SUBJECT: Relocating the security electronics in the Reginal Hall.

Dear Ray:

Graphic Control Systems, Inc. (GCSI) is pleased to present this proposal for the relocation of the security electronics in the Regional Juvenile Facility.

We propose to relocate all of the electronics currently located behind the cabinets and the video equipment now installed out in the open. In addition, the old radio will be replaced and a new rack-mounted receiver and amplifier for the radio will be installed in the rack. This proposal includes all wiring, connectors, radio receiver, and audio amplifier for the radio, installing the new PLC controller, intercom and music communication boards.

Our work will be done mostly after hours as to minimize any disruption from pulling new wire and in the terminations.

The new rack will be located on the counter top in the back of the control room. I will position it as far to the right as possible to take up as little counter space as possible. The equipment will be about 22 inches wide and 50 inches tall. It will extend past the counter top by 1 inch.

This rack will have a lockable door while the back of the rack will open so as to service the equipment from the back. The intercom, music and lock interface boards will be on pull-out shelves for ease of service and troubleshooting the system.

Equipment and parts	\$11,137.00
Expense for additional labor	\$ 4,981.00
	Taxes \$968.92

Total Cost	\$ 17,086.92
------------	--------------

We will need to invoice 50% of the total cost once this is accepted in order to purchase the equipment.

We will do the billing in two billing schedules. The first invoice will be sent upon receipt of the PO to proceed. The second invoice will be sent on the completion of the job.

If this proposal meets your approval, please sign the acknowledgement below and return it via email to maeggsr1@ix.netcom.com.

Should you have any questions, please feel free to contact me.
Sincerely,

Graphic Control Systems, Inc.
