Subject: Traffic Light at F and Oak
Date: Thursday, February 25, 2021 10:10:35 AM

Good morning. While there is a significant amount of traffic traveling north and south on F Street, it is my opinion that the intersection of F and Oak Streets does not necessitate a traffic light. Most of the traffic travels on F Street, and the majority of the traffic on Oak Street is that which travels to Oak from G and H Streets to get to F Street. I live at 3917 F Street, which is one house from the corner of Oak and F. If there is a traffic light installed at that intersection, with all the traffic on F Street, it will become nearly impossible to leave my residence because traffic will either be stopped at the light or traveling through on a green light. This would create quite a burden for me as with the other residents who live close to the intersection at Oak and F Street.

Thank you for your consideration.

Sincerely,

Gina M. Emery
