Subject: Rescheduled

Hi,

It is evident we need to reschedule the commission meeting... I have been trying all week to touch base.. we want to review the photos that will be presented... it is our personal homesite I want to make sure there arent photos of my cars, kids, along with intellectual property involved with our Cannabis Cultivation Operation. Also the staff report says we have breached our settlement with Jon Ford but that is not the case. As we discussed in our jan 10 meeting, we did corrective action to prevent environmental degradation from leaving that portion of the property unfinished. The grading work is not finished we have been maintaining it and waiting through this entire process. Listing restoring the land as a condition of our cannabis permit is unfounded and not environmentally responsible. Because this was thrown at us last minute i do not believe we should continue with the planning commission decision tonight. We need to schedule another meeting at the dept to discuss the difference of opinion you have than what we last agreed to at our jan 10 meeting and come to a unanimous decision to go into the planning commission with. I will meet you at the courthouse to confirm if I do not hear back Thanks Rachel
