**CEQA ADDENDUM TO THE  
MITIGATED NEGATIVE DECLARATION FOR THE COMMERCIAL MEDICAL MARIJUANA LAND  
USE ORDINANCE**

**Commercial Medical Marijuana Land Use Ordinance Mitigated Negative Declaration (MND)  
(State Clearinghouse # 2015102005), January 2016**

**APN 212-041-005 & 214-233-008; 2520 French Road, Miranda area  
County of Humboldt**

**Prepared By  
Humboldt County Planning and Building Department  
3015 H Street, Eureka, CA 95501**

**April 2026**

## Background

**Modified Project Description and Project History** – The Commercial Medical Marijuana Land Use Ordinance (CMMLUO) established specific regulations for commercial cannabis operations in Humboldt County. These regulations were developed in concert with the Mitigated Negative Declaration (MND) that was adopted for the ordinance in order to implement the mitigation measures of the MND. The MND addressed the broad environmental impacts that could be expected to occur from the adoption and implementation of the ordinance. The MND specified that the regulations established in the CMMLUO would mitigate the impacts of existing cannabis operations by establishing regulations for an existing unregulated land use to help prevent and reduce environmental impacts that are known to result from unpermitted baseline cultivation operations. Commercial cannabis cultivation in existence as of December 31, 2015 was included in the environmental baseline for the MND and the MND states that “Bringing existing operations into compliance will help to attenuate potential environmental effects from existing cultivation activities, including aesthetic impacts resulting from improper operation or poor siting.” The current project was contemplated by the MND and compliance with the provisions of the CMMLUO will fully mitigate all environmental impacts of the project to a less than significant level.

A Conditional Use Permit for 40,000 square feet of existing outdoor commercial cannabis cultivation and 4,000 square feet of ancillary propagation. All water for cultivation is sourced from a permitted well. The water supply and all cultivation occur on a contiguous parcel APN 214-233-008. Existing available water storage is 101,200 gallons in a series of hard-sided tanks. Estimated annual water usage is 194,500 gallons. Drying, curing, and all other processing occurs APN: 212-041-005. A maximum of seven people will be onsite during peak operations. When needed, power will be provided by a renewable power source.

The modified project is consistent with the adopted MND for the CMMLUO because it complies with all standards of the CMMLUO which were intended to mitigate impacts of existing cultivation. These include ensuring supplemental lighting and security lighting adheres to Dark Sky Association standards and ensuring project related noise does not harass nearby wildlife which will limit impacts to biological resources as a result of light and noise.

**Purpose** - Section 15164 of the California Environmental Quality Act (CEQA) provides that the lead agency shall prepare an addendum to a previously certified Mitigated Negative Declaration (MND) if some changes or additions are necessary but none of the conditions described in Section 15162 calling for a subsequent EIR or Negative Declaration have occurred. Section 15162 states that when an EIR has been certified for a project, no subsequent EIR shall be prepared for that project unless the lead agency determines, on the basis of substantial evidence in the light of the whole record, one or more of the following:

1. Substantial changes are proposed in the project which require major revisions of the previous MND due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
2. Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous MND due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or
3. New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous MND was certified as complete, shows any of the following: A) the project will have one or more significant effects not discussed in the previous MND; B) significant effect previously examined will be substantially more severe than shown in the previous MND; C) mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or D) mitigation measures or alternatives which are considerably different from those analyzed in the previous MND would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

### **Summary of Significant Project Effects and Mitigation Recommended**

A review of Appendix G impacts:

**Aesthetics**: The project is for 40,000 square feet (SF) of existing outdoor cannabis cultivation in addition to 4,000 SF of ancillary propagation. The project will not significantly impact scenic vistas or public views as the project will occur within an existing open area that is surrounded by forested land. The project is consistent with the agricultural visual character of the area. The project will not create a source of light or glare. Less than significant impact.

**Agriculture and Forestry Resources**: The project involves an agricultural activity on a parcel zoned as Timberland Production Zone (TPZ). The project will not convert prime farmland or conflict with existing zoning for agricultural use or Williamson Act contract. A Less Than 3 Acre Conversion Exemption was granted in 2015 and a Registered Professional Forester determine that project areas occur in former log landings and previously converted areas. No additional tree removal is proposed or authorized by this permit. Less than significant impact.

**Air Quality**: Minimal construction activities are associated with the project. Construction activities included development of the cultivation and nursery spaces, storage areas, and water storage tanks, which required minimal grading for placement. The project will not expose sensitive receptors to pollutants or create objectionable odors affecting a substantial number

of people. The project would not result in significant sources of greenhouse gas emissions. The project does utilize gravel roads, and traffic on gravel roads contribute to PM<sub>10</sub>, for which the North Coast Air Basin is already in non-attainment. As such, the continued use of the road for the project is not a substantial change or additional significant impact not considered under the MND for the CMMLUO. Less than significant impact.

