ARTICLE XIX – DISADVANTAGED BUSINESS ENTERPRISES (DBE) PARTICIPATION

- A. This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs." Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- B. The goal for DBE participation for this contract is Zero percent (0.0%). Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-01), or in the Consultant Contract DBE Information (Exhibit 10-02), attached hereto and incorporated as part of the contract. If a DBE subconsultant is unable to perform, CONSULTANT must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- C. DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. CONSULTANT or subconsultant shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. CONSULTANT shall carry out the applicable requirements of 49 CFR, Part 26 in the award and administration of US DOT-assisted agreements. Failure by

CONSULTANT to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as COUNTY deems appropriate.

- D. Any subcontract entered into as a result of this contract shall contain all of the provisions of this Article.
- E. A DBE firm may be terminated only with prior written approval from COUNTY and only for the reasons specified in 49 CFR Section 26.53(f). Prior to requesting COUNTY consent for the termination, CONSULTANT must meet the procedural requirements specified in 49 CFR Section 26.53(f).
- F. A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under the contract is commensurate with the work it is actually performing, and other relevant factors must be evaluated.
- G. A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, similar transactions, particularly those in which DBEs do not participate, must be examined.
- H. If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- I. CONSULTANT shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- J. Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise, First-Tier Subconsultants," CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by CONSULTANT or CONSULTANT's authorized representative and shall be furnished to COUNTY's Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty five percent (25%) of the dollar value of the invoice being withheld from payment until such summary is submitted. Any amounts withheld as a result of a failure to provide a summary of DBE payments will be returned to CONSULTANT when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises, First-Tier Subconsultants" form is submitted to COUNTY's Contract Administrator.
- K. If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify CONSULTANT in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify CONSULTANT in

writing with the date of certification. Any changes should be reported to COUNTY's Contract Administrator within thirty (30) calendar days thereof.

ARTICLE XX – CONTINGENT FEE

CONSULTANT warrants by execution of this contract that no person or selling agency has been employed, or retained, to solicit or secure this contract upon an agreement or understanding, for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees, or bona fide established commercial or selling agencies maintained by CONSULTANT for the purpose of securing business. For breach or violation of this warranty, COUNTY has the right to terminate this contract without liability, pay only for the value of the work actually performed, or in its discretion to deduct from the contract price or consideration, or otherwise recover the full amount of such commission, percentage, brokerage, or contingent fee.

ARTICLE XXI – DISPUTES

- B. Not later than thirty (30) days after completion of all work under this contract, CONSULTANT may request that COUNTY review any and all unresolved claims or disputes, other than audit. The request for review of unresolved claims or disputes shall be submitted in writing.
- C. Neither the pendency of a dispute, nor its consideration by the COUNTY will excuse CONSULTANT from full and timely performance in accordance with the terms of this contract.

ARTICLE XXII – INSPECTION OF WORK

CONSULTANT shall reimburse COUNTY for all costs, attorneys' fees, expenses and liabilities incurred with respect to any Litigation in which CONSULTANT is obligated to indemnify, defend and hold harmless COUNTY under this contract.
- B. In connection with the performance of the non-design professional services required hereunder, if any, CONSULTANT shall hold harmless, defend and indemnify COUNTY and its officers, agents, officials, employees and volunteers from and against any and all liability, loss, damage, expense, costs of any kind or nature, including, without limitation, costs and fees of Litigation, arising out of, or in connection with, CONSULTANT's performance of work hereunder or its failure to comply with any of its obligations contained in this contract, except such loss or damage which was caused by the sole negligence or willful misconduct of the COUNTY. CONSULTANT shall reimburse COUNTY for all costs, attorneys' fees, expenses and liabilities incurred with respect to any Litigation in which CONSULTANT is obligated to indemnify, defend and hold harmless COUNTY under this contract.
- C. Acceptance of insurance, if required by this contract, shall not relieve CONSULTANT from the indemnification obligations provided for herein. Brookwood Drive Bridge over Jacoby Creek Rehabilitation Project

