Charles L. Cranco

1/9/17

To: Everyone

Subject: Real World Realities

All the rain reminds me of my Humboldt State college days back in the sixties.

Maybe this area is better prepared for excessive rain and flooding, and maybe the old weather patterns are not coming back when bridges would go-out and Humboldt college students had to caravan and fly home during school breaks. I was reminded when I got soaked going to class, and I learned to buy a sissy umbrella

I was reminded of when I was blind and wore my glasses paying football for coach Sarboe, when I was a three year letterman and playing first team center on the varsity Lumberjack football at Humboldt State College in the mud bowl, when we used to beat University of Hawaii and power house teams to the north, and Humboldt used to win the Far Western Conference by beating Sacramento, University of Nevada, and Davis.

From fifty plus years as a practicing field forester and being a rural person, I eventually learned field experience can't be beat. I have learned nothing can live without sunshine, water, and nutrients (food), and I learned more about growing and harvesting trees and fire after I left college.

From my teaching at HSU College, I found students **not** learning about the real world, how to properly harvest a beautiful tree, and how to properly grow another beautiful tree. I was reminded how insects and disease followed by destructive fire kills trees during the summer and hillsides erode and slide during winter rains. I was reminded why especially in California protectionists and preservationists use incorrect thinking pushed by the media, erroneously applied legalese, inexperienced Fourth Branch of Government (regulators), and voting minority that forces small and large ranchers and other timber owners to jump through a lot of regulatory hurdles and to not properly harvest timber. As verified by many sources, I was reminded why around 80% of the wood used in California comes from out of the state, and when all the numbers are put together, why I see Humboldt's number one private economy, timber industry, shrinking.

As a person who has experienced life's realities and who is a thinker, I know I am only on this world for a short time, and other things I think about are as follows. I see the USA in many ways a divided nation, and I see things getting interesting. For sure based on latest reports and my experiences, I am not going to San Francisco, the Bay Area, the LA area, and any heavily populated area any time soon. I believe this area is half supported by taxpayer money, and with work and payment for work going down-hill, I see the working person in trouble. My dad was maybe right in saying revolution and World War III is coming, and I am constantly reminded that no one listens to old farts like me.

Charles L. Ciano

California Registered Professional Forester (RPF) #317

(An old tired field forester no one gives much attention who has lived in a working man's world)

P.O. Box 172, Cutten (near Eureka in redwood country), CA 95534

It's clear that an Agenda is operating here. However, it has nothing to do with the people or land jurisdiction. If you intend to carry on in your world of fiction smoke & mirrors show, at the very least stop coercing the people seated here to join you in pledging allegiance to a **4-colored** flag that says Admiralty Law of the Sea Merchant –guilty until proven innocent –as if we're out on the sea of commerce. Tell them that no rules apply to you and you are not responsible for any of your actions. Tell them that the Rules of Order, the Rules of Grammar, the Generally Accepted Accounting Principles, and the Supreme Law of the land have no meaning whatsoever to you – and why?

Why isn't fact, truth and law any part of these public meetings?

Why should anyone with seven or more functioning brain cells not view this BOD's actions as Acts of war? How can any of you just slide on in here and acknowledge a despicable section on Your Agenda called "Consent Calendar," containing as many as 28 items, each and every one begs for debate? No wonder mold and stagnation have taken over, there's no 'words-on-paper' age or term limits.

Nothing is read into the public records, none of the people are involved, and yet somehow it's okay to spend money you didn't earn without the consent of the governed? The whimsical notion of providing 'health' or 'safety' is stating a position without evidence for the claim. You pretend to protect the people, but in fact you are the major long-term threat to the people. Your fanatic fixation on what you believe to be mental illness was proved a long time ago to be someone that doesn't accept their own tragedy. The local media is full-up on parroting whatever imagined External Authority says . . . the mental illness control tactic gets projected onto the people 24/7. Federal HHS is all over your Agendas – either more shrinks, shrink nurses and shrink staff is hired or getting a raises, or there's \$300,000 paper pending with Dell & Microsoft that begins with HHS and oozes into Consolidation w/ The Presumed County Depts. to store email—"out there." Another State slash Federal bribe is a surplus of 22 vehicles for the shrink dept., or EXTRA HOURS presented thru CAO, but upon closer look –that too is for HHS. When million\$ are flushed on the federal HHS shrink dept., that translates into -the status quo 's BOD have all been bribed and surrendered state rights. The State of California (not California state), as a whole, has Consolidated/embedded with U.S. Inc., surrendering state rights to the tune of 45.8%. But, the County of Humboldt (NOT Humboldt County) has surrendered 64%. HHS has had a patent on cannabinoids since 2003. Pumping man-made toxic solutions of opiads into the population under a guise of Another Humboldt "pilot program" training, and flushing \$3.5 million on outside consultants for HHS "staff" –there leaves no doubt as to why so many people can't wake up. Abolish HHS and DEA – get U.S. Inc. out of Humboldt – Now!

You were never delegated authority to **Invest the People's Public Treasury**. Yet, last week, without any conscious thought whatsoever, impersonating public servants **delegated authority you did not have, to John Bartholomew the Tax Collector, to be fully responsible for Investing money that he did not earn, that is not his or yours or any corporate governmental service employees'**. Investing the people's treasury monies is not what a government of the people, for the people, and by the people, does.

With the exception of resolutions for acknowledgment, there isn't one item on last week's Agenda that doesn't have a foundation of fraud and the stench of fascism. "Once a fraud. Always a fraud." Just like your Measure Z and your Ordinance of semantic deceit, aimed at a particular class of people, with intent to destroy a culture; it smells to the high heaven. So divide and conquer. Pit those who bent over and grabbed their ankles against those who reserve their right to not contract with thugs.

Now that we know that 10,000 acres of hemp can produce the same *blades, materials, pulp, etc.* as 41,000 acres of forest – the Generally Accepted Accounting principals will Rule a red flashing alarm signal, that says; there's no logic in logging; STOP LOGGING! PLANT HEMP!

When the word Ordinance is wrongly used by THE COUNTY'S 18 paid commies, written in aggressive Old World master slave Fiction of statutory democracy, against the sovereign, it's past time to rid ourselves of the criminal parasites trespassing on American soil; the so-titled British Accreditation Registry cult. Americans have endured their Satanic presence for 150 years, that has brought us to 2.4 million caged Americans, over half a million are caged for simple possession. Every 25 seconds, someone in America is caged for possession – more than 1.25 million a year.
