Hi Ryan,

My name is Miles Raymer, and I'm the Communications Manager for Northern Emeralds. We wanted to let you know that we really appreciate you putting us in touch with Bonnie Neely. Cody and I will be meeting with her later this week.

Thanks very much for your assistance making that connection!

Miles Raymer
Communications and Special Projects Manager

Hi Cody,

Congratulations! Can you please send me documentation of the change of ownership so I can update our records?

Thanks!

Hello Micheal!

Thanks for all your help. As miles has said we are the case :)
Also I am the official new owner of the Hooven property so you should have my consent in our application.
Please let me know if there is anything else you may need.
Cheers!

Hi again Miles,

Reading Jen's email, it appears she referenced the wrong application number. It should be application #10566 or #10568.

I'm not sure how to best handle the botanical survey she is requesting. She wants it done when the plants are blooming, but that may be a ways off. I suggest you call around to some botanists to see if they think an adequate rare plant survey could be done for the site even though it isn't the flowering season and let's have a conversation about what you find out.

And just to clarify - in your email you referenced application #10256 as being tied to the Hooven

property. According to our records that application number is tied to APN 511-301-005, which is near the Dows Prairie site that we approved for a mixed light operation. I believe we are still waiting for the owner's consent form before we begin processing that application.. Please let me know if I'm wrong.

Thanks!

- Michael R.

Good question Miles. I do have another application with that application number...maybe Jen Olson intended her comments for that one. I'll double check with her and get back to you.

Thanks for the heads up!

Subject: Question about permit numbers

Hi Micheal,

We have been trying to sort out what's left to do on our County permits, and we are a little confused about an email we received from you on Monday. You forwarded us an email from Jennifer Olson at CDFW, with the subject "Stross APPS 10607". As far as we know, we have not submitted any applications with that number.

Here are the application numbers we have:

For the Dows property: 10258, 10260

For the Hooven property: 10566, 10568, 10256

Any idea where the 10607 number is coming from?

Thanks very much!

Subject: **Why don't humans pay attention and learn from "older field experienced" folks? I emphasize "experienced"**

I have been giving suggestions for a long time trying to wake-up those who run our lives like the Humboldt County Supervisors. With a lead supervisor in the Humboldt County asking me to not distribute learned truths and free expression of ideas, I see I am ignored by those who should know better. As a young person I thought I was some hot stuff, and in later years as an old field experienced person, I learned it is wrong to be control by a voting majority not doing what experienced people in the voting minority have learned. With many staying in hurricane areas, illustrating how humans ignore the real world, showing species and inexperienced humans are in for a helluva ride. I have no faith in the way humans are educated to think, and I can see the world in a mess and going to hell.

Examples of what I see happening are as follows: **Many especially older folks do not know how to use computers and many others do not understand what they are being fed. Many do not know what causes fire and when hi-tech should be used. Especially in California, where around 80% of the wood used in state comes from out of the state when all state woods needs could be grown on private lands in the state, many (especially locally) do not understand real world realities. Even with training in the law, the average person does not know when they break the law. With fight over survival involving sunlight, water, and nutrients (food), and with media, preservationists, confusing legalese, inexperienced politicians, those with enough to have it made, Fourth Branch of Government regulators, and others leading the way, this country and the world are divided about real world realities. "my" jury sees the future going "badly" for open-space, tree farmers, timber industry, ranchers, framers, and other rural folks. I see humans burning-up the wildlands, and this country's taxpayers paying money doing stupid things.**

Living in a hi-tech world, being 50 plus years in the real rural world as old field experienced person of sound mind and body, and for those who are interested, written copies of what I say are provided on the handout table.

Local folks and others who control human lives need to do better

**It is time to start paying attention and learning
from older experienced folks?**