PROJECT UNDERSTANDING & APPROACH SUMMARY

The Humboldt County Department of Public Works is proposing to rehabilitate the existing Brookwood Drive Bridge over Jacoby Creek in order to provide a safe, reliable, and long lasting structure to serve public vehicular and pedestrian traffic. Quincy Engineering (Quincy) has prepared the following scope and cost for a bridge rehabilitation project based upon:

- A detailed Field Inspection of the existing bridge in June 2013
- Preparation of a Rehabilitation Strategy Report for the bridge
- Examination of current Caltrans Bridge Inspection Reports and As-Built drawings
- Ongoing dialogue with the County regarding the existing structure

The existing bridge carries Brookwood Drive over Jacoby Creek near the community of Bayside in Humboldt County. This bridge is a covered timber pony truss structure on reinforced concrete abutments founded on spread footings that carries only one lane of traffic. The existing bridge was built in 1967 and is currently classified as "Functionally Obsolete" with a 37.7 Sufficiency Rating in 2011. The bridge is properly signed for one lane and is capable of carrying legal loads with no posting limits.

Based on a request from the County, Quincy performed a bridge inspection and prepared a *Bridge Condition Assessment and Load Rating Analysis Report* dated December 2013. In general, the findings of the report showed that the bridge in good to fair condition based on its location, materials, and age. However, one critical finding was made requiring immediate correction; boring insect activity was damaging the lower truss chords and floor beams of the bridge. Other repair items were noted and prioritized. Below is a summary of suggested work:

<u>Condition Issue</u>	<u>Recommendation</u>	<u>Priority</u>
Boring insect activity in critical members	Arrest insect activity and further damage	High
Loose walkway & hand railing	Repair walkway & handrail. Upgrade to current code and standards.	Medium
Decayed roadway approach guardrails	Replace rotted approach guardrails. Upgrade to current code and standards.	Low
Corroded steel connection components	Clean & apply protective coating system.	Low

Based on discussions with the County, it is our understanding that the County would like to move forward with the recommended bridge rehabilitation strategy. Quincy will partner with Western Wood Structures (WWS), a timber structure specialist, to execute this project for the County as well as with Big Time Pest Control regarding the pest infestation.

March 27, 2015

developing YOUR vision | delivering YOUR project

Quincy, WWS, and Big Time Pest Control will provide field inspection; engineering design; plans, specifications, and estimates for construction, and construction support. *It is our understanding that the County will provide all Environmental services including project permitting. Right-of-Way engineering is not anticipated to be required for the project. Utility coordination is anticipated to be minimal as utilities will be "protected in place" and all utility coordination will be performed by the County.*

WORK PLAN

The Work Plan/Scope of Work will involve completion of the following tasks in a phased approach. In order to proceed with the project development a detailed scope is needed based on the urgency of arresting the pest infestation. If pest treatment is very urgent, it would be prudent to conduct the treatment while the other rehabilitation work such as railing/walkway rehabilitation/replacement, painting, etc. is cleared for construction.

PHASE 1 – FIELD REVIEW & PRELIMINARY ENGINEERING

Task 1.1 – PROJECT MANAGEMENT

Quincy will provide Project Management tasks which include coordination with the County, Team management, product development tracking, Team and stakeholder communication, and project progress and budget reporting. Quincy will develop, track, and lead the following project management tasks:

- Critical Path Schedule;
- Milestone Project Development Team teleconference meetings;
- Meeting Agendas, Minutes, and Action Item Summaries;
- Monthly Invoices, Progress Reports, and Look-Ahead Summaries; and
- HBP paperwork assistance/facilitation as required.

Task 1.2 – KICKOFF MEETING & FIELD REVIEW

Quincy and WWS will meet with the County and conduct a field meeting to perform an inspection of the existing bridge. The purpose of this field review will be threefold:

1. **Validate the findings of the Rehabilitation Report.** Ensure that the required bridge rehabilitation effort has been fully scoped and there no changes have occurred to the bridge that would require additional work. WWS will verify extent of decay/bug activity in timber members by taking resist-o-graph readings of the truss structure.
2. **Strategize and select the preferred pest treatment strategy.** Additional samples of the timber portions of the bridge or insects may be taken for further study and evaluation.
3. **Identify the rehabilitation work.** This include rehabilitation work such as painting, timber member rehabilitation/replacement, sideboard replacement, roadway approach railing work.
4. **Determine preferred geometry and attachment for new pedestrian walkway.** It is recommended to replace the existing walkway rather than repair. This represents a

better return value on the County's investment and will also allow the County to bring the walkway up to current standards.

