B. Termination Without Cause. COUNTY may terminate this Agreement without cause upon thirty

(30) days advance written notice which states the effective date of the termination.

- B. Schedule of Rates. The specific rates and costs applicable to this Agreement are set forth in Exhibit B – Schedule of Rates, which is attached hereto and incorporated herein by reference as if set forth in full.
- C. Additional Services. Any additional services not otherwise provided for herein shall not be provided by CONTRACTOR, or compensated by COUNTY, without written authorization by COUNTY. 12. NUCLEAR-FREE HUMBOLDT COUNTY ORDINANCE COMPLIANCE:

By executing this Agreement, CONTRACTOR certifies that it is not a Nuclear Weapons Contractor, in that CONTRACTOR is not knowingly or intentionally engaged in the research, development, production or testing of nuclear warheads, nuclear weapons systems or nuclear weapons components as defined by the Nuclear-Free Humboldt County Ordinance. CONTRACTOR agrees to notify COUNTY immediately if it becomes a Nuclear Weapons Contractor as defined above. COUNTY may immediately terminate this Agreement if it determines that the foregoing certification is false or if CONTRACTOR subsequently becomes a Nuclear Weapons Contractor.

13. DRUG-FREE WORKPLACE CERTIFICATION:

By executing this Agreement, CONTRACTOR certifies that it will provide a drug-free workplace in accordance with the requirements of the Drug-Free Workplace Act of 1990 (California Government Code Sections 8350, *et seq.*), by doing all of the following:

- A. Drug-Free Policy Statement. Publish, as required by California Government Code Section 8355(a)(1), a Drug-Free Policy Statement which notifies employees that the unlawful manufacture, distribution, dispensation, possession or use of a controlled substance is prohibited, and specifies the actions to be taken against employees for violations.
- B. Drug-Free Awareness Program. Establish, as required by California Government Code Section 8355(a)(2), a Drug-Free Awareness Program which informs employees about:

 - 3. Any available counseling, rehabilitation and employee assistance programs; and
 - 4. Penalties that may be imposed upon employees for drug abuse violations.
- C. Drug-Free Employment Agreement. Ensure, as required by California Government Code Section 8355(a)(3), that every employee who provides services hereunder will:

 - 2. Agree to abide by CONTRACTOR's Drug-Free Policy as a condition of employment.
- D. Effect of Non-Compliance. Failure to comply with the requirements set forth herein may result in termination of this Agreement and/or ineligibility for award of future contracts.

14. INDEMNIFICATION:

- A. Hold Harmless, Defense and Indemnification. CONTRACTOR shall hold harmless, defend and indemnify COUNTY and its agents, officers, officials, employees and volunteers from and against any and all claims, demands, losses, damages, liabilities, expenses and costs of any kind or nature, including, without limitation, attorney's fees and other costs of litigation, arising out of, or in connection with, CONTRACTOR's negligent performance of, or failure to comply with, any of the duties and/or obligations contained herein, except such loss or damage which was caused by the sole negligence or willful misconduct of COUNTY.
- B. Effect of Insurance. Acceptance of the insurance required by this Agreement shall not relieve CONTRACTOR from liability under this provision. This provision shall apply to all claims for damages related to CONTRACTOR's performance hereunder regardless of whether any insurance is applicable or not. The insurance policy limits set forth herein shall not act as a limitation upon the amount of indemnification or defense to be provided hereunder.

15. INSURANCE REQUIREMENTS:

This Agreement shall not be executed by COUNTY, and CONTRACTOR is not entitled to any rights hereunder, unless certificates of insurance, or other proof that the following provisions have been

complied with, are filed with the Clerk of the Humboldt County Board of Supervisors.

