

March 21, 2017

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

A handwritten signature in black ink, appearing to read "Danny Kovic". The signature is fluid and cursive, with a long, sweeping underline that extends to the left.

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Please Print signature: *Karen J. Straughan*

March 21, 2017

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Please Print signature: *Bryan Tidwell*

March 21, 2017

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

March 21, 2017

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Please Print signature:

March 23, 2017

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Please Print signature: Erika Aoki

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Please Print signature:

March 21, 2017

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services. 2-1-1 Humboldt is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency such as the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support so that it can grow and continue to meet the needs of all residents now and after a disaster.

Sincerely,

Sanna Sterling

These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster, our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD. Along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work you all do to keep our community/homes safe.

Sincerely,

March 21, 2017

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

March 21, 2017

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Harla L Santos

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency, such as the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Please Print signature: Deborah Watman

March 21, 2017

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Please Print signature:

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Bonnie K. Olesen

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to the most current and vital information they are calling about.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a valuable service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents now and after a disaster. Thank you for your consideration and the work You All do to keep our community/home safe.

Sincerely,

Chuck DeWitt

Dear Board of Supervisors,

I am writing to urge you to vote to include 2-1-1 Humboldt in Measure Z funding for fiscal year 2017-2018. The intent of the Measure is to enhance and maintain public safety services, which aligns with the work of 2-1-1 Humboldt and VOAD, which is a valuable public safety service.

As you may know, 2-1-1 Humboldt and OES are critical components of PBS North Coast's plan to super serve our region. Communication during an emergency is so important and with this partnership we have a trifecta.

In 2016, 2-1-1 received over 15,000 calls from local residences that covered everything from Homeless assistance to medical travel. They maintain over 2,000 community resources in their database and operate 24/7, providing a free lifeline to those who call regardless of age, income, religion or household status.

During times of emergency; such as, the recent Oroville Dam evacuation, 2-1-1 Humboldt was one of six Northern California 211's who assisted with the Oroville evacuation. There were over 600 calls in the first 24 hours with emergency and non-emergency questions. In instances like this, 2-1-1s throughout California can switch their calls so that any available 2-1-1 agent, anywhere, may receive calls from any location and receive access to the database of resources for that caller's location. This way calls are answered immediately and get the most current information that is shared with 2-1-1 from public works, OES, Red Cross, DHHS, PG&E and other governmental and non-governmental agencies, most whom are a part of VOAD (Volunteer Organization Active in Disaster) or first responders. These connections are important to making sure that 911 is not flooded with non-emergency calls and our community members can speak to an agent 24/7 to get the most current and vital information they need.

2-1-1 Humboldt is where local governmental representatives will be asking callers to contact for those non-emergency calls after a disaster. The work they do is vital in making sure that after a disaster our community has a point of contact to be able to reach out to for answers about their concerns and needs. 2-1-1 has a seat in the Office of Emergency Services after a disaster and is Chair of VOAD along with being a member of 2-1-1 California, together they all work to make sure that we have the best plan in place to handle any situation large or small, natural or manmade.

I am signing this letter of support and asking you to please consider the \$57,000 request for Measure Z funding for 2-1-1. It is a critical service to Humboldt County that we need to strengthen and support, so that it can grow and continue to meet the needs of all residents before, during and after a disaster. Thank you for your consideration and the work You All do to keep our community and homes safe.

Sincerely,