If required, additional bridge inspection can be performed to supplement previous inspection findings. Visual inspection of components within arm's length in accordance with the Nation Bridge Inspection Standards Code of Federal Regulation 23 CFR Part 650 and recommendations in American Association of State Highway Transportation Official's (AASHTO) *Manual for Bridge Evaluation*. Non-destructive evaluation may also include physical inspection including cleaning and measuring steel truss components and hammer ringing of concrete components. Minor invasive investigations may also be performed including sample drilling of timber stringers to determine decay limits and probing damaged concrete areas, contingent upon consultation and permission of the owner. The kickoff meeting discussion and decisions will be documented in a written meeting summary along with any relevant findings from supplemental inspection.

- Combined project Kickoff Meeting and Bridge Field Review
- Supplemental inspection, measurements, & sampling; if required
- Written Meeting Summary documenting finding and decisions including a memo from Western Wood Structures and Big Time Pest Control.
- Project Development Approach memo defining the next steps forward and schedule.

Task 1.3 – PRELIMINARY ENGINEERING - PLANNING STUDY & ESTIMATE

Quincy, WWS, and Big Time Pest Control will develop the Rehabilitation concepts along with the field meeting findings and decisions into a Rehabilitation General Plan. The General Plan will identify areas and work to serve as a basis for developing an initial construction estimate. The General Plan will also be used to update any changes to the rehabilitation strategy from the *Bridge Condition Assessment and Load Rating Analysis Report* dated December 2013. The Planning Study drawing will also serve as the basis for displays and boards for the public outreach meeting.

- Bridge Rehabilitation Advanced Planning Study
- Bridge Rehabilitation Construction Cost Estimate

PHASE 2 – PROJECT MANAGEMENT & FINAL DESIGN SERVICES

Task 2.1 – ENVIRONMENTAL AND PERMIT PROCESS SUPPORT

It is our understanding that the County will be providing environmental services including NEPA/CEQA compliance, environmental documents, and acquisition of project permits from appropriate regulatory agencies. Engineering technical information is often required to assist in development of environmental documents and permits. Quincy will assist County staff coordinating environmental compliance by providing exhibits, figures, estimates, and schedule timelines, and other technical engineering information.

- Environmental Documentation and permit application review and comment.

- Regulatory agency project review meetings (2) via phone conference.

Task 2.2 — PUBLIC OUTREACH

Quincy will coordinate and assist the County in performing public outreach in the form of a community Open House. Quincy will perform one public open house during the preliminary design and planning stages of the project. The purpose of this Open House will be to introduce the project to the community and broader public, gather valuable input from the public, and educate the public about specifics of the project to help establish expectations of the project outcomes. This meetings will include display boards, a presentation, and facilitated question and answer session. Quincy will utilize a number tools for effective communication to ensure we cater to a multiple of preferred styles.

PLS 4/1/15

- Community Open House for Public Outreach with Presentation, Displays, & Boards

Task 2.3 – PS&E & Bid Support

Quincy will develop the project Plans, Specification, and Estimate for the bridge rehabilitation based pest infestation abatement, railing repair, painting, and possibly roof replacement. Changes may be necessary following completion of Task 1.

The Plans, Specifications, and Estimate will be developed utilizing Caltrans 2010 Standard Specifications, Special Provisions and Standard Plans as applicable. Deliverables at the 65%, 95% and 100% milestones will be provided.

The bridge railing repairs are understood to consist of in-kind member replacement and will not change the appearance or character of the bridge. Qualitative assessment will be made to identify additional work such as bridge painting and roof replacement and it will also be such that it will match as closely as reasonable possible the current type and color such that the appearance or character of the structure will not be changed. Significant member replacement or structural modification is not currently considered necessary and not included in this scope of work however it can be added as an optional item.

Quincy will also provide the County support to respond to bidder inquiries during the bidding process.