A. General Insurance Requirements. Without limiting CONTRACTOR's indemnification obligations set forth herein, CONTRACTOR, and its subcontractors, shall take out and maintain, throughout the term of this Agreement, and any extensions thereof, the following policies of insurance, placed with insurers authorized to do business in the State of California with a current A.M. Bests rating of no less than A: VII or its equivalent against personal injury, death and property damage which may arise from, or in connection with, the activities of CONTRACTOR and its agents, officers, directors, employees, assignees or subcontractors:

1. Comprehensive or Commercial General Liability Insurance at least as broad as Insurance Services Office Commercial General Liability Coverage (occurrence form CG 0001), in an amount of Two Million Dollars (\$2,000,000.00) per occurrence for any one (1) incident, including, but not limited to, personal injury, death and property damage. If a general aggregate limit is used, such limit shall apply separately hereto or shall be twice the required occurrence limit.
2. Automobile/Motor Liability Insurance with a limit of liability not less than One Million Dollars (\$1,000,000.00) combined single limit coverage. Such insurance shall include coverage of all owned, hired and non-owned vehicles, and be at least as broad as Insurance Service Offices Form Code 1 (any auto).
3. Workers' Compensation Insurance, as required by the California Labor Code, with statutory limits, and Employers Liability Insurance with a limit of no less than One Million Dollars (\$1,000,000.00) per accident for bodily injury or disease. Said policy shall contain, or be endorsed to contain, a waiver of subrogation against COUNTY and its agents, officers, officials, employees and volunteers.
4. Professional Liability Insurance – Error and Omission Coverage including coverage in an amount no less than Two Million Dollars (\$2,000,000.00) for each occurrence (Four Million Dollars (\$4,000,000.00) general aggregate). Said insurance shall be maintained for the statutory period during which CONTRACTOR may be exposed to liability regarding the services provided pursuant to the terms and conditions of this Agreement. CONTRACTOR shall require that such coverage be incorporated into its professional services agreements with any other entities.

B. Special Insurance Requirements. Said policies shall, unless otherwise specified herein, be endorsed with the following provisions:

1. The Comprehensive or Commercial General Liability Policy shall provide that COUNTY, and its agents, officers, officials, employees and volunteers, are covered as additional insured for liability arising out of the operations performed by, or on behalf of, CONTRACTOR. The coverage shall contain no special limitations on the scope of protection afforded to COUNTY or its agents, officers, officials, employees and volunteers. Said policy shall also contain a provision stating that such coverage:
 - a. Includes contractual liability.
 - b. Does not contain exclusions as to property damage caused by explosion or collapse of structures or underground damage, commonly referred to as "XCU Hazards."

- c. Is the primary insurance with regard to COUNTY.
 - d. Does not contain a pro-rata, excess only and/or escape clause.
 - e. Contains a cross liability, severability of interest or separation of insureds clause.
- 2. The above-referenced policies shall not be canceled, non-renewed or materially reduced in coverage without thirty (30) days prior written notice being provided to COUNTY in accordance with the notice requirements set forth herein. It is further understood that CONTRACTOR shall not terminate such coverage until COUNTY receives adequate proof that equal or better insurance has been secured.
 - 3. The inclusion of more than one (1) insured shall not operate to impair the rights of one (1) insured against another insured, and the coverage afforded shall apply as though separate policies had been issued to each insured, but the inclusion of more than one (1) insured shall not operate to increase the limits of the insurer's liability.
 - 4. For claims related to this Agreement, CONTRACTOR's insurance is the primary coverage to COUNTY, and any insurance or self-insurance programs maintained thereby are excess to CONTRACTOR's insurance and will not be used to contribute therewith.
 - 5. Any failure to comply with the provisions of this Agreement shall not affect the coverage provided to COUNTY or its agents, officers, officials, employees and volunteers.
 - 6. CONTRACTOR shall furnish COUNTY with certificates and original endorsements effecting the required coverage prior to execution of this Agreement. The endorsements shall be on forms approved by the Humboldt County Risk Manager. Any deductible or self-insured retention over One Hundred Thousand Dollars (\$100,000.00) shall be disclosed to, and approved by, COUNTY. If CONTRACTOR does not keep all required policies in full force and effect, COUNTY may, in addition to any other available remedies, take out the necessary insurance and deduct the cost of said insurance from the monies owed to CONTRACTOR under this Agreement.
 - 7. COUNTY is to be notified immediately if twenty-five percent (25%) or more of any required insurance aggregate limit is encumbered, and CONTRACTOR shall be required to purchase additional coverage to meet the above-referenced aggregate limits.

