Greetings, to whom it may concern,

I am writing to strongly urge our local legislators to pause mass installation of 5g. I think it is crucial to learn more about the potential health effects before moving forward with such a plan.

I imagine it is unlikely that installation would be completely cancelled but there should be enough of a waiting period for scientific evidence to come forth as to whether or not this technology is safe. Perhaps small area(s), business not residential, and/or regions where the majority are in favor, could have 5g installed, and then one year or more can elapse as a trial period to determine whether to install in more areas. As someone who has experienced negative health effects from EMFs, I believe 5g is a huge and possibly regrettable decision that should be tested and weighed carefully.

Thank you for your consideration,  
Sincerely,  
Carey Tinsley  
Kneeland, CA