**Biological Resources:** The timberland conversion evaluation report and floristic survey identified the presence of sensitive species on the project parcels. The proposed project will utilize the pre-existing disturbed areas or clearings in existence prior to baseline. The project has been conditioned to ensure lighting associated with the project adheres to Dark Sky Association standards including security lighting. Conditions require the applicant to implement light and noise attenuation measures, refrain from using synthetic netting for erosion control, ensure refuse is contained in wildlife proof storage, and refrain from using anticoagulant rodenticides to further protect wildlife. It was determined that the project and operations will have less than significant impacts with adherence to the recommended conditions of approval. Less than significant impact.

**Cultural Resources:** The project was referred to the Northwest Information Center and local tribes. The project include the standard inadvertent discovery protocol. Less than significant impact.

**Energy:** The project is for outdoor cannabis cultivation with drying and processing on-site. When needed, power will be provided by a renewable, solar power source. Generators are limited to emergencies only. Less than significant impact.

**Geology and Soils:** No new structures are proposed that would expose people to risk of life from earthquakes. The project occurs on ranges from 22% to 45% slopes, and cultivation activities are limited to the immediate area surrounding the greenhouses and gardens. Additionally, irrigation runoff and erosion control measures are implemented. Less than significant impact.

**Greenhouse Gas Emissions:** Power is provided by renewable solar sources with generators reserved for emergency use only. Less than significant impact.

**Hazards and Hazardous Materials:** The project will store fertilizers, herbicides, and fuel in compliance with the California Water Resource Control Board pursuant to Cannabis General Order No. WQ 2019-0001-DWQ. The project does not expose the public to hazards. The project is in a rural area rated as a very high fire risk area; however, no wood framed structures will be constructed as part of this project. The project would not impair emergency response or create a significant risk from wildfire. Less than significant impact.

**Hydrology and Water Quality:** The project will not degrade any water sources or contribute to sedimentation, as irrigation runoff, erosion control, and watershed protection measures are

implemented by the project, as described in the Cultivation and Operations Plan and Site Management Plan. Less than significant impact.

**Land Use and Planning:** The project proposes an agricultural activity on a parcel zoned as Timberland Production Zone (TPZ), in which all general agricultural uses are principally permitted. The project will not physically divide an established community or result in a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect. No impact.

**Mineral Resources:** No mining is proposed. The project will not result in the loss of availability of a known mineral resources that would be of value to the region and the residents of the state. The project will not result in the loss of availability of a locally important mineral resource recover site. No impact.

**Noise:** The project is in a rural portion of the County in an existing open area, surrounded by forested land. The project will not result in the generation of excessive groundborne vibration or noise levels. Project noise is limited to 50dB at 100 feet from source or forest edge, whichever is closer. Less than significant impact.

**Population and Housing:** The project is for outdoor cannabis cultivation. No housing is proposed nor is any removal of housing proposed. The project will not induce substantial unplanned population growth in an area nor displace substantial numbers of existing people or housing necessitating the construction of replacement housing. No impact.

**Public Services:** The project is for existing cannabis cultivation with ancillary propagation and processing activities on a parcel where agricultural activities are principally permitted. The project will not increase the need for fire or law enforcement services. The project is not within 600 feet of a school or park. Less than significant impact.

**Recreation:** The project site is private property and contains no recreational facilities nor are recreational facilities accessed through the property. No impact.

**Transportation:** Up to seven people may be onsite during peak operations. Access to the site is via French Road which is privately maintained. Review of the road indicates in functions as a category 4 and can accommodate the traffic generated from the project. Less than significant impact.

**Tribal Cultural Resources:** The project is within the historic aboriginal territory of the Bear River Band of the Rohnerville Rancheria and the Intertribal Sinkyone Wilderness Council. The project includes the standard inadvertent discovery protocol. Less than significant impact.

**Utilities and Service Systems:** Trash and recycling are stored then hauled to an approved transfer station/disposal facility. Toilet and handwashing are available through portable

facilities. Water for propagation and cultivation will be sourced from a permitted hydrologically disconnected well and associated tanks. Less than significant impact.

**Wildfire:** The project will not interfere with any evacuation plan. The project will not develop any significant new structures that will increase the risk of wildfire. Less than significant impact.

No changes are proposed for the original MND recommended mitigations. The proposal to authorize the continued operation of an existing cannabis cultivation site consisting of 40,000 square feet (SF) of existing outdoor cannabis cultivation and 4,000 SF of ancillary propagation and drying activities is fully consistent with the impacts identified and adequately mitigated in the original MND. The project as conditioned to implement responsible agency recommendations, results in no significantly adverse environmental effects beyond those identified in the MND. Compliance with the CMMLUO ensures consistency with the adopted MND and provides for mitigation of all project related impacts to a less than significant level.

In reviewing the application for consistency with the adopted MND, the County considered the following information and studies, among other documents (see Attachment 3 for a complete listing of document):

1. Site Plan
2. Operations Plan
3. County GIS
4. Site Management Plan
5. Lake and Streambed Alteration Agreement
6. Well Geologic Analysis
7. Well Permit
8. Well Completion Report
9. Floristic Survey
10. Timberland Conversion Evaluation Report
11. Less Than 3 Acre Exemption

### **Other CEQA Considerations**

Staff suggests no changes for the revised project.

