I am opposed to this new grow, based on the fact that California is in a HISTORIC drought! We are way behind on rain, the Bay Area and Southern California are already implementing water restrictions, and Humboldt will not be far behind should the dry pattern continue as expected.

The amount of water needed for this grow is unbelievable in an area where residents depend on well water, and are already concerned about their wells going dry. Who will pay when people who have a dry well and need water trucked in? How is it even remotely fair to residents when another large grow is permitted and residents are already having well and water issues and concerns? Humboldt is awash in grows, and there is absolutely no need for another, especially during this unprecedented drought,

Another concern is the traffic on a winding road that is already poorly maintained by the county. Another grow means more soil trucks, more traffic when they bring in people to trim, and that is unsustainable in a rural neighborhood.

Please do not allow permitting for this grow!

Thank you,
Andrea McClure