- C. Insurance Notices. Any and all insurance notices required hereunder shall be sent to the addresses set forth below in accordance with the notice provisions described herein.

In no event shall any payment by COUNTY constitute a waiver of any breach of this Agreement which may then exist on the part of CONTRACTOR. Nor shall such payment impair or prejudice any remedy available to COUNTY with respect to the breach or default. SCOPE OF SERVICES
LACO ASSOCIATES, INC.
FOR

County of Humboldt Planning and Building Department
LACO Project No. 7451.33

County of Humboldt (Client) has requested additional professional services from LACO Associates (LACO) in furtherance of permitting standards for commercial/agricultural water supply wells.

PROJECT UNDERSTANDING

Since the adoption of the Commercial Cannabis Land Use Ordinance (CCLUO) on May 8, 2018, which restricted the use of surface water diversions for cannabis irrigation, the County has received well permit applications from cannabis facilities requesting to install new groundwater wells. The CCLUO already limits the number of new cannabis groundwater wells by geographic area; however, the County would like to streamline the process for studies evaluating hydrologic connectivity as these studies can be time consuming, hard to obtain, and costly.

In August 2021, the Humboldt County Planning and Building Department contracted with LACO to develop a working analytical model for evaluating the impacts of well use on nearby wells, structures, and surface water streams, as a supplement to the models employed to support the GSP. The new analytical model uses stream locations, drainage areas, well locations, geology, and anticipated well production rates to provide a holistic, composite snapshot of an area, thereby allowing the County to more accurately and efficiently determine potential impacts of groundwater wells.

The working analytical model calculates the impacts on a stream reach caused by groundwater production from multiple wells. The model has not been calibrated or validated. LACO will take past and present real-world data and compare them to predictions in order to refine the model. Work to date has allowed LACO and the County to develop a pilot program covered by a previous agreement. The current scope of work covers implementing the pilot program and will focus on collecting field data in order to calibrate and validate the model. We anticipate this phase to occur over approximately two years and have planned to submit an interim report at or around the end of the first year. The final report should facilitate the development of a web-based application or GIS-maps that will allow County planning staff to assess the need for additional site-specific evaluation using information provided in applications for individual well permits.

In addition to LACO's planned work, we are coordinating with the Engineering Department at Cal Poly Humboldt (CPH). Their input on specific work scopes is discussed below; however, where they are most valuable will be in providing peer review of the work as it progresses. CPH is anticipated to perform approximately 10 percent of the work scope.

- Participation in public meetings (four included in this agreement)
- Budget review and cost reporting

Phase 2000: Data Collection. The following is our current estimate of the field data requirements to complete this stage

of project. Slight changes may develop during the two-year course of study; substantive changes will be discussed with County prior to implementation.

- Create short list of areas from which to select wells to include and their associated stream reaches based on mapped information compiled to date. Wells and streams will be selected based on the combination of aquifer type (confined versus unconfined), availability of nearby wells that can be used as pumping test observation wells, proximity to streams, and landowners that are willing to participate in the program. We will focus on wells in the Eel River Watershed as that is represented by existing well owners and proposed permit applicants. This short list will likely include up to approximately 20 locations.

We will select wells in three to five sub watersheds (as defined by the hydrologic unit classification (HUC) system) with a minimum of two wells per unit and including both confined and alluvial aquifers where possible. The actual units selected will be identified by well density, surface water user density, stream density, potential presence of groundwater-dependent ecosystems and other factors that together help define the level of sensitivity of a particular unit to additional groundwater use. Our goal is to select units that while generally representative, provide sufficient information in evaluating cumulative impacts of groundwater use.

