072
60%	1.037	1.030
55%	0.971	0.992
50%	0.909	0.956
45%	0.851	0.921
40%	0.793	0.886
35%	0.737	0.852
30%	0.680	0.818
25%	0.622	0.781

To read table: For the above retention, there is a 90% chance that final loss settlements will be less than

1.694 times the average expected amount of losses.

This exhibit shows the loads that must be applied to bring estimated losses at the expected level to the various indicated confidence levels.

## Program History

This exhibit summarizes some of the key facts about the history of the program.

## Estimated Total Assets as of 6/30/20

(A) Total Assets as of 6/30/19:	\$3,437,000
(B) Total Income to Fund during 2019-2020	
Contributions:	\$4,076,000
Interest:	45,000
Other:	0
Total Income:	\$4,121,000
(C) Total Payments from Fund during 2019-2020	
Loss and ALAE:	\$907,000
Additional Allocated Loss Adjustment Expense:	0
In-House Unallocated Loss Adjustment Expense:	30,000
Fees to Outside Administrator (TPA):	0
Excess Insurance:	1,489,000
Other:	356,000
Total Payments:	\$2,782,000
(D) Estimated Total Assets as of 6/30/20:	\$4,776,000

- (A) Provided by the County.
  (B) Provided by the County.
  (C) Provided by the County. Loss and ALAE paid is estimated in Appendix G.
  (D) (A) + (B) (C).

## Estimated Total Assets as of 6/30/21

(A) Estimated Total Assets as of 6/30/20:	\$4,776,000						
(B) Total Income to Fund during 2020-2021							
Contributions:	\$4,076,000						
Interest:	45,000						
Other:	0						
Total Income:	\$4,121,000						
(C) Total Payments from Fund during 2020-2021							
Loss and ALAE:	\$714,000						
Additional Allocated Loss Adjustment Expense:	0						
In-House Unallocated Loss Adjustment Expense:	30,000						
Fees to Outside Administrator (TPA):	0						
Excess Insurance:	1,489,000						
Other:	356,000						
Total Payments:	\$2,589,000						
(D) Estimated Total Assets as of 6/30/21:	\$6,308,000						

- (A) Appendix L, Page 1, Line (D).
  (B) Provided by the County.
  (C) Provided by the County. Loss and ALAE paid is estimated in Appendix G.
  (D) (A) + (B) (C).

Weight	15.0%	15.0%	20.0%	20.0%	15.0%	15.0%	

Notes: Monetary exposures have been adjusted for inflation before calculating the adjusted exposure measures. All exposures from page 1 have been adjusted to a common level.

Composite Exposure = (15.0% x Population) + (15.0% x Revenue (\$00)) + (20.0% x Payroll (\$00)) + (20.0% x Sheriff's Payroll (\$00)) + (15.0% x Police Vehicles) + (15.0% x (FTE)).
