Date: 4/27/16

To: Local media and anyone who cares about real world truths

Subject: Real world Truths

As a rural and working person and field forester for fifty plus years, I have learned a lot. I have written two books about the listed subject, but I have found few in my local area, Humboldt County, care about the subjects listed below.

- Big trees are saved that die, go unused, and are managed to burn
- Properly stored water (that helps fish and tourism) is allowed to flood and runs wastefully unused to the sea
- Good and bad of marijuana is promoted which has competing values for timber owners and provided open space leaving for better pastures, and commercial growers licking their chops.
- Promoting open space which helps low paying tourism
- Properly applied disturbance needed by many species is not promoted
- Closest harbor to the orient sits idle
- Jobs which help a private economy and increase taxes are destroyed
- Taxpayer dollars are promoted which hurt a private economy

We could be a very prosperous area if the listed items were properly handled, and proper handling involves controlled fire, helping many species, and increasing tax revenues through creation of a healthy private economy.

Yep, we are **not** doing real good. We have few controlling things who know real world truths.