- Conduct field visits to help identify final preferred well locations, evaluating the sites based on property, accessibility, and proximity to streams or other surface water bodies.
- Select up to 10 wells in both confined and unconfined aquifers. Existing wells will include both cannabis irrigation and domestic wells as this will provide data from a wider view of both aquifers as domestic wells tend to be installed at shallower depths. And since alluvial wells are more likely to be domestic rather than irrigation, including them in this study improves our opportunity for finding appropriate wells with landowners willing to participate.
- Up to three surface water monitoring stations, which may include stilling wells installed by LACO as determined by access and applicability, at upstream and downstream ends of selected stream reaches with water level transducers in each for the collection of stream height measurements during test period.
- Procure and install data recorders including both water level transducers and water discharge recorders in each well and rain gauges at each site (estimated to need 10 each).
- Develop and install a data collection telemetry system. The data telemetry system will be developed in coordination with Cal Poly Humboldt's Engineering Department. We anticipate using WiFi and/or radio transmitters depending on availability at each site. The transducers will broadcast data at predetermined intervals allowing staff to monitor the health of the system and rapidly correct malfunctions as they occur.
- Log soils and obtain soil samples from the following:
 - During the installation of up to two new wells (drilling costs to be borne by applicant); and
 - While installing up to two temporary observation wells for use during pumping tests (drilling costs covered by this agreement)
- Soil samples will be tested for grain size distribution using a combination of sieve and hydrometer analyses. We will use these data to plan the pumping test and to corroborate the pumping test results.
- Conduct up to four 24-hour pumping tests using down-hole pressure transducers to collect water level measurements. These tests require near-continuous monitoring to ensure that data collection devices function properly, well pumps are not dewatered and collection of periodic manual measurements to calibrate the electronic data. This assumes landowner can provide a powered pump, tanks for water storage, and that pumped water can be discharged on-site.
- Analyze pumping test data to determine aquifer parameters (such as transmissivity, hydraulic conductivity, and radius of influence) as appropriate depending on the individual test program. Where observation wells are included, we can determine a more complete three-dimensional representation of the aquifer, although it is unlikely that we will have access to observation wells at all pumping test locations. Installation of two observations wells is included in this budget. There may be test locations with access to a nearby well appropriate for use in the pumping tests.
- During the pumping tests, we will record the following from water samples using field meters: total dissolved solids, pH, temperature, dissolved oxygen, and electrical conductivity.

- Collect water samples from wells during pumping tests and coincident samples from associated streams for analysis of stable isotopes ($\delta^{18}\text{O}$ and $\delta^2\text{H}$) and major ions (sodium plus potassium, calcium, magnesium, chloride, bicarbonate, and sulfate) to help identify waters with the same source.

Phase 3000: Reporting and Analysis.

- Develop internal data portal for managing the large volume of data that will be generated over the course of the study by the field devices (may be turned over to County following project for future data collection). Cal Poly Humboldt will take the lead on developing and hosting the data portal if requested by the County.
- Monitor data telemetry with troubleshooting and anticipated occasional repairs to system.
- Submit quarterly progress reports.
- Submit one interim and one final report. (If project goes beyond two years, additional interim reports may be provided at additional cost.) These reports will detail findings to date, recommendations for modifications as appropriate, and the final report will include the path forward for future well approvals as appropriate.

The goal of the study is to construct a "tool" that allows County Planning staff to make a first-line assessment of the need for a site-specific hydrogeological analysis. Our ability to provide this is determined by the results of the study and is not guaranteed. If successful, however, we will provide:

- A framework for GIS application, to be managed by County personnel, that will allow Planning staff to estimate groundwater impacts using project location and planned use inputs from new well projects; or
- A gridded map zoned "high," "medium," or "low" levels of presumed impacts so that Planning staff can assess need for site-specific hydrogeological studies based on location. We will work with County GIS staff to develop procedures to enable them to periodically update the map.
