Subject: Cat 259D3 mulcher quote

Thomas,

Attached is the quote and spec sheets we spoke about regarding the 259D3 mulcher set up. As per our conversation, I have included the HM215 mulcher, 74" gp bucket, 48" pallet forks, x2 additional counterweight kits, the rotating beacon for the roof, ballistic front door/over head guarding, debris guard kit, and turbo guard kit.

Looks like the mulcher is arriving this coming Monday, and the machine should be here the second half of August. The ballistic glass door and overhead guarding system is around 8 weeks out from HEArmor. For all the components sourced through us, it would not be out of line to think that we could have the machine ready by the end of August/ first part of September.(without the HEArmor accessories installed)

This is priced using sourcewell pricing. Please let me know if you have any additional questions regarding this.

Thank you,

Nick Hansen
