To the Humboldt County Board of Supervisors,

I am writing to express my concern to the board about the impact that Covid-19 restrictions have put on our local community and lasting implications that closures will have on our communities health and well being. It is my firm belief that the County is capable of making the best decisions for our local community and that means making decisions based on the local data and not the Northern California data that we are being held to. Myself along with many other local businesses ask that you move us back into a workable tier so that our businesses can survive and we can continue to contribute to our community.

Thank you for your time and consideration.

Marissa Elias

Dear Members of the Board of Supervisors

Item D:

Item E:

My comment is why do we not have control of our own county when it comes to Covid and local issues? And much more!! It seems that the state government is really the ones making the decisions that should be made on a local level. Like, why do we have 3 public health officials when all the calls are made from Sacramento? Why are the closing and restrictions of our business based on the business model of a other business 'Hospital" and other areas? The actions of the county and state government to determine who will overcome and who will prosper has never happened in our countries history. These decisions need to have the control of the people at the local level!!! And why are we not in control of who provides our public services like cable and recycling and much more!!!! Its time to give back Humboldt to the people of Humboldt!!!!

Ted Vivatson
