Re: Mad River Watershed protection

Dear Alan,

For 30 years in Southern Humboldt I drank pristine spring water. When I moved to Eureka in 2013 I was surprised and thrilled at the quality of water coming out of my tap.

I urge you with all my heart to protect the Mad River Watershed from industrial impacts. Do not trade our water quality for a short term economic boost that may forever harm the drinking water quality for 88,000 people.

We have something rare in the world today; good air and clean water. It is your duty to protect these.

Thank you for considering my remarks,

Anna Hamilton
