Yolynn,

Please submit a complete site plan. I have attached a site plan checklist, which gives you an example of what we want to see. We will also need the following:

- Stamped and signed Engineered Grading and Fence Plans (because the fence is over 6ft)
- Complete site plan
- Archeological Protection Statement
- MWEL0

You can find all of these documents here:

<https://humboldt.gov/3385/Construction-Documents>. Please also know that we cannot issue this permit if/when the Planning Department approves the variance. Is this for an existing pond? This parcel is within the SRA area, and setbacks are 30ft around. This parcel is in the flood zone, and almost the entire parcel is in an SMA area. It would be best to contact Planning (Cliff Johnson) so he knows this. Also, we have no record of this being a legal parcel (you want to speak with Cliff about that, too). Thanks,

Ashley Wilson
