Hello, I had a few concerns with the proposed project. I've never met the landowner but they travel across three of my parcels, with an easement. Since owning the property I have witnessed trash on the road, at one point a gun was fired off easement. I've firewood stolen and followed the trail to their gate. One concern I have is the 13 employees. The concern is fire safety, trash, and respecting private property, also theft. I'm concerned with 13 employees Vehicles impacting the road, and respecting private property. I have personally given rides to workers who were dropped off. Stranded came looking for help. Just a few concerns thank you for your time