### **EXPLANATION OF DECISION NOT TO PREPARE A SUPPLEMENTAL MITIGATED NEGATIVE DECLARATION OR ENVIRONMENTAL IMPACT REPORT**

See **Purpose** statement above.

In every impact category analyzed in this review, the projected consequences of the current project proposal are either the same or less than significantly increased than the initial project for which the MND was adopted.

### **Project impact analysis of conformance to the Mitigated Negative Declaration Substituted Mitigation Monitoring and Reporting Program**

#### Mitigation Measure 1: Required setback from tribal cultural resources and tribal consultation process (55.4.10(o) and 55.4.10(c)).

- No known significant archaeological or historic resources occur within the project area. Ongoing conditions of approval are incorporated regarding the Inadvertent Discoveries Protocol to protect cultural resources.

#### Mitigation Measure 2: Curing violations of state, county code (55.4.11(a)).

- The project is for existing cultivation and project approval includes a compliance agreement to cure unresolved violations of state or county code.

#### Mitigation Measure 3: Required setbacks from watercourses, wetlands, and Environmentally Sensitive Habitat Areas (55.4.11(d)).

- The project is located within the inland portion of the County and is subject to the setback standards in the Streamside Management Areas and Wetlands Ordinance as well as Chapter 10 (Conservation and Open Space Elements) of the General Plan. All cultivation areas occur outside of all required SMA buffers. There are no surface waters on the parcel.

#### Mitigation Measure 4: Permitting Tiers and related requirements (55.4.8.2 et seq.)

- The project is for 40,000 square feet of existing outdoor cannabis cultivation and 4,000 square feet of ancillary propagation in a Timberland Production Zone (TPZ) which requires a Conditional Use Permit. The project complies with the requirements described in 55.4.8.2 et seq.

#### Mitigation Measure 5: Retirement, Remediation, and Relocation Program (55.4.14)

- The project is not participating in the Retirement, Remediation, and Relocation program; therefore, this mitigation measure does not apply.

#### Mitigation Measure 6: Cannabis Cultivation on Timberlands

- A Less Than 3 Acre Conversion Exemption and Timberland Conversion Evaluation were provided. There is no net increase in conversion.

#### Mitigation Measure 7: Use of fertilizer, pesticide, fungicide, rodenticide, or herbicide (55.4.11(j)).

- The project operations plan describes measures that will be taken to properly store and handle hazardous materials. Compliance with the operations plan is a condition of project approval. The use of anticoagulant rodenticide is prohibited. The project is conditioned requires the applicant to provide written compliance with the Certified Unified Program Agency (CUPA) requirements.

Mitigation Measure 8: Diversion of surface water and trucked water (55.4.11(l)-(m)).

- Water for cultivation is sourced from a permitted hydrologically disconnected well.

Mitigation Measure 9: Generator Use (55.4.11(o)).

- Generator use is limited to emergencies only.

Mitigation Measure 10: Storage of Fuel (55.4.11(p)).

- The project is conditioned that fuel shall be stored and handled in compliance with applicable state and local laws and regulations and in such a way that no spillage occurs.

Mitigation Measure 11: Performance Standards for Cultivation and Processing Activities (55.4.11(q)-(u)).

- Applicant has provided a statement declaring they are an agricultural employer as defined in the Alatorre-Zenovich-Dunlap-Berman Agricultural Labor Relations Act of 1975 (Part 3.5 commencing with Section 1140) of Division 2 of the Labor Code).
- Onsite processing is proposed and the project is conditioned to comply with applicable standards.

Mitigation Measure 12: Performance Standards for Mixed Light Cultivation (55.4.11).

- The project is for outdoor with ancillary propagation. Conditions of approval require the applicant to implement light attenuation measures. Such measures include required compliance with International Dark Sky Association standards for Lighting Zone 0 and Lighting Zone 1, and requiring the project be designed to regulate light spillage onto neighboring properties resulting from backlight, up light, or glare.

Mitigation Measure 13: Humboldt Artisanal Branding Provision (55.4.15).

- The proposed project is for more than 3,000 square feet; therefore, this measure does not apply.

Mitigation Measure 14: Sunset Clause for applications

- The application was received on December 21, 2016, prior to the sunset of the ordinance.

Based upon this review, the following findings are supported:

## **FINDINGS**

1. The proposed project will permit an existing cannabis operation and bring the operation into compliance with county and state requirements intended to adequately mitigate environmental impacts.
2. The circumstances under which the project was approved have not changed substantially. There are no new significant environmental effects and no substantial increases in the severity of previously identified effects.
3. For the current proposed project, there has been no new information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous MND was adopted as complete.

## **CONCLUSION**

Based on these findings it is concluded that an Addendum to the certified MND is appropriate to address the requirements under CEQA for the current project proposal. All of the findings, mitigation requirements, and mitigation and monitoring program of the MND, remain in full force and effect on the original project.
