The amendment of the Signs and Nameplates Ordinance is intended to implement adopted policies and to consider other revisions to ensure community compatibility. This ordinance will provide a uniform and comprehensive set of standards for the development, siting and installation of signs and billboards in the Zoning Ordinance (Section 87.3 of Chapter 3 and Section 87.2 of Chapter 4 of Division 1 of Title III of Humboldt County Code). The new ordinance proposes all the following:

- 1. Amends sections 314-87.2.1 through 314-87.2.2 and adds sections 314-87.2.3, 87.2.4,

87.2.5, 87.2.6, 87.2.7, 87.2.8, and 87.2.9 in Chapter 4 of Division 1 of Title III of the County Code for the inland areas of the County.

 Record Number: PLN-11607-CUP  
 Willow Creek area

A request for a Conditional Use Permit for 43,560 square feet of existing outdoor commercial cannabis cultivation. Propagation occurs in an approximately 1,620 square foot nursery. Water for irrigation is sourced from a 200-foot deep well and two springs registered with the State Water Resources Control Board to be used as back up water sources. Annual water use is estimated at 700,000 gallons. Water is stored in hard tanks and bladders for a total of 124,550 gallons of available storage. Drying of mature plants occurs onsite in existing outbuildings. All other processing occurs offsite at a licensed third-party facility. Electricity is sourced from generator power. Four full time employees are used and six additional part time employees are utilized during harvest activities. A Special Permit is also requested for development within the Streamside Management Area (SMA) for the continued use and maintenance of the points of diversion infrastructure and for relocation of water tanks and other infrastructure located within the SMA areas. Staff is recommending denial of the application due to the lack of available water to support cultivation activities.

*The Planning Commission adopted the resolution (Resolution 23-089). (Attachment 1) which finds that there is no evidence of sufficient water to support the proposed cultivation and therefore the findings for approval cannot be made and finds the project exempt from environmental review pursuant to Section 15270 of the CEQA Guidelines and denies the Conditional Use Permit and Special Permit application for 707 Cultivation Company, LLC with the following vote:*

- Aye: 5 - Commissioner Iver Skavdal, Commissioner Noah Levy, Commissioner Thomas Mulder, Commissioner Peggy O'Neill and Commissioner Brian Mitchell

Willow Creek area

Conditional Use Permit for 22,276-square-feet (SF) of existing cannabis cultivation consisting of 7,340 SF of mixed-light greenhouse cultivation and 14,936 SF of outdoor cultivation on a 160-acre parcel. A Special Permit is also requested for development within the Streamside Management Area (SMA) for the continued use and maintenance of the point of diversion infrastructure. Irrigation water is diverted during winter months from an unnamed Class II spring. Additional sources for commercial cannabis irrigation include a proposed 300,000-gallon rainwater catchment pond. Existing available water storage includes 55,500 gallons storage. Estimated annual water usage is 46,650 gallons (1.9 gallons/SF/year), drawn entirely during the month of April. This amount is substantially less than most cannabis operations and is achieved by water-saving trench-cultivation methods designed to only require drip irrigation from storage a few times a week during summer months. Drying is conducted in two buildings with a combined area of 1,400 SF by two permanent employees and up to three (3) additional temporary staff. All processing and packaging will occur off-site at a third-party licensed facility. Continued use of portable toilets are conditioned until a planned onsite wastewater septic system can be constructed. Historically, solar panels provide most electricity (85 percent) and two Honda EU 3000iS generators are used to accommodate the remaining electrical demand. If approved, the project is proposed to be conditioned to transition to 100 percent on-site renewable energy by January 1, 2026.
